The book demonstrates how staff development needs to be based on modern theories of organizational learning aligning itself with institutional and departmental needs as well as the wants and needs of individual staff The book takes a broad definition of staff development and seeks to cover all aspects of the academic role and the interests of all staff The traditional focus on teaching and learning is covered but not to the exclusion of other aspects or the interface between different roles In order to achieve a strategic focus authors are drawn from a range of backgrounds including senior staff with strategic leadership roles The book is therefore directed to a wider readership than the community of staff development professionals and designed partly to challenge the dominant discourse and established priorities of staff developers Towards Strategic Staff Development in Higher Education seeks to combine scholarly review of relevent literature with practical strategies and suggestions for the intended readership principally senior staff heads of department and staff development professionals **Enhancing Teaching and Learning With Socratic** Educational Strategies: Emerging Research and Opportunities Giuseffi, Frank G., 2022-02-04 Traditionally understood as an ancient teaching method conceived by the philosopher Socrates scholars in education have boldly explored the definitions philosophical underpinnings assumptions and uses of Socratic dialogue in various learning situations and educational settings Despite its ancient origins the Socratic Method has an impact on contemporary leadership critical thinking skills e learning adult education and social emotional learning Enhancing Teaching and Learning With Socratic Educational Strategies Emerging Research and Opportunities presents scholarly work philosophical investigations
