Ritchie,2023-04-25 A human and global take on a beloved vacation spot The crash of surf smell of salted air wet whorls of sand underfoot These are the sensations of the beach that environment that has drawn humans to its life sustaining shores for millennia And while the gull's cry and the cove's splendor have remained constant throughout time our relationship with the beach has been as fluid as the runnels left behind by the tide's turning The Lure of the Beach is a chronicle of humanity's history with the coast taking us from the seaside pleasure palaces of Roman elites and the aquatic rituals of medieval pilgrims to the venues of modern resort towns and beyond Robert C Ritchie traces the contours of the material and social economies of the beach throughout time covering changes in the social status of beachgoers the technology of transport and the development of fashion from nudity to Victorianism and back again as well as the geographic spread of modern beach going from England to France across the Mediterranean and from nineteenth century America to the world And as climate change and rising sea levels erode the familiar faces of our coasts we are poised for a contemporary reckoning with our relationship and responsibilities to our

beaches and their ecosystems The Lure of the Beach demonstrates that whether as a commodified pastoral destination a site of ecological resplendency or a flashpoint between private ownership and public access the history of the beach is a human one that deserves to be told now more than ever before

The Human Shore John R. Gillis, 2022-12-22 Since before recorded history people have congregated near water But as growing populations around the globe continue to flow toward the coasts on an unprecedented scale and climate change raises water levels our relationship to the sea has begun to take on new and potentially catastrophic dimensions The latest generation of coastal dwellers lives largely in ignorance of the history of those who came before them the natural environment and the need to live sustainably on the world's shores Humanity has forgotten how to live with the oceans In *The Human Shore* a magisterial account of 100 000 years of seaside civilization John R. Gillis recovers the coastal experience from its origins among the people who dwelled along the African shore to the bustle and glitz of today's megacities and beach resorts He takes readers from discussion of the possible coastal location of the Garden of Eden to the ancient communities that have existed along beaches bays and bayous since the beginning of human society to the crucial role played by coasts during the age of discovery and empire An account of the mass movement of whole populations to the coasts in the last half century brings the story of coastal life into the present Along the way Gillis addresses humankind's changing relationship to the sea from an environmental perspective laying out the history of the making and remaking of coastal landscapes the creation of ports the draining of wetlands the introduction and extinction of marine animals and the invention of the beach while giving us a global understanding of our relationship to the water Learned and deeply personal *The Human Shore* is more than a history it is the story of a space that has been central to the attitudes plans and existence of those who live and dream at land's end

Where Land Meets Sea Anna Ryan, 2016-02-11 Drawing together philosophical empirical and academic thinking this book focuses on generating awareness of the relationship forged between self and surroundings It details research undertaken at two coastal sites the South Wall in Dublin city and the Maharees peninsula in Co Kerry Ireland Sixty two participants were engaged in photography and drawing to enable this exploration of spatial experience The participants' photographs and drawings present how spatial sensibilities can be revealed by becoming more attentive to the immediacy of bodily knowledge our more than cognitive experience Their communications resonate with the philosophers and theorists considered including Merleau Ponty Edward Casey Gilles Deleuze Dalibor Vesely and contemporary cultural geographers From exploring the experienced spatiality of the meeting of land and sea this book begins to suggest an alternative politics of the coast
