culture of Spain from 1400 to 1600 the unfolding narrative charts the country's shifts from one age to the next It unveils patterns of everyday life from the court to the brothel from the haves of the aristocracy and clergy to the have nots of the peasantry and the urban poor Historical records illuminate details of Spanish society such as the transition from medieval festivities to the highly scripted spectacles of the early modern period the reasons for violence and popular resistance and the patterns of daily living eating dressing religious beliefs and concepts of honour and sexuality This compelling account includes historical examples and literary extracts which allow the reader direct access to the period From the street theatre of village carnivals to the oppressive Spanish Inquisition it gives an abiding sense of Spain in the making and renders vivid the colours of a passionate history

Sacred Landscapes in Antiquity Ralph Haussler, Gian Franco Chiai, 2020-07-31

From generation to generation people experience their landscapes differently Humans depend on their natural environment it shapes their behavior while it is often felt that deities responsible for both natural benefits and natural calamities such as droughts famines floods and landslides need to be appeased We presume that in many societies lakes rivers rocks mountains caves and groves were considered sacred Individual sites and entire landscapes are often associated with divine actions mythical heroes and etiological myths Throughout human history people have also felt the need to monumentalize their sacred landscape But this is where the similarities end as different societies had very different understandings beliefs and practices The aim of this new thematic appraisal is to scrutinize carefully our evidence and rethink our methodologies in a multi disciplinary approach More than 30 papers investigate diverse sacred landscapes from the Iberian peninsula and Britain in the west to China in the east They discuss how to interpret the intricate web of ciphers and symbols in the landscape and how people might have experienced it We see the role of performance ritual orality textuality and memory in people's sacred landscapes A diachronic view allows us to study how landscapes were rewritten adapted and redefined in the course of time to suit new cultural political and religious understandings not to mention the impact of urbanism on people's understandings A key question is how was the landscape manipulated transformed and monumentalized especially the colossal investments in monumental architecture we see in certain socio historic contexts or the creation of an alternative humanmade seemingly non natural landscape with perfectly astronomically aligned buildings that define a cosmological order Sacred Landscapes therefore aims to analyze the complex links between landscape religiosity and society developing a

dialectic framework that explores sacred landscapes across the ancient world in a dynamic holistic contextual and historical perspective **Negotiating Past and Present** David Thatcher Gies,1997 *Re-Imagining Resilient Productive*

Landscapes Carla Brisotto,Fabiano Lemes de Oliveira,2022-03-09 This book explores how lessons from past urban planning experiences can inform current debates on urban agriculture Productive landscapes today have been posited as instruments for the positive transformation related to territorial fragility and abandonment promoting social cohesion food security and wider environmental and economic benefits The book will re map the way in which seeming landscape limitations and challenges can be turned into potential innovation and a new lease of urban rural life It does so by drawing on significant past urban agricultural experiences in planning as vectors for new critical reflections relevant to re igniting ideas for future envisioning of urban scenarios in which productive landscapes play fundamental transformative roles The focus is on planning ideas and the roles of key individual planners all of which have designed agricultural strategies for the city at some point in their careers It intends to help us today reimagine urban rural relationships and the transformation of under or mis used urban open spaces peri urban areas fringe conditions and in between spaces Campos de Castilla Antonio Machado,2002 Antonio Machado was born in Seville in 1885 and died in southern France early in 1939 escaping from the Nationalist advance in the Spanish Civil War He is increasingly recognized as one of the four greatest Spanish language poets of the twentieth century but lack of adequate translations has limited his appreciation in the English speaking world Here a native Spanish and a native English speaker set out to remedy this deficiency The beauty of his landscape fused with its sadness as his young wife s resting place gave Machado his distinctive voice intimate elegiac at once detached and involved most characteristically expressed in Campos de Castilla 1917 from which many of the poems here selected are taken The language of his poetry is spare relying strongly on nouns and adjectives asserting more than describing equally anti baroque and against the excesses of modern cosmetics Self Portrait His father had been a collector of folklore and Machado saw the romance ballad tradition as lying at the heart of the authentic Spanish poetic tradition English cannot recreate the assonance on which he relied but this translation captures the essential rhythm as well as the poignancy of the original Spanish text with facing page translation introduction and notes **Encyclopedia of World Writers, 1800 to the Present** Marie Diamond,2020-07-01 In recent years schools have started introducing more inclusive syllabi emphasizing the works and ideas of previously overlooked or underrepresented writers Readers of all ages can now explore the rich contributions of writers from around the world These writers have various backgrounds and unlike most writers from the U S or the United Kingdom information on them in English can be difficult to find Encyclopedia of World Writers 1800 to the Present covers the most important writers outside of the U S Britain and Ireland since 1800 More than 330 insightful A to Z entries profile novelists poets dramatists and short story writers whose works are anthologized in textbooks or assigned in high school English classes Entries range in length from 200 to 1 000 words each and include a biographical sketch synopses of major

