The Language Of Cities:

The Language of Cities Fran P. Hosken, 1965 *The Language of Cities* Deyan Sudjic, 2016-10-06 The director of the Design Museum defines the greatest artefact of all time the city We live in a world that is now predominantly urban So how do we define the city as it evolves in the twenty first century Drawing examples from across the globe Deyan Sudjic decodes the underlying forces that shape our cities such as resources and land to the ideas that shape conscious elements of design whether of buildings or of space Erudite and entertaining he considers the differences between capital cities and the rest to understand why it is that we often feel more comfortable in our identities as Londoners Muscovites or Mumbaikars than in our national identities **The Language of Cities** Fran P. Hosken, 1972 *A Biophilic Pattern Language for Cities* Phillip B. Roös, 2022-12-06 This book presents a holistic integral sustainable design and planning method embedded in the hypothesis of biophilia our innate connection to nature used as a platform to chart a biophilic pattern language framework In *A Biophilic Pattern Language for Cities* the author positioned the innate human nature connection as critical in biophilic design and sustainable city planning solutions *Cities and Languages* Richard Clément, Caroline Andrew, 2022-08-10 Proceedings of the international symposium Language Planning in Capitals and Urban Environments held March 25 26 2010 at the University of Ottawa with sponsorship from the Official Languages and Bilingualism Institute Canadian Heritage the Office of the Commissioner of Official Languages and the City of Ottawa The Language Planning in Capitals and Urban Environments Symposium brought together administrators and researchers from Canadian and European cities to discuss language planning in urban environments Two important concepts emerged from the proceedings municipal bilingualism as an asset that deserves to be promoted rather than merely a question of regulation and bilingualism as a symbol of openness and inclusion that cities can use to advantage to distinguish themselves from their competitors **Language Learning and Teaching in the Context of Twin Cities** Gilbert Dalgalian, 2004-01-01 The twinning of cities and municipalities possibly represents the largest platform for encounter and mutual acquaintance established in modern times However can such a merger between the fellow citizens of Europe be achieved without first addressing in a determined way the issue of languages of teaching languages and their diversity This publication is a report on research 2001 2003 based on responses to questionnaires sent to 81 towns representing 328 twinings in Europe and the world **Lost Cities of Atlantis, Ancient Europe & the Mediterranean** David Hatcher Childress, 1996 Atlantis The legendary lost continent comes under the close scrutiny of archaeologist David Hatcher Childress From Ireland to Turkey Morocco to Eastern Europe or remote islands of the Mediterranean and Atlantic Childress takes the reader on an astonishing quest for mankind's past Ancient technology cataclysms megalithic construction lost civilisations and devastating wars of the past are all explored in this amazing book Childress challenges the sceptics and proves that great civilisations not only existed in the past but that the modern world and its problems are reflections of the ancient world of Atlantis *Ancient Maya Cities of the Eastern Lowlands* Brett A.

Houk,2016-10-05 Brings together for the first time all the major sites of this part of the Maya world and helps us understand how the ancient Maya planned and built their beautiful cities It will become both a handbook and a source of ideas for other archaeologists for years to come George J Bey III coeditor of Pottery Economics in Mesoamerica Skillfully integrates the social histories of urban development Vernon L Scarborough author of The Flow of Power Ancient Water Systems and Landscapes Any scholar interested in urban planning and the built environment will find this book engaging and useful Lisa J Lucero author of Water and Ritual For more than a century researchers have studied Maya ruins and sites like Tikal Palenque Cop n and Chich n Itz have shaped our understanding of the Maya Yet cities of the eastern lowlands of Belize an area that was home to a rich urban tradition that persisted and evolved for almost 2 000 years are treated as peripheral to these great Classic period sites The hot and humid climate and dense forests are inhospitable and make preservation of the ruins difficult but this oft ignored area reveals much about Maya urbanism and culture Using data collected from different sites throughout the lowlands including the Vaca Plateau and the Belize River Valley Brett Houk presents the first synthesis of these unique ruins and discusses methods for mapping and excavating them Considering the sites through the analytical lenses of the built environment and ancient urban planning Houk vividly reconstructs their political history considers how they fit into the larger political landscape of the Classic Maya and examines what they tell us about Maya city building

The Changing Face of World Cities Maurice Crul,John Mollenkopf,2012-08-01 A seismic population shift is taking place as many formerly racially homogeneous cities in the West attract a diverse influx of newcomers seeking economic and social advancement In The Changing Face of World Cities a distinguished group of immigration experts presents the first systematic data based comparison of the lives of young adult children of immigrants growing up in seventeen big cities of Western Europe and the United States Drawing on a comprehensive set of surveys this important book brings together new evidence about the international immigrant experience and provides far reaching lessons for devising more effective public policies The Changing Face of World Cities pairs European and American researchers to explore how youths of immigrant origin negotiate educational systems labor markets gender neighborhoods citizenship and identity on both sides of the Atlantic Maurice Crul and his co authors compare the educational trajectories of second generation Mexicans in Los Angeles with second generation Turks in Western European cities In the United States uneven school quality in disadvantaged immigrant neighborhoods and the high cost of college are the main barriers to educational advancement while in some European countries rigid early selection sorts many students off the college track and into dead end jobs Liza Reisel Laurence Lessard Phillips and Phil Kasinitz find that while more young members of the second generation are employed in the United States than in Europe they are also likely to hold low paying jobs that barely life them out of poverty In Europe where immigrant youth suffer from higher unemployment the embattled European welfare system still yields them a higher standard of living than many of their American counterparts Turning to issues of identity and belonging Jens Schneider Leo

Ch vez Louis DeSipio and Mary Waters find that it is far easier for the children of Dominican or Mexican immigrants to identify as American in part because the United States takes hyphenated identities for granted In Europe religious bias against Islam makes it hard for young people of Turkish origin to identify strongly as German French or Swedish Editors Maurice Crul and John Mollenkopf conclude that despite the barriers these youngsters encounter on both continents they are making real progress relative to their parents and are beginning to close the gap with the native born The Changing Face of World Cities goes well beyond existing immigration literature focused on the United States experience to show that national policies on each side of the Atlantic can be enriched by lessons from the other The Changing Face of World Cities will be vital reading for anyone interested in the young people who will shape the future of our increasingly interconnected global economy

Space, Movement and the Economy in Roman Cities in Italy and Beyond Frank Vermeulen, Arjan Zuiderhoek, 2021-05-26 How were space and movement in Roman cities affected by economic life What can the study of Roman urban landscapes tell us about the nature of the Roman economy These are the central questions addressed in this volume While there exist many studies of Roman urban space and of the Roman economy rarely have the two topics been investigated together in a sustained fashion In this volume an international team of archaeologists and historians focuses explicitly on the economics of space and mobility in Roman Imperial cities in both Italy and the provinces east and west Employing many kinds of material and written evidence and a wide range of methodologies the contributors cast new light both on well known and on less explored sites With their direct focus on the everyday economic uses of urban spaces and the movements through them the contributors offer a fresh and innovative perspective on the workings of Roman urban economies and on the debates concerning space in the Roman world This volume will be of interest to archaeologists and historians both those studying the Greco Roman world and those focusing on urban economic space in other periods and places as well as to other scholars studying premodern urbanism and urban economies
