Energy Efficient Smart Phones for 5G Networks Ayman Radwan,Jonathan Rodriguez,2014-10-09 This book addresses current technology trends and requirements leading towards the next era in mobile communication handsets and beyond that the book proposes innovative solutions that could be candidate solutions for 5G phones It adopts a multidisciplinary and interdisciplinary stance towards handset design a necessary ingredient if 5th Generation handset and services are to really take off Therefore the scope of the book targets a broad range of subjects including energy efficiency RF design cooperation context aware systems roaming and short range networking all of which working in synergy to provide seamless mobility and high speed connectivity within a HetNet

environment Specifically the authors investigate how we can exploit the cooperation paradigm and context aware mechanism working in synergy to provide energy compliant phones that can introduce power savings of up to 50% on state of the art Going beyond this a chapter on business modeling approaches is also included based on incentive mechanisms for cooperation that will provide the necessary leverage to promote the up take of the proposed technology

Internet of Things, Smart Spaces, and Next Generation Networks and Systems Olga Galinina, Sergey Balandin, Yevgeni Koucheryavy, 2016-09-19 This book constitutes the joint refereed proceedings of the 16th International Conference on Next Generation Wired Wireless Advanced Networks and Systems NEW2AN 2016 and the 9th Conference on Internet of Things and Smart Spaces ruSMART 2016 held in St Petersburg Russia in September 2016 The 69 revised full papers were carefully reviewed and selected from 204 submissions The 12 papers selected for ruSMART are organized in topical sections on new generation of smart services smart services serving telecommunication networks role of context for smart services and smart services in automotive industry The 57 papers from NEW2AN deal with the following topics cooperative communications wireless networks wireless sensor networks security issues IoT and industrial IoT NoC and positioning ITS network issues SDN satellite communications signals and circuits advanced materials and their properties and economics and business

AI-Aided IoT Technologies and Applications for Smart Business and Production Alex Khang, Anuradha Misra, Shashi Kant Gupta, Vrushank Shah, 2023-12-01 This book covers the need for Internet of Things IoT technologies and artificial intelligence AI aided IoT solutions for business and production It shows how IoT based technology uses algorithms and AI models to bring out the desired results AI Aided IoT Technologies and Applications for Smart Business and Production shows how a variety of IoT technologies can be used toward integrating data fabric solutions and how intelligent applications can be used to greater effect in business and production operations The book also covers the integration of IoT data driven financial technology fintech applications to fulfill the goals of trusted AI aided IoT solutions Next the authors show how IoT based technology uses algorithms and AI models to bring out the desired results across various industries including smart cities buildings hospitals hotels homes factories agriculture transportation and more The last part focuses on AI aided IoT techniques data analytics and visualization tools This book targets a mixed audience of specialists analysts engineers scholars researchers academics and professionals It will be useful to engineering officers IoT and AI engineers engineering and industrial management students and research scholars looking for new ideas methodologies technologies models frameworks theories and practices to resolve the challenging issues associated with leveraging IoT technologies data driven analytics AI aided models IoT cybersecurity 5G sensors and augmented and virtual reality techniques for developing smart systems in the era of Industrial Revolution 4 0

Smart Business Systems for the Optimized Organization Robert J. Thierauf, James J. Hoctor, 2002-12-30 One of the first books to probe the latest direction in computing technology Thierauf's and Hoctor's innovative text explores ways in which smart business systems can help pick the best most optimal or near optimal solutions

from among hundreds even thousands of possibilities that threaten to swamp organizational decision makers daily Authors make clear that while past information systems have focused on generating information that is helpful in the production of knowledge over time smart business systems utilizing optimizing techniques can do it quickly more efficiently and in ways that can raise organizations to higher levels of competitiveness Well illustrated with examples and discussions of typical applications in such areas as strategic planning marketing manufacturing and accounting the book will help managers at all levels tie their organization s critical success factors into its key performance indicators and financial ratios The result is a win win situation within your company s complex of competing needs and goals and a way to produce directly and immediately measurable benefits on the bottom line The book is designed for company managers and other decision makers and for information systems professionals It provides understanding of one of the most important developments in systems decision making and how these smart business systems are constructed It is also suitable in an academic environment specifically in undergraduate and graduate courses that cover the fundamentals of smart business systems and which give special emphasis to optimization models The authors explain that enterprise resource planning and supply chain management vendors include optimization algorithms in their products and that their book will make software optimization more accessible to developers of business systems Although optimization is undoubtedly a complicated subject Thierauf and Hoctor go a long way toward simplifying it In doing so they enhance its value as an important tool for decision makers in almost all organizational capacities