works and a brief bibliography. Dozens of entries are new to this edition and many existing entries have been updated and significantly expanded with new Critical Analysis sections. Coverage includes Chinua Achebe, Margaret Atwood, Roberto Bolaño, Albert Camus, Khalid Hosseini, Victor Hugo, Mohammad Iqbal, Franz Kafka, Stieg Larsson, Mario Vargas Llosa, Naghib Mahfouz, Gabriel García Márquez, Kenzaburo Oe, Marcel Proust, Leo Tolstoy, Emile Zola, and more.

The Poetry of Antonio Machado Xon de Ros, 2015. This book offers a much needed reappraisal of a major twentieth century Spanish poet, Antonio Machado (1875-1939), offering compelling arguments why his poetry should have a more vital profile not only within the precincts of Hispanism but also alongside the most significant twentieth century poets of Europe and America, seeking to open up new perspectives for the interpretation of his poetry. The unifying concepts as the title suggests are landscape and transformation. Landscape, a topic barely broached in Spanish poetry before Machado, is a central thematic concern in his poetry.

Landscapes and the Augustan Revolution Sergio España-Chamorro, María del Carmen Moreno Escobar, 2025-07-09. This book centres on the transformation of landscapes focusing on the Western Mediterranean during the end of the Roman Republic and the Early Roman Empire. This volume brings together diverse contributions that utilise both theoretical and practical approaches from landscape studies and archaeology to examine the transitions to the Empire in the provincial landscapes of the western Roman Empire. Focusing on wider processes of change and continuity identified through diverse approaches, e.g. settlement patterns, mobility and communication, and military expansion, and methods, e.g. spatial analysis, remote sensing, and GIS, the contributions highlight the profound socio-economic, political, and environmental factors whose interplay shaped the region. In doing so, the book underscores the agency of local communities in shaping their landscapes and their varied responses to Imperial policies, thus generating new insights into the processes of social and political change brought about by Augustan reforms and how these were implemented and experienced at the local level. This book will be of interest to students and researchers of archaeology and ancient history, particularly those focused on Roman and landscape archaeology.

European Landscapes of Rock-Art Christopher Chippindale, George Nash, 2003-09-02. Rock art, the ancient images which still scatter the rocky landscapes of Europe, is a singular kind of archaeological evidence. Fixed in place, it does not move about as artefacts or trade objects do. Enigmatic in its meaning, it uniquely offers a direct record of how prehistoric Europeans saw and envisioned their own worlds. *European Landscapes of Rock Art* provides a number of case studies covering a range of European locations including Ireland, Italy, Scandinavia, Scotland, and Spain, which collectively address the chronology and geography of rock art, as well as providing an essential series of methodologies for future debate. Each author provides a synthesis that focuses on landscape as an essential part of rock art construction. From the paintings and carved images of prehistoric Scandinavia to Second World War graffiti on the German Reichstag, this volume looks beyond the art to the society that made it. The papers in this volume also challenge the traditional views of how rock art is recorded. Throughout, there is an emphasis on informal and informed methodologies. The authors skilfully discuss subjectivity and its

relationship with landscape since personal experience from prehistoric times to the present day plays an essential role in the interpretation of art itself The emphasis is on location on the intentionality of the artist and on the needs of the audience This exciting volume is a crucial addition to rock art literature and landscape archaeology It will provide new material for a lively and greatly debated subject and as such will be essential for academics non academics and commentators of rock art in general

