Christianizing Homer Dennis R. MacDonald, 1994-04-21 This study focuses on the apocryphal Acts of Andrew c 200 CE which purports to tell the story of the travels miracles and martyrdom of the apostle Andrew Traditional scholarship has looked for the background of such writings in Jewish and Christian scriptures MacDonald however breaks with that model and looks to classic literature for the sources of this story Specifically he argues that the Acts represent an attempt to transform Greco Roman myth into Christian narrative categories by telling the story of Andrew in terms of Homeric epic in particular the Odyssey MacDonald presents a point by point comparison of the two works finding the resemblances so strong numerous and tendentious that they virtually compel the reader to consider the Acts a transformative rewriting of the epic This discovery not only sheds valuable light on the uses of Homer in the early church but also significantly contributes to our understanding of the reception of Homer in the empire as a whole *I Chose to Die (Siren Suicides, Book 1)* Ksenia

Anske, 2013-08-05 On a rainy September morning that just so happens to be her sixteenth birthday Ailen Bright a chicken legged straw haired teenager decides to commit suicide via drowning in the family bathtub The ornate marble tub adhering to her abusive father's love for anything expensive and Italian is decorated by five sirens who seemingly help her escape the house when her father breaks down the bathroom door After an almost successful suicide attempt number two which lands her at the bottom of a lake she learns that sirens are in fact real and they want to turn her into one of them An amazing yet dark look into the mind and heart of a suicidal teenager this urban fantasy follows Ailen's struggle to figure out the meaning of life the unraveling of her confusing feelings for her theatrically goofy best friend Hunter and her desperate battle for her father's love *Cedric* Frederick Baker, 2011-04-01 Set in Byron Bay Australia in the early 70s most of the book CEDRIC

takes place when things were if not entirely possible at least worth a bloody good try The main character CEDRIC originates from another galaxy Though not science fiction the story is funny but with a social message CEDRIC is an unoccupied computerized intergalactic saucer whose sophisticated programming is designed to study the human race and return with the results Almost immediately it becomes involved with an American Defence program and becomes a captive of the U S Government After a series of bungling errors by the scientists studying CEDRIC the saucer escapes CEDRIC decides that after its harrowing experience in the United States it would be safer somewhere less aggressive and advanced Australia seems to be as far away as possible on the planet This becomes CEDRIC's second mistake because the Australians CEDRIC meets are not your everyday folk They are all small town people with good intentions but little else and are quite mad Meanwhile a certain U S military man won't give up in his search for the missing alien This witty book poses the question With all the concerns and potential disasters surrounding us aren't we taking life too seriously *The Engineer*, 1902

Surgical Strike Jerry Ahern, *The Soundscape* R. Murray Schafer, 1993-10-01 The soundscape a term coined by the author is our sonic environment the ever present array of noises with which we all live Beginning with the primordial sounds of nature we have experienced an ever increasing complexity of our sonic surroundings As civilization develops new noises rise up around us from the creaking wheel the clang of the blacksmith's hammer and the distant chugging of steam trains to the sound imperialism of airports city streets and factories The author contends that we now suffer from an overabundance of acoustic information and a proportionate diminishing of our ability to hear the nuances and subtleties of sound Our task he maintains is to listen analyze and make distinctions As a society we have become more aware of the toxic wastes that can enter our bodies through the air we breathe and the water we drink In fact the pollution of our sonic environment is no less real Schafer emphasizes the importance of discerning the sounds that enrich and feed us and using them to create healthier environments To this end he explains how to classify sounds appreciating their beauty or ugliness and provides exercises and soundwalks to help us become more discriminating and sensitive to the sounds around us This book is a pioneering exploration of our acoustic environment past and present and an attempt to imagine what it might become in the future
