Hamilton,2010-07-05 The Northeastern Trans Pecos region of Texas is an unforgiving environment for anyone living off the
land yet nomadic hunters and gatherers roamed its deserts and mountains and sheltered in caves and sinkholes from around
AD 200 to 1450 This book provides detailed insights into the lifeways of these little known prehistoric peoples It places their
occupation of the region in a wider temporal and cultural framework through a comprehensive description and analysis of
the archaeological remains excavated by Donny L Hamilton at Granado Cave in 1978 Hamilton begins with a brief overview
of the geology and environment of the Granado Cave area and reviews previous archaeological investigations Then he and
other researchers present detailed analyses of the burials and other material remains found in the cave as well as the results
of radiocarbon dating From these findings he reconstructs the subsistence patterns and burial practices of these Native
Americans whom he identifies as a distinct group that was pushed into the environment by surrounding peoples He proposes
that they should be represented by a new archaeological phase thus helping to clarify the poorly understood late prehistory
of the Trans Pecos *Prehistory of North America* Mark Sutton,2015-12-22 A Prehistory of North America covers the ever