Layered Landscapes Eric Nelson,Jonathan Wright,2017-06-26 This volume explores the conceptualization and construction of sacred space in a wide variety of faith traditions Christianity Hinduism Islam Judaism and the religions of Japan It deploys the notion of layered landscapes in order to trace the accretions of praxis and belief the tensions between old and new devotional patterns and the imposition of new religious ideas and behaviors on pre existing religious landscapes in a series of carefully chosen locales Cuzco Edo Geneva Granada Herat Istanbul Jerusalem Kanchipuram Paris Philadelphia Prague and Rome Some chapters hone in on the process of imposing novel religious beliefs while others focus on how vestiges of displaced faiths endured The intersection of sacred landscapes with political power the world of ritual and the expression of broader cultural and social identity are also examined Crucially the volume reveals that the creation of sacred space frequently involved more than religious buildings and was a work of historical imagination and textual expression While a book of contrasts as much as comparisons the volume demonstrates that vital questions about the location of the sacred and its reification in the landscape were posed by religious believers across the early modern world *The*

The Conservation of Cultural Landscapes Mauro Agnoletti, 2006-10-23 Landscape today is no longer just a cultural aspect intended as an elitist phenomenon but emerges as an essential element in the definition and the application of a modern approach in sustainable development Historical locally adapted distinctive and ingenious combinations of management practices have contributed and continue to contribute tremendously to the biodiversity of the world resulting not only in outstanding aesthetic beauty but in the sustained provision of multiple goods and services food and livelihood security and quality of life The development of policies to preserve and manage landscape resources has to face both the degradation of cultural landscape due to socio economic development and the need to develop appropriate methods and approaches This book presents different methodologies developed to analyse manage and plan landscape resources It reports recent research findings and case studies from Europe and North America suggesting also the revision of some orientations and views of the current policies concerning forestry rural development and nature conservation often contributing to degrade cultural landscapes

Political Landscapes of the Late Intermediate Period in the Southern Andes Alina Álvarez Larrain, Catriel Greco, 2018-04-18 This book studies the relationship between pukaras and their surrounding landscape focusing on the architectural and settlement variability registered in both contexts It is the outcome of a symposium held at the XIX National Congress of Argentine Archaeology San Miguel de Tucuman August 8 12 2016 entitled Pukaras strategic settlements and dispersed settlements Political landscapes of the Late Intermediate Period in the Southern Andes Based on the topics discussed at the event this book presents nine case studies covering a large geographic area within the Southern Andes northwestern Argentina northern Chile and southern Bolivia and breaking the national barriers that tend to atomize pre Hispanic landscapes The respective chapters cover a wide range of themes from architectural and settlement variability ways to build and inhabit space social segmentation and hierarchy to endemic conflict analysis of accessibility and visibility spatiality and temporality of landscapes as well as new dating This book goes beyond the Late

Intermediate Period LIP analyses from the perspective of fortified settlements and material evidence related to war by placing the focus on how ancient political landscapes were constructed from the relation between the pukaras and other sites as part of the same territory. The methodologies used include pedestrian surveys, photogrammetric surveys with UAVs, unmanned aerial vehicles or drones, topographic and architectural surveys, excavations of households, ceramic and rock art analysis, and spatial analysis with geographic information systems (GISs). Given the numerous thematic interconnections between the contributions, the Editors have organized the chapters geographically, moving from south to north, from the southern valleys of Catamarca Province in Argentina to Lipez in the southern part of the Bolivian Altiplano, passing through the Calchaquí valleys of Catamarca, the puna, and Quebrada de Humahuaca of Jujuy in northwest Argentina, and the Antofagasta region in northern Chile. The book provides valuable new theoretical and methodological perspectives on the study of political landscapes of the Late Intermediate Period in the Southern Andes.
