The Korean Economic Developmental Path S.

Lew, 2013-12-17 This book defines the Korean development as the moral economy of growth derived from a synergy between strong state and strong society and argues that Confucian cultural orientation has played a critical role in the process

Market and Society in Korea Dennis McNamara, 2003-09-02 The first comprehensive review of the past and present of a leading sector the volume offers a new interpretation of society and market in South Korea The Rise of East Asia Mark Berger, Douglas Borer, 2002-09-11 There is great interest in the Pacific Century and what its implications for the future will be The rapid economic growth of East Asia was already setting the region apart from the rest of the world by the 1970s By the 1980s the trend was seen to have spread southward to Thailand Malaysia and Indonesia while China's provinces had also become integral to the regional economic boom In this exciting new study many of the ideas and expectations associated with the Pacific Century are placed under critical scrutiny The book includes studies of particular countries such as China Japan South Korea Vietnam Indonesia and Malaysia There is analysis of economic and political trends in the region the reasons behind its rise and its importance on a global scale The rise of East Asia represents an historic turning point with immense significance world wide This book will be of interest to anyone concerned about the new approaches to and the debate about the rise of east Asia and the coming of the Pacific Century Soldiers on the Cultural Front Tatiana Gabroussenko, 2010-07-26 An understanding of contemporary North Korea's literature is virtually impossible without an investigation of its formative period 1945 1960 which saw a gradual transformation from the initial Soviet era to a Korean version of national Stalinism This turbulent epoch established a long lasting framework for North Korean literature and set up an elaborate system of political control over literary matters as well as over the people who served in this field In 1946 Democratic People's Republic of Korea DPRK leader Kim Il Sung described the country's writers as soldiers on the cultural front thus clearly defining what the nascent Communist regime expected from its intellectuals As a result many literary

nonentities were rewarded with fame and success often only to be relegated once again to obscurity within a few years while many outstanding luminaries of the past were erased from the pages of official publications or even lost their lives The Soviet cultural impact brought new tropes artistic images and rhetoric which were quickly absorbed into the North Korean discourse However the cultural politics of the DPRK and the USSR revealed profound and irreconcilable disparities that were rooted in the different political conditions and traditions of each country Soldiers on the Cultural Front presents the first consistent research on the early history of North Korea s literature and literary policy in Western scholarship It traces the introduction and development of Soviet organized conventions in North Korean literary propaganda and investigates why the romance with Moscow was destined to be short lived It reconstructs the biographies and worldviews of major personalities who shaped North Korean literature and teases these historical figures out of popular scholarly myth and misconception The book also investigates the specific forms of control over intellectuals and literary matters in North Korea Considering the unique phenomenon of North Korean literary critique the author analyzes the political campaigns and purges of 1947 1960 and investigates the role of North Korean critics as political executioners in these events She draws on an impressive variety and number of sources ranging from interviews with Korean and Soviet participants public and family archives and memoirs to original literary and critical texts to present a balanced and eye opening work that will benefit those interested in not only understanding North Korean literature and society but also rethinking forms of socialist modernity elsewhere in the world

Witt, 2007-12-06 Much has been said about the re emergence of China to its historical position of eminence in the world economy yet little is understood about the kind of economic system China is evolving What are the rules of the game of business in today s China and how are they likely to change over the next decades The answers to these questions are crucial to business persons formulating strategy toward China but also for policy makers

