The Lamp Of Experience:

The Lamp of Experience H. Trevor Colbourn, 1998 In a landmark work a leading scholar of the eighteenth century examines the ways in which an understanding of the nature of history influenced the thinking of the founding fathers As Jack P Greene has observed The Whig conception saw the past as a continual struggle between liberty and virtue on one hand and arbitrary power and corruption on the other Many founders found in this intellectual tradition what Josiah Quincy Jr called the true old English liberty and it was this Whig tradition this conception of liberty that the champions of American independence and crafters of the new republic sought to perpetuate Colbourn supports his thesis that Independence was in large measure the product of the historical concepts of the men who made it by documenting what books were read most widely by the founding generation He also cites diaries personal correspondence newspapers and legislative records Trevor Colbourn is President Emeritus of the University of Central Florida

The Fall of Language Alexander Stern, 2019-04-08 In the most comprehensive account to date of Walter Benjamin s philosophy of language Alexander Stern explores the nature of meaning by putting Benjamin in dialogue with Wittgenstein Known largely for his essays on culture aesthetics and literature Walter Benjamin also wrote on the philosophy of language This early work is famously obscure and considered hopelessly mystical by some But for Alexander Stern it contains important insights and anticipates in some respects surpasses the later thought of a central figure in the philosophy of language Ludwig Wittgenstein As described in The Fall of Language Benjamin argues that language as such is not a means for communicating an extra linguistic reality but an all encompassing medium of expression in which everything shares Borrowing from Johann Georg Hamann s understanding of God s creation as communication to humankind Benjamin writes that all things express meanings and that human language does not impose meaning on the objective world but translates meanings already extant in it He describes the transformations that language as such undergoes while making its way into human language as the fall of language This is a fall from names language that responds mimetically to reality to signs that designate reality arbitrarily While Benjamin s approach initially seems alien to Wittgenstein s both reject a designative understanding of language both are preoccupied with Russell s paradox and both try to treat what Wittgenstein calls the bewitchment of our understanding by means of language Putting Wittgenstein s work in dialogue with Benjamin s sheds light on its historical provenance and on the turn in Wittgenstein s thought Although the two philosophies diverge in crucial ways in their comparison Stern finds paths for understanding what language is and what it does

Race and U.S. Foreign Policy from Colonial Times Through the Age of Jackson E. Nathaniel Gates, 2021-12-24 First published in 1998 Explores the concept of race The term race which originally denoted genealogical or class identity has in the comparatively brief span of 300 years taken on an entirely new meaning In the wake of the Enlightenment it came to be applied to social groups This ideological transformation coupled with a dogmatic insistence that the groups so designated were natural and not socially created gave birth to the modern

notion of races as genetically distinct entities The results of this view were the encoding of race and racial hierarchies in law literature and culture How racial categories facilitate social control The articles in the series demonstrate that the classification of humans according to selected physical characteristics was an arbitrary decision that was not based on valid scientific method They also examine the impact of colonialism on the propagation of the concept and note that racial categorization is a powerful social force that is often used to promote the interests of dominant social groups Finally the collection surveys how laws based on race have been enacted around the world to deny power to minority groups A multidisciplinary resource This collection of outstanding articles brings multiple perspectives to bear on race theory and draws on a wider range of periodicals than even the largest library usually holds Even if all the articles were available on campus chances are that a student would have to track them down in several libraries and microfilm collections Providing of course that no journals were reserved for graduate students out for binding or simply missing This convenient set saves students substantial time and effort by making available all the key articles in one reliable source Bureau of Marine
