Conquest David Day,2008-03-27 The history of the world has been the history of peoples on the move as they occupy new lands and establish their claims over them Almost invariably this has meant the violent dispossession of the previous inhabitants David Day tells the story of how this happened the ways in which invaders have triumphed and justified conquest which as he shows is a bloody and often prolonged process that can last centuries

Collecting

Evolution Matthew J. James, 2017-03-01 In 1905 eight men from the California Academy of Sciences set sail from San Francisco for a scientific collection expedition in the Galapagos Islands and by the time they were finished in 1906 they had completed one of the most important expeditions in the history of both evolutionary and conservation science. These scientists collected over 78 000 specimens during their time on the islands, validating the work of Charles Darwin and laying the groundwork for foundational evolution texts like Darwin's *Finches*. Despite its significance, almost nothing has been written on this voyage, lost amongst discussion of Darwin's trip on the *Beagle* and the writing of David Lack. In *Collecting Evolution*, author Matthew James finally tells the story of the 1905 Galapagos expedition. James follows these eight young men aboard the Academy to the Galapagos and back and reveals the reasons behind the groundbreaking success they had. A current Fellow of the California Academy of Sciences, James uses his access to unpublished writings and photographs to provide unprecedented insight into the expedition. We learn the voyagers' personal stories and how, for all the scientific progress that was made, just as much intense personal drama unfolded on the trip. This book shares a watershed moment in scientific history, crossed with a maritime adventure. There are four tangential suicides and controversies over credit and fame. *Collecting Evolution* also explores the personal lives and scientific context that preceded this voyage, including what brought Darwin to the Galapagos on the *Beagle* voyage seventy years earlier. James discusses how these men thought of themselves as collectors before they thought of themselves as scientists and the implications this had on their approach and their results. In the end, the voyage of the Academy proved to be crucial in the development of evolutionary science as we know it. It is the longest expedition in Galapagos history and played a critical role in cementing Darwin's legacy. *Collecting Evolution* brings this extraordinary story of eight scientists and their journey to life.
