Ecological Gardening Marjorie
 Harris, 2011-02-18 Marjorie Harris returns with a completely updated edition of her classic guide to gardening with the
 environment in mind In her witty and accessible style Marjorie Harris who has been an organic gardener since the 1960s
 encourages the Canadian gardener to get back to basics With information updated for today s society *Ecological Gardening*

shows how little use pesticides and chemicals are when making a lush and abundant garden In 1992 when the book was first published gardening ecologically was a choice now it s absolutely a matter of proper stewardship With a society intent on leaving as small a footprint on the earth as possible there is no better time than now for this important and vital book

Low-carbon City and New-type Urbanization Songlin Feng, Weiguang Huang, Jun Wang, Mingquan Wang, Jun Zha, 2015-01-23 In the face of increasingly serious resource and environmental challenges the world has already accepted low carbon development as the main way forward for future city construction Chinese cities have encountered many problems during their development including land constraints energy shortages traffic congestion and air pollution For this reason the national meeting of the Central Work Conference on Urbanization made the strategic decision to take a new approach to urbanization and indicated that in future the key features of urbanization in China will be low carbon development and harmony between the environment and resources This book discusses the low carbon city as the new pattern of Chinese urbanization This represents a major change and takes intensive land use intelligent green and low carbon as its key words Low carbon will become an important future development direction for Chinese urbanization development In the twenty first Century in response to the global climate change countries have started a wave of low carbon city construction But in China there are still many disputes and misunderstandings surrounding the issue Due to a lack of research low carbon city construction in China is still in the early stages and while there have been successes there have also been failures There are complex and diverse challenges in applying low carbon development methods in the context of today s Chinese cities The construction of low carbon cities requires efficient government the technological innovation of enterprises and professional scholars but also efforts on the part of the public to change their daily activities Based on the above considerations the collection brings together experts from urban planning and design clean energy systems low carbon transportation new types of city infrastructure and smart cities etc in the hope of forming some solutions for Chinese low carbon city development

Ecological Thought in German Literature and Culture Gabriele Duerbeck, Urte Stobbe, Hubert Zapf, Evi Zemanek, 2017-10-16 The volume offers a survey of the contribution of German literature and culture to the evolution of ecological thought As the field of ecocritical theory and practice is rapidly expanding towards transnational and global dimensions it seems nevertheless necessary to consider the distinct manifestations of ecological thought in various cultures In this sense the volume demonstrates in twenty six essays from different disciplines how German literature philosophy art and science have contributed in unique ways to the emergence of ecological thought on national and transnational scale The volume maps the most important and characteristic of these developments both on a theoretical and on a textual analytical level It is structured in five parts ranging from proto ecological thought since early modern times part I to major theoretical approaches part II environmental history part III and ecocritical case studies part IV to ecological visions in different media and art forms part V The four editors have widely published and are actively involved in ecocritical

literary and cultural studies The group of editors consists of two scholars of German literature and cultural studies Gabriele Duerbeck and Urte Stobbe both University of Vechta a scholar in German and comparative literature Evi Zemanek University of Freiburg as well as a scholar of Anglo American ecoliterature and ecocriticism Hubert Zapf All of them are involved in various projects and research networks on ecology and literature The contributors of the individual chapters likewise are all experts in their respective fields ranging from German literature history environmental studies art history music and art The book is a unique and readily accessible collection of essays that is of relevance not only for a German and continental European but for a worldwide audience
