Stabilization And Transport Of The Critically Ill:

Resuscitation and Stabilization of the Critically Ill Child Derek S. Wheeler, Hector R. Wong, Thomas P. Shanley, 2008-12-17

The care of the critically ill or injured child begins with timely prompt and aggressive resuscitation and stabilization. Ideally, stabilization should occur before the onset of organ failure in order to achieve the best possible outcomes. In the following pages, an international panel of experts provides an in-depth discussion of the early recognition, resuscitation, and stabilization of the critically ill or injured child. Once again, we would like to dedicate this textbook to our families and to the physicians and nurses who provide steadfast care every day in pediatric intensive care units across the globe. Derek S. Wheeler, Hector R. Wong, Thomas P. Shanley. V. Preface to *Pediatric Critical Care Medicine: Basic Science and Clinical Evidence*. The field of critical care medicine is growing at a tremendous pace, and tremendous advances in the understanding of critical illness have been realized in the last decade. My family has benefited from some of the technological and scientific advances made in the care of critically ill children. My son Ryan was born during my third year of medical school. By some peculiar happenstance, I was nearing completion of a 4-week rotation in the newborn intensive care unit (NICU). The head of the pediatrics clerkship was kind enough to let me have a few days off around the time of the delivery. My wife Cathy was 2 weeks past her due date and had been scheduled for elective induction.

Stabilization and Transport of the Critically Ill Neil S. Morton, 1997. Aims to define the knowledge base required by the trainee and practising intensivist in the transport of the critically ill. The topics covered in the text include the principles of safe transport, preparation for transport, monitoring and equipment, and the perinatal patient in transport.

Comprehensive Pediatric Hospital Medicine Lisa B. Zaoutis, Vincent W. Chiang, 2007-01-01. This new comprehensive reference not only brings readers the most up-to-date evidence-based approaches to hospital-based pediatric care but also covers issues related to staffing a unit, financial, legal, and ethical practices, and how to maintain effective communication between referring providers and consulting staff.

Principles in the Stabilization and Transport of Critically Ill Children Byron Y. Aoki, 1984. **Pediatric Critical Care Medicine** Derek S. Wheeler, Hector R. Wong, 2007. This new textbook is the definitive evidence-based resource for pediatric critical care. It is the first ostensibly evidence-based pediatric critical care textbook and will prove an invaluable resource for critical care professionals across the globe.
