Small Nuclear Forces The Washington Papers 103:

Small Nuclear Forces Rodney W. Jones, 1984 **Strategic Consequences of Nuclear Proliferation in South Asia** Neil Joeck, 2025-04-01 *Strategic Consequences of Nuclear Proliferation in South Asia* 1986 examines the consequences for particular states should India and Pakistan decide to deploy nuclear weapons It looks in detail at the positions of both India and Pakistan and the responses of the United States the Soviet Union and China and their respective strategic positions This book includes contributions on the larger question of how nuclear pariah states pose a separate problem of nuclear proliferation as well as on the broader challenges to the nuclear non proliferation regime Strategic Calling James Allen Smith, 1993 Nuclear India in the Twenty-First Century D. SarDesai, R. Thomas, 2002-05-02 This collection of essays unlike other books on this subject emphasizes strategic technological and economic factors It includes contributions from a combination of academics and governmental experts from both the United States and India *Nuclear India in the Twenty First Century* provides an important picture of India s nuclear intentions and capabilities and should facilitate policies that the US may consider in response to regional and global proliferation **Military Industry and Regional Defense Policy** Timothy D. Hoyt, 2017-07-05 *Military Industry and Regional Defense Policy* re examines military industrialization in the developing world focusing on policy making in producer states and the impact of security perceptions on such policy making Timothy D Hoyt reassesses the role of regional state sub systems in international relations and recent historical studies of international technology and arms transfers Looking at Israel Iraq and India the three most powerful regional powers in the Cold War era he presents an expert analysis of the three sided phenomena of the regional hegemony the regional competitor and the small over achiever This new book breaks away from existing literature on military industries in the developing world which has focused on their economic and development costs and benefits These past studies have used primitive methodologies that focus on the production of complete weapons systems a misleading gauge in a world of growing international defense cooperation They have also ignored empirical evidence of the impact of local military industrial production on Cold War regional conflict and of the defence planning and concerns that drove development of indigenous military industries in key regional powers This new text delivers an incisive new perspective *Military Technology, Armaments Dynamics and Disarmament* Hans Gunter Brauch, 1989-01-13 **Soviet-American Relations with Pakistan, Iran and Afghanistan** Hafeez Malik, 1987-03-02 This is a collective volume on Soviet American relations with the three rimland states of Iran Afghanistan and Pakistan The contributors argue that what happens in these three states would ultimately affect the states in the Gulf and the Middle East The USA maintains friendly relations only with Pakistan while her relations with Iran and Afghanistan are antagonistic The future penetration of the Soviet influence in Iran and Afghanistan is assessed and probable scenarios are discussed by the seventeen contributors who represent the military diplomacy and academia The concluding chapter synthesizes the discussions and the criticism of various papers The book is the most up to date thorough analysis of

superpower relations with the three neighbouring states of the Soviet Union currently available

Inadvertent Nuclear War Hå. Wiberg, I.D. Petersen, P. Smoker, 2013-10-22 Since the dramatic end of the Pacific War in 1945 the threat of nuclear war has exercised the minds of many Initial fears concerned the risk that a political crisis between the Superpowers would escalate through military confrontation into a calculated nuclear war Another scenario pictured a new Hitler commanding a nuclear capable state prepared to use such weapons irrationally possibly sparking a catalytic nuclear war between the major Powers More recently attention has shifted towards the risk of the accidental release of nuclear weapons While the risk of intentional conflict between the major Powers has lessened the arsenals have only been marginally reduced leaving the possibility of accidental release as perhaps the most threatening case Inadvertent Nuclear War presents the risk in terms of the reliability and instability of the human and technical systems governing release with contributions ranging from the engineering of computer software to the psychology of the chain of command As Dr Wiberg states in his introduction No known technical construction human being or social organization is absolutely failsafe

Sea-Launched Cruise Missiles and U.S. Security Eric H. Arnett, 1991-07-19 This is the most up to the minute survey of the vital subject of sea launched cruise missiles SLCMs to appear in ten years It systematically analyzes the technological promises and weaknesses of SLCMs especially conventionally armed land attack versions explaining sophisticated technologies in language accessible to the general reader Eric H Arnett presents a cogent assessment of the crux of the SLCM issue for U S security examining the coastal nation concept of the U S defensive position and investigating whether technology can adequately compensate for geography as Tomahawks and their Soviet counterparts give way to more advanced progeny Arnett weighs the trade offs in a frank discussion of the technologies and missions envisioned for current and future SLCMs This well researched authoritative study evaluates both U S and Soviet SLCM arsenals examines the role of arms control and unilateral initiatives in managing the dangers of SLCMs and critically assesses the claims made for the Tomahawk conventionally armed cruise missile The relevance of a changing international scene and domestic fiscal chaos to SLCM issues is fully appraised The book s eight chapters lead the reader through all aspects of this complex field with admirable lucidity Early chapters describe missions envisioned for U S conventionally armed SLCMs and assess actual SLCM technology Chapter 4 addresses the reciprocal problem of Soviet SLCMs describing possible and likely roles of Soviet nuclear and conventionally armed SLCMs and the importance of offering responses The increasingly important question of how SLCMs might be used in the developing world both by and against U S forces and security partners is considered in Chapter 5 an especially relevant discussion in light of the apparent success of the Tomahawk SLCM in the 1991 war with Iraq The next two chapters describe SLCM arms control as it has been practiced and discuss from two vantage points the roles of future arms control and unilateral disarmament initiatives in addressing the disadvantages of SLCMs Finally the immediate implications of the previous chapters for policy practitioners are developed in

