Stalins Ocean Going Fleet Soviet Naval Strategy And Shipbuilding Programs 1935 1953:

Stalin's Ocean-going Fleet: Soviet Jurgen Rohwer,2017-07-05 In this work two senior naval historians analyze the discussions held in leading Soviet political military and naval circles concerning naval strategy and the decisions taken for warship building programmes They describe the reconstitution of the fleet under difficult conditions from the end of the Civil War up to the mid 1920s leading to a change from classical naval strategy to a Jeune ecole model in the first two Five Year Plans including efforts to obtain foreign assistance in the design of warships and submarines Their aim is to explain the reasons for the sudden change in 1935 to begin building a big ocean going fleet After a period of co operation with Germany from 1939 41 the plans came to a halt when Hitler attacked the Soviet Union in 1941 Finally this work covers the reopening of the naval planning processes in 1944 and 1945 and the discussions of the naval leadership with Stalin the party and government officials about the direction of the new building programmes as the Cold War began *Stalin's Ocean-going Fleet* Mikhail Monakov,Jurgen Rohwer,2012-11-12 A study of the development of strategic concepts in Stalin s Navy in the context of his foreign defence policy using original archival documents translated from the Russian **Stalin's Ocean-going Fleet** Jürgen Rohwer,Mikhail S. Monakov,2001 A study of the development of strategic concepts in Stalin s Navy in the context of his foreign defence policy using original archival documents translated from the Russian **The Merchant Marine in International Affairs, 1850-1950** S W Field,K G Swift,2014-02-25 Providing an understanding of what is meant by quality and its unique position in a manufacturing environment to improve competitive business performance this text defines all the fundamental ingredients required to introduce an improvement in quality Concise and easy to read the theory is backed up by numerous industrial experiences illustrating the practical obstacles when implementing any quality change Focusing on the essentials of quality strategies principles and techniques designing for quality is also discussed and new techniques for assessing the risks and costs of non conformance are introduced The result is an insight to quality engineering that will prove invaluable to engineering students and professionals The Merchant Marine in International Affairs, 1850-1950 Greg Kennedy,2014-07-10 Merchant navies represent economic and industrial strength This study revises the definition of maritime power through a more comprehensive understanding and appreciation for the roles played by the merchant marine of a nation *European Navies and the Conduct of War* Carlos Alfaro-Zaforteza,Alan James,Malcolm H Murfett,2018-07-17 *European Navies and the Conduct of War* considers the different contexts within which European navies operated over a period of 500 years culminating in World War Two the greatest war ever fought at sea Taking a predominantly continental point of view the book moves away from the typically British centric approach taken to naval history as it considers the role of European navies in the development of modern warfare from its medieval origins to the large scale industrial total war of the twentieth century Along with this growth of navies as instruments of war the book also explores the long rise of the political and popular appeal of navies from the princes of late

medieval Europe to the enthusiastic crowds that greeted the modern fleets of the great powers followed by their reassessment through their great trial by combat firmly placing the development of modern navies into the broader history of the period Chronological in structure *European Navies and the Conduct of War* is an ideal resource for students and scholars of naval and military history

Imperial Defence, 1868-1887 John Beeler, 2014-02-25 The technical transformation of the Royal Navy during the Victorian era posed many design tactical and operational problems for administrators from the 1830s onwards The switch from sail to steam required the creation of a system of defended coaling stations and a greater infrastructure

The USA in the Making of the USSR Paul Dukes, 2004 The USA's contribution to the making of the USSR was accidental In the belief that the Russian Socialist Federative Soviet Republic could not survive American statesmen strove to keep the former Tsarist empire intact for a non communist successor regime in the face of attempts by other powers to carve out spheres of influence in both European and Asiatic Russia In this manner they unwittingly facilitated the formation of the Union of Soviet Socialist Republics This book shows the importance of the Russian question at the Washington Conference and throws light on the emergence of the Versailles Washington system of international relations

Honest Errors? Combat Decision-Making 75 Years After the Hostage Case Nobuo Hayashi, Carola Lingaas, 2023-10-03 This book marks the 75th anniversary of the 1948 Hostage Case in which a US military tribunal in Nuremberg acquitted General Lothar Rendulic of devastating Northern Norway on account of his honest factual error The volume critically reappraises the law and facts underlying his trial the no second guessing rule in customary international humanitarian law IHL that is named after the general himself and the assessment of modern battlefield decisions Using recently discovered documents this volume casts major doubts on Rendulic's claim that he considered the region's total devastation and the forcible evacuation of all of its inhabitants imperatively demanded by military necessity at the time This book's analysis of court records reveals how the tribunal failed to examine relevant facts or explain the Rendulic Rule's legal origin This anthology shows that despite the Hostage Case's ambiguity and occasional suggestions to the contrary objective reasonableness forms part of the reasonable commander test under IHL and the mistake of fact defence under international criminal law ICL to which the rule has given rise This collection also identifies modern warfare's characteristics human judgment de empathetic battlespace and institutional bias that may make it problematic to deem some errors both honest and reasonable The Rendulic Rule embodies an otherwise firmly established admonition against judging contentious battlefield decisions with hindsight Nevertheless it was born of a factually ill suited case and continues to raise significant legal as well as ethical challenges today The most comprehensive study of the Rendulic Rule ever to appear in English this multi disciplinary anthology will appeal to researchers and practitioners of IHL and ICL as well as military historians and military ethicists and offers ground breaking new research Nobuo Hayashi is affiliated to the Centre for International and Operational Law at the Swedish Defence University in Stockholm Sweden Carola Lingaas is affiliated to the Faculty of Social

Studies at VID Specialized University in Oslo Norway
