particularly on buffer stocks Simultaneously the issue clearly advanced in priority on the political agenda such that the United Nations Conference on Trade and Development UNCTAD proposed an Integrated Program for Commodities IPC intended to stabilize the world market prices of ten so called core commodities UNCTAD 1974 1976a Behrman 1979 Many developing nations welcomed the IPC almost enthusiastically but it did not receive more than lukewarm support by major industrialized countries apparently due to the experience with some thirty international commodity agreements past World War II² Critical evaluations have among others been presented by McNicol 1978 Gordon Ashworth 1984 and Macbean Nguyen 1987 The most detailed of these studies is Gordon Ashworth's who concludes that on balance the performance of international commodity agreements has been too unreliable and their distributive effects too uneven to secure the development goals that have been set 1984 p 284 3 Consequently the IPC turned out to be quite controversial a topic on the UNCTAD's 1976 meeting in Nairobi and has not been able to gain any impetus since I These were cocoa coffee copper cotton jute rubber sisal sugar tea and tin
