## **Slipping And Sliding Through Trials:**

Slipping and Sliding Through Trials Chuck Thompson, 2011-08-22 Putting our problem solving energy and attention into cursing ourselves holding onto bitterness or quickie justifications are three examples of slipping We do not get stuck on trials because they are difficult but because our energy and attention slips away to something else This is the subject of Slipping and Sliding Through Trials a sequel to The James Prescription which uses the trials of life as opportunities for spiritual formation and personal growth

*Measuring Slipperiness* Wen-Ruey Chang, Theodore K. Courtney, Raoul Grongvist, Mark Redfern, 2002-12-19 In recent decades injury has begun to gain prominence as a public health and societal problem Slipperiness and slip trip and fall STF injuries are among the greatest obstacles to reducing the injury burden One of the biggest challenges in STF is defining and measuring slipperiness After over half a century of serious research on what slipperiness is and how it can be measured rapid progress has been made in the decade of the 90s *Measuring Slipperiness Human Locomotion and Surface Factors* provides an overview of basic concepts and definitions of terms related to the measurement of slipperiness from the onset of a foot slide to a gradual loss of balance and a fall The book includes expert group perspectives on human centered biomechanical locomotive perceptual and cognitive and surface centered roughness friction aspects and approaches It addresses the injury burden of slipperiness globally reviews existing slipmeters and summarizes areas of consensus in the field of slipperiness measurement Perhaps the most comprehensive treatment of the subject ever compiled the book contains contributions from North America Europe Asia and Oceania including the National Laboratories of Finland France the U K and the U S A valuable state of the art textbook it provides students with a useful starting point for understanding the many aspects of STF

approach We will address gaps and areas of uncertainty but also we will provide practical evidence based guidelines for the assessment approach and treatment of falls in the cognitively impaired populations This book is a unique contribution to the field Existing textbooks on fall prevention focus in global approaches and only tangentially address the cognitive component of falls and not purposely address special populations and or settings as residential care and nursing homes Due to the expected increase of proportion of older adults with cognitive and mobility impairments this book is also valuable for the whole spectrum of the health care of the elderly By including a transdisciplinary perspective from geriatric medicine rehabilitation and physiotherapy medicine cognitive neurology and public health this book will provide a practical and useful resource with wide applicability in falls assessment and prevention
