

GEOGRAPHY, HISTORY, AND THE CITY IN EUROPE AND RUSSIA

JAMES H. BATER, *St. Petersburg: Industrialization and Change*, Studies in Urban History 4. Montreal: McGill-Queens University Press, 1976. Pp. 469.

The unity of geography and history was long accepted by historians. Geography was both the theatre of history and its ground. It was space conjoined with time, land with men and events. In Europe, this tradition was vigorously and creatively restated during the first half of the twentieth century. In the United States, during the same period, there was a parting of the ways of geography and history, a schism that is well known, although its explanation has never been clear. Geography became suspect to the American historian. He came to "glimpse the fields and gardens"¹ of this neighboring discipline, with its foliage of specializations far more dense than his own, and questioned the nature and importance of the geographer's work. For the Philistine, it was a rudimentary topic studied in grammar school; for the rest, the "relative lack of study of the relations between Geography and History" that Frederick Jackson Turner noted at an American Historical Association conference of 1907 devoted to that topic, and the highly skeptical conclusions that the same conference reached about the importance of geography for historical study, are facts that apply to most American historians seventy years later.²

Recently, they have been called upon to reconsider geography. This current encounter of the two disciplines may be seen largely as a by-product of the erosion since the 1960s of traditional historical method and the growing acceptance of new approaches to history emanating from the social sciences and from European as well as American

Megalopolis: The Giant City in History Theo Barker, Anthony Sutcliffe, 1993-12-13 This book follows the evolution of the very large city across the world from its origins in Ancient times to its current dominant position in both the industrialised world and the Third World In depth studies are devoted to the key giant cities of human history at decisive points in their growth The case studies include Rome London Saint Petersburg Moscow Bangkok and Berlin Additional studies deal with the general characteristics of the megalopolis stressing its implications for cultural life International Handbook of Underwater Archaeology Carol V. Ruppe, Jane F. Barstad, 2013-11-11 Although underwater archaeology has assumed its rightful place as an important subdiscipline in the field the published literature has not kept pace with the rapid increase in the number of both prehistoric and historic underwater sites The editors have assembled an internationally distinguished roster of contributors to fill this gap In addition to both geographical and topical approaches the chapters also focus on technology law public and private institutional roles and goals and the research and development of future technologies and public programs **Urbanism Past & Present**, 1981 **Curtains of Iron and Gold** Heikki Eskelinen, Ilkka Liikanen, Jukka Oksa, 2019-01-15 First published in 1999 this book examines the construction of new political economic and mental borders in post Cold War Europe Various national and regional settings are analyzed along the old East West divide In post Cold War Europe the East West divide no longer exists in the form of the clear cut Iron Curtain separating two security blocs two politico economic systems and two ideologically and culturally distinct worlds Still it remains clearly discernible both in the form of unrelenting politico cultural differences and as an economic Golden Curtain At the same time a more complicated system of intersecting political economic and mental borders keeps developing Today there are various scales of interaction which produce distinctive national regional and local experiences of borders In this book the construction of new political economic and mental borders is analysed by specialists from both sides of the former East West divide The future of European borders is discussed in various national and regional settings from the Barents Region in the North to the Old Habsburgian lands in Mitteleuropa St. Petersburg James H. Bader, 1982-10-01 **Urban Historical Geography** Dietrich Denecke, Gareth Shaw, 1988-06-30 Originally published in 1988 this book provides a fascinating comparative review of research in urban historical geography in Britain and West Germany It draws together a wide range of material on the history of urban development to explore the theoretical and methodological possibilities offered by comparative surveys of contrasting national and regional urban experiences The chronological focus of the essays ranges in time from the medieval period onwards and the contributors explore not only the specifically intellectual consequences of their empirical research but also its policy implications for urban planners and conservationists Serious extended comparative debate has hitherto been absent from the field of urban historical geography as a whole this volume sought to reverse that trend and in so doing to establish a fresh research agenda for an important and expanding discipline History

Today Peter Quennell, 1976 **Mapping St. Petersburg** Julie A. Buckler, 2007-04-08 Pushkin's palaces or Dostoevsky's slums Many a modern day visitor to St Petersburg has one or more likely both of these images in mind when setting foot in this stage set like setting for some of the world's most treasured literary masterpieces What they overlook is the vast uncharted territory in between In Mapping St Petersburg Julie Buckler traces the evolution of Russia's onetime capital from a conceptual hierarchy to a living cultural system a topography expressed not only by the city's physical structures but also by the literary texts that have helped create it By favoring noncanonical works and underdescribed spaces Buckler seeks to revise the literary monumentalization of St Petersburg with Pushkin and Dostoevsky representing two traditional albeit opposing perspectives to offer an off center view of a richer less familiar urban landscape She views this grand city the product of Peter the Great's ambitious vision not only as a geographical entity but also as a network of genres that carries historical and cultural meaning We discover the busy messy middle ground of this hybrid city through an intricate web of descriptions in literary works nonfiction writings such as sketches feuilletons memoirs letters essays criticism and urban legends lore songs and social practices all of which add character and depth to this refurbished imperial city
