The Language Of A Work Of Art

Fred Wellington Ruckstuhl

The Language Of A Work Of Art:

The Language of Displayed Art Michael O'Toole, 1994 Drawing on his background as a linguist O Toole analyses in detail a number of major works of art to show how the semiotic approach relates a work's immediate impact to other aspects of our response to it to the scene portrayed to the social intellectual and economic world within which the artist and his or her patrons worked and to our own world It further provides ways of talking about and interrelating aspects of composition technique and the material qualities of the work

Deconstruction and the Work of Art Martta Heikkilä, 2021-07-29 The contemporary idea of the work of art is paradoxically both widely used and often unexamined Therefore we must re evaluate the concept before we can understand what the deconstruction of aesthetics means for thinkers like Jacques Derrida Jean Luc Nancy and Philippe Lacoue Labarthe By examining their analyses of works of visual art and contextualizing their thinking on the matter Martta Heikkilä asserts that the implications of the work of art and the aesthetic apply not only to philosophical questions but also to a broader area Instead of the totality represented by the historical concept of Art poststructuralist thinkers introduce the idea of the radical multiplicity of art and its works From this notion arises the fundamental issue in Derrida and the poststructuralist tradition how can we speak philosophically of art which always exists as singular instances as works In *Deconstruction and the Work of Art* Visual Arts and Their Critique in Contemporary French Thought Heikkilä shows that the deconstructionist notions of art are still influential in the discourses of contemporary art in which artworks proliferate and the concept of work is open ended and expanding This book offers an introduction to the deconstructionist theory of art and brings new perspectives to the complex undecidable relation between philosophy and art

Cognition of the Literary Work of Art Roman Ingarden, 1973 This long awaited translation of *Das literarische Kunstwerk* makes available for the first time in English Roman Ingarden's influential study Though it is interdisciplinary in scope situated as it is on the borderlines of ontology and logic philosophy of literature and theory of language Ingarden's work has a deliberately narrow focus the literary work its structure and mode of existence *The Literary Work of Art* establishes the groundwork for a philosophy of literature i.e. an ontology in terms of which the basic general structure of all literary works can be determined This essential anatomy makes basic tools and concepts available for rigorous and subtle aesthetic analysis

The Work of Art in the Age of Its Technological Reproducibility, and Other Writings on Media Walter Benjamin, 2008-05-31 A series of influential essays on the visual arts that were made possible by machines and the implications for the future of culture

The Gadamer Reader Hans-Georg Gadamer, 2007-11-21 This volume begins with an autobiographical sketch and culminates in a conversation with Jean Grondin that looks back over a lifetime of productive philosophical work

The Total Work of Art in European Modernism David Roberts, 2011-11-15 In this groundbreaking book David Roberts sets out to demonstrate the centrality of the total work of art to European modernism since the French Revolution The total work of art is usually understood as the intention to reunite the arts into the one integrated whole but it

is also tied from the beginning to the desire to recover and renew the public function of art. The synthesis of the arts in the service of social and cultural regeneration was a particularly German dream which made Wagner and Nietzsche the other center of aesthetic modernism alongside Baudelaire and Mallarmé. The history and theory of the total work of art pose a whole series of questions not only to aesthetic modernism and its utopias but also to the whole epoch from the French Revolution to the totalitarian revolutions of the twentieth century. The total work of art indicates the need to revisit key assumptions of modernism such as the foregrounding of the autonomy and separation of the arts at the expense of the countertendencies to the reunion of the arts and cuts across the neat equation of avant-gardism with progress and deconstructs the familiar left-right divide between revolution and reaction, the modern and the antimodern. Situated at the interface between art, religion, and politics, the total work of art invites us to rethink the relationship between art and religion and art and politics in European modernism. In a major departure from the existing literature, David Roberts argues for twin lineages of the total work: a French revolutionary and a German aesthetic which interrelate across the whole epoch of European modernism, culminating in the aesthetic and political radicalism of the avant-garde movements in response to the crisis of autonomous art and the accelerating political crisis of European societies from the 1890s forward.

"Michael Baxandall, Vision and the Work of Words" Robert Williams, 2017-07-05. The most important art historian of his generation is how some scholars have described the late Michael Baxandall (1933-2007). Professor of the Classical Tradition at the Warburg Institute, University of London, and of the History of Art at the University of California, Berkeley, Baxandall's work had a transformative effect on the study of European Renaissance and eighteenth-century art and contributed to a complex transition in the aims and methods of art history in general during the 1970s, 80s, and 90s. While influential, he was also an especially subtle and independent thinker, occasionally a controversial one, and many of the implications of his work have yet to be fully understood and assimilated. This collection of 10 essays endeavors to assess the nature of Baxandall's achievement and, in particular, to address the issue of the challenges it offers to the practice of art history today. This volume provides the most comprehensive assessment of Baxandall's work to date while drawing upon the archive of Baxandall papers recently deposited at the Cambridge University Library and the Warburg Institute.

Art's Emotions Damien Freeman, 2014-09-03. Despite the very obvious differences between looking at Manet's *Woman with a Parrot* and listening to Elgar's *Cello Concerto*, both experiences provoke similar questions in the thoughtful aesthete: why does the painting seem to express reverie and the music nostalgia? How do we experience the reverie and nostalgia in such works of art? Why do we find these experiences rewarding in similar ways? As our awareness of emotion in art and our engagement with art's emotions can make such a special contribution to our life, it is timely for a philosopher to seek to account for the nature and significance of the experience of art's emotions. Damien Freeman develops a new theory of emotion that is suitable for resolving key questions in aesthetics. He then reviews and evaluates three existing approaches to artistic expression and proposes a new approach to

the emotional experience of art that draws on the strengths of the existing approaches Finally he seeks to establish the ethical significance of this emotional experience of art for human flourishing Freeman challenges the reader not only to consider how art engages with emotion but how we should connect up our answers to questions concerning the nature and value of the experiences offered by works of art