a chapter that focuses on specific policy recommendations This timely contribution is a reliable source of information on SLCMs for the interested public the non government arms control community naval personnel and members of both Congress and the administration **Nonproliferation Policy and Nuclear Threshold States** Dean Martins,1990

Pakistan and the Afghan Conflict, 1979-1985 Frédéric Grare,2003 To the superficial observer Pakistan s involvement in the Afghan conflict with the USSR was the outcome of an ideological alliance This study seeks to establish that the roots of this involvement led away from both Afghanistan and ideology to Pakistan s neighbor to the east The question that is central to this study did Pakistan have the option of signing an agreement with the USSR between 1983 and 1985 that would end the hostilities **India and the Nuclear Challenge** K. Subrahmanyam,1986 **Nuclear India** Jasjit Singh,Institute for Defence Studies and Analyses,1998 India s nuclear tests on May 11 13 1998 ended the country s three decade old self imposed restraint on its emergence as a nuclear power India announced that it was now a nuclear weapon state A new phase in India s security calculus therefore has begun This volume attempts to explore and explain the whole range of issues related to Nuclearisation in order to extrapolate logical policy positions that the country would need to evolve at various levels *Gunboat Diplomacy and the Bomb* Eric H. Arnett,1989-10-25 In this powerful new analysis of the importance of U S nuclear proliferation policy Eric H Arnett realistically assesses the impact of nuclear proliferation on the ability of the United States to protect what is currently perceived to be its interests The book offers a thorough review of the effects of nuclear weapons on U S power projection forces the current capabilities of proliferant countries and the ability of these proliferant to successfully deliver their nuclear weapons Arnett constructs scenarios that test the relevance of the proliferant arsenals to U S capabilities and probable willingness to protect its interests in future crisis Using India Iran and Libya to present these scenarios the book questions whether a proliferant would be immune to intervention from a nuclear superpower or rather immune to the purported benefits of nuclear deterrence With a special focus on U S naval power this book asks whether nuclear proliferation will limit options and opportunities the U S would otherwise have Will the U S have to forego certain regional interests in the face of nuclear attacks on ships and bases Would the Navy have struck Benghazi had Qaddafi deployed a small nuclear arsenal Will the Freedom of Navigation Program have to be abandoned in some cases Or will the U S Navy be able to cope through modifications to forces and tactics as more countries cross the nuclear threshold

Nuclear Proliferation Today Leonard S. Spector,1984 First of a proposed series of annual reports on worldwide nuclear holdings from the Carnegie Endowment for International Peace this volume chronicles the history of proliferation considers its dynamics and makes some prognoses based on international relations stated development programs the superpower s uranium and plutonium acquisitions and nuclear plant construction and activity Spector provides information on who today s emerging nuclear powers are how close they are to the nuclear threshold and why international efforts to curb the spread of nuclear weapons are ineffective ISBN 0 394 72901 3 pbk 4 95 □□□□□□□□□□□□□□□□**1982-1983** ,1985

Security Or Armageddon Louis René Beres,1986 Nuclear Proliferation In South Asia Stephen P Cohen,1991-02-14

This study is based on two policy related premises the pessimistic one is that both Pakistan and India have developed nuclear weapons covertly yet hold back from deployment because each sees political advantages in a policy of nuclear ambiguity The optimistic premise is that arms control and verification could take root in both countries to limit the instability of their national rivalry and nuclear potentials The first premise shapes Cohen s regionalist policy views The second premise is the key to several chapters by others The volume includes two political position papers from opposed national perspectives by Akhtar Ali from Pakistan and Brahma Chellaney from India The latter explains India s traditional reticence toward region specific arms control schemes Akhtar Ali presents insights both into the real obstacles and the openings that could move them aside ISBN 0 8133 8159 2 pbk 47 00 *India's Nuclear Deterrent* Amitabh Mattoo,1999
