Agenda was relaunched in 2005 with a greater focus on the key economic priorities of more growth and jobs. Also all Member States are now required to produce an annual National Action Plan highlighting the policies being pursued to improve economic growth and increase employment. The Committee sets out a number of recommendations to further push forward the priorities of growth and jobs including that the Commission should seek to complete the progress towards an internal market that Member States should influence one another in the development of good practice through statistical comparison of their economic progress and agree on quantifiable targets that the format of the National Action Plans should include not only the successes but where countries are underperforming that the Agenda be given a higher public profile. **Creating a**

Campus-Wide Culture of Student Success Ronald E. Hallett, Adrianna Kezar, Joseph A. Kitchen, Rosemary J.

Perez, 2023-10-23 Offering a new approach to institutional practices this book describes evidence based strategies to create a campus culture conducive to truly supporting all students. We are at a critical crossroads in higher education where large numbers of low income racially minoritized and first generation college students referred to in this book as at promise students are attending college in greater numbers than ever yet access has not translated to significantly improved retention and graduation rates. This book therefore proposes a realignment of existing initiatives to create campus wide support through a new model of coordination. The ideas presented in this book are the culmination of one of the largest studies of comprehensive college support programs for at promise students. Chapters include illustrations of the key concepts and promising practices of the Promoting At promise Student Success PASS Project as well as guiding questions that can be used to facilitate conversations on campus. In this helpful resource the authors address how student supports are delivered in validating ways rather than focusing solely on what supports are offered as has typically been the way institutions address the issues that at promise students face. This book is intended to provide guidance and support to educators who want to be a part of changing how higher education supports at promise students toward increased equity. **Professional Engineer**, 1928