concerned with retaining the competitiveness of their nations in the face of Chinese competition and for researchers seeking to gain deeper insights into the workings of economic systems and institutional change Written by two leading experts in the field this book sheds much needed light on these questions Building on recent conceptual and empirical advances and rich in concrete examples it offers a comprehensive and systematic exploration of present day Chinese capitalism its component parts and their interdependencies It suggests that Chinese capitalism as practiced today in many respects represents a development from traditional business practices whose revival has been greatly aided by the influx of investments and managerial talent from the Regional Ethnic Chinese On the basis of present trends in the Chinese economy as well as through comparison with four major types of capitalism those of Germany Japan Korea and the United States the book derives a prediction of the probable development paths of Chinese capitalism and its likely competitive strengths and Mafioso, Big Business and the Financial Crisis Ingyu Oh, 2018-12-21 First published in 1999 this book weaknesses explores the question of is the business organisation a result of efficiency or is it a result of a state business organisation a result of a state business interaction This question being in the context of the Korean chaebol system and the Japanese Keiretsu system this book explores the political and economic growth and then the following down fall of these systems occurred without rupturing either country's state policy regarding the chaebol or the keiretsu Human Rights in Korea William Shaw, 2020-10-26 These chapters by eight Korea specialists present a new approach to human rights issues in Korea Instead of using an external and purely contemporary standard the authors work from within Korean history treating the successive phases of Korea's modern century to examine the uneasy fate of human rights and some of the ideas of human rights as they have developed in the Korean context Beginning with the Independence Club of the late nineteenth century and continuing through to the constitutional and judicial structures underlying the Sixth Republic Government of Roh Tae Woo in South Korea these papers illuminate the sometimes complex interactions between modern Korean human rights issues and the legacies of Korean culture and colonial occupation The final sections deal with the usefulness and appropriateness of U S policies toward human rights in South Korea and comparatively with the overall issues raised in the Emergent Economies, Divergent Paths Robert C. Feenstra, Gary G. Hamilton, 2006-03-27 The economies of volume South Korea and Taiwan in the second half of the twentieth century are to scholars of economic development what the economy of Britain in the late eighteenth and early nineteeth centuries is to economic historians This book first published in 2006 is a collaboration between a leading trade economist and a leading economic sociologist specializing in East Asia and offers an explanation of the development paths of post World War II Korea and Taiwan The ambitions of the authors go beyond this however They use these cases to reshape the way economists sociologists and political scientists will think about economic organization in the future They offer nothing less than a theory of and extended evidence for how capitalist economies become organized One of the principal empirical findings is that a primary cause for the industrialization of East

Synott, 2017-11-22 This title was first published in 2003 In the globalizing world South Korea is widely regarded as a model example of how a school education system can enhance national economic development Similar claims are made for other Asian NICs such as Taiwan However less understood is how the education system in South Korea became a site of intense conflict as in the decade from 1989 99 a large movement of teachers battled with the government over development related issues such as democratic reforms and human rights in schooling in a struggle that divided this education oriented society and at times plunged the nation's schools into chaos This book analyses the emergence of the National Teachers Union of Korea Chunkyojo and traces its struggle for educational reforms The book examines the South Korean education system within national and global contexts and the historical experiences that have shaped the modern nation such as its Confucianist history its experiences of colonialism and the legacy of the Cold War conflict with North Korea As South Korea searches for pathways for reunification economic growth and the consolidation of democratic civil society important new perspectives on the role of education emerge through this analysis of the teachers social movement This book also presents separate chapters on teacher movements in Taiwan and the Philippines that provide interesting comparisons to the South Korean case while revealing the distinctive political and historical experiences that have shaped education in these societies and the emergence of reformist teacher movements In a valuable appendix the author discusses methodological and theoretical aspects of the research in this book Technological Capabilities and Export Success in Asia Dieter Ernst, Tom Ganiatsos, Lynn Mytelka, 2003-09-02 What accounts for export success A team of international contributors show that learning and capability formation are critical to sustain competitiveness Through a series of case studies of firms in the textile and garment and electronics industries of five Asian economies Korea Taiwan Thailand Indonesia and Vietnam Technological Capabilities and Export Success in Asia demonstrates that cheap labour combined with currency devaluation is no longer sufficient for export success East Meets West Kyong-Dong Kim, Hyun-Chin Lim, 2007-07-30 Over the past few decades East Asia developments in terms of production population and trade have shown remarkable dynamics Ensuing changes in these regions of non Western civilization are commonly interpreted in terms of a successful adaptation of modernity However experiences such as the regional crisis in 1997 and the tragic incident of September 2001 more than ever ask for more intensive civilizational dialogues and urge us to carefully
