Tap into substantially enhanced content with world-leading clinical and research expertise from two new editors, Joseph St. Geme III MD and Nina Schor MD, who contribute on the key subspecialties including pediatric infectious disease and pediatric neurology. Manage the transition to adult healthcare for children with chronic diseases through discussions of the overall health needs of patients with congenital heart defects, diabetes, and cystic fibrosis. Recognize, diagnose, and manage genetic conditions more effectively using an expanded section that covers these diseases, disorders, and syndromes extensively. Find information on chronic and common dermatologic problems more easily with a more intuitive reorganization of the section. [Practical Algorithms in Pediatric Nephrology](#) Israel Zelikovic, Israel Eisenstein, 2008-01-01 Medical textbooks are mainly oriented by body systems, disease, or diagnosis, yet practicing physicians are confronted with patients' complaints in the form of symptoms, physical signs, or laboratory abnormalities from which they are expected to reach a diagnosis and proceed with treatment. This book is meant as a pragmatic text for use at the patient's bedside. It classifies common clinical symptoms and signs, laboratory abnormalities, and issues of management as they present themselves in daily practice. Special emphasis is given to new knowledge that has accumulated on the molecular pathophysiology and molecular genetics of various kidney diseases in order to deepen and strengthen the practical approach to common problems in pediatric nephrology. Aimed at an audience of general and family practitioners, pediatricians, and trainees who are not exposed on a day-to-day basis to pediatric nephrology problems, it provides a logical, concise, and cost-effective approach from which they can profit and acquire medical reasoning.
