Stand Contending Ideas And Opinions Crime And Criminology:

Stand! Crime and Criminology, 2000 **The Standing of Victims in the Procedural Design of the International Criminal Court** Tatiana Bachvarova, 2017-05-08 This book canvasses the autonomous position of victims before the International Criminal Court. It seeks to provide an objective and balanced perspective and neither rejects the idea of victims participation nor seeks to extend it beyond the contours determined by the founders of the ICC. The author contributes to the existing debate in academia and in practice by delineating the core most complex and contentious matters ensuing from the role assigned to victims. The scrupulously selected issues unveil and blueprint the essential characteristics that delimit the standing of victims as independent actors in the ICC's arena distinct from the parties and other non party participants. As an integral part of the ICC's synergy, victims converge and interact with its other components. Therefore the position and role of victims are contemplated in the context of the Court's procedural mechanism and the mission pursued by the parties and the Chamber. The philosophy underpinning the ICC's design and the standing of victims therein also requires analysis from a wider perspective. Accordingly the volume draws an in depth parallel with relevant developments and trends at the international and domestic level. Close attention is paid to the legal instruments and jurisprudence of internationalized criminal justice bodies, human rights institutions and non criminal jurisdictions to the extent useful for shedding further light on the issues at hand. Recourse is also made to various national systems whenever relevant. The Journal of Criminal Law, Criminology and Police Science, 1912 *The Handbook of Measurement Issues in Criminology and Criminal Justice* Beth M. Huebner, Timothy S. Bynum, 2016-04-28 This volume of the series was designed to provide a comprehensive primer on the existing best practices and emerging developments in the study and design research on crime and criminology. The work as a whole includes chapters on the measurement of criminal typologies, the offenders, offending and victimization, criminal justice organizations and specialized measurement techniques. Each chapter is written by experts in the field and they provide an excellent survey of the literature in the relevant area. More importantly each chapter provides a description of the various methodological and substantive challenges presented in conducting research on these issues and denotes possible solutions to these dilemmas. An emphasis was placed on research that has been conducted outside of the United States and was designed to give the reader a broader more global understanding of the social context of research. The goal of this volume is to provide a definitive reference for professionals in the field, researchers and students. This volume in the Handbooks in Criminology and Criminal Justice series identifies the principal topical areas of research in this field and summarizes the various methodological and substantive challenges presented in conducting research on these issues. In each chapter authors provide a summary of the prominent data collection efforts in the topical area, provide an overview of the current methodological work, discuss the challenges in the measurement of central concepts in the subject area and identify new horizons emerging in data collection and measurement. We encouraged authors to discuss work conducted in an international

context and to incorporate discussion of qualitative methodologies when appropriate Criminal Justice Review ,1998
