Sigrun M. Wagner

Sms Blackwell Handbook Of Organizational Capabilities Emergence Development And Change:

The SMS Blackwell Handbook of Organizational Capabilities Helfat,2003-07 **Handbook of Organization**

Development Thomas G. Cummings,2008 The contributors reflect the field of organizational development's rapid growth and success since its inception 50 years ago into a far more complex study than it was just a few decades ago They show how organizational development has expanded from dealing with internal problems to the need to address more strategic issues

Innovation Performance and Clusters Nicole Röttmer,2011-06-21 While a strong research base on cluster assets exists evidence on other factors such as capabilities i.e. a local culture or networks is anecdotal and dispersed across research streams Nicole Röttmer sets out to identify and describe these capabilities their impact on cluster innovativeness in the interplay with proprietary cluster resources and their development over time in a comprehensive model **The**

Foundations of Complex Evolving Economies Giovanni Dosi,2023 This work attempts to address two basic questions at the core of the whole economic discipline since its inception **Navigating Leadership Paradox** Rikke Kristine

Nielsen,Frans Bévort,Thomas Duus Henriksen,Anne-Mette Hjalager,Danielle Bjerre Lyndgaard,2023-07-24 One of the most significant management challenges in modern companies and organizations is dealing with unavoidable complex paradoxes Today's world is multidimensional multipolar and multipurpose and increasingly classic management challenges such as leadership vs management exploitation vs exploration virtual vs physical presence economic sustainability vs environmental sustainability localization vs globalization etc assume the characteristics of paradoxes rather than problems or dilemmas Leadership of paradox is not about making a decision once and for all or prioritizing tough trade offs but about navigating between opposing considerations Navigating Leadership Paradox argues that academic knowledge pools can support leaders decision making and sense making in organizations and navigating paradoxes The book outlines a practical pathway for management leaders and professionals for steering through paradox using 5 phases 10 paradoxes 15 tools 20 cases and 25 learning points It delineates how to identify a paradox by assessing the nature of your challenge and discusses the appropriate courses of action individually as well in collaboration with other stakeholders It also gives inspiration and advice for professional helpers assisting others in navigating paradox as part of organizational development or other educational purposes This book will be essential reading for practitioners and academicians in the fields of leadership paradox complexity management change management leadership dilemmas and organizational paradox Dynamic Capabilities Constance E. Helfat,Sydney Finkelstein,Will Mitchell,Margaret Peteraf,Harbir Singh,David Teece,Sidney G. Winter,2009-02-09 Creating adapting to and exploiting change is inherently entrepreneurial To survive and prosper under conditions of change firms must develop the dynamic capabilities to create extend and modify the ways in which they operate The capacity of an organization to create extend or modify its resource base is vital Since the concept of dynamic capabilities was first introduced much research has elaborated the initial idea This important book by Constance Helfat and her team of leading

scholars provides a timely focus on in depth examples of corporate dynamic capabilities Examining these in the different contexts of alliances acquisitions and management the book gives students and researchers a succinct up to date definition of dynamic capabilities and the strategic management theories around them

Reconfiguring the Eco-System for Sustainable Healthcare Susan Albers Mohrman, Abraham B. (Rami) Shani, 2014-07-14 Volume 4 considers the configuration of the broader healthcare eco system It examines the tight connection between sustainable healthcare sustainable communities and sustainable ecologies and the organizational and inter organizational approaches being applied to advance overall sustainability

Great Minds in Management Ken G. Smith, Michael A. Hitt, 2005-09-22 In Great Minds In Management Ken G Smith and Michael A Hitt have brought together some of the most influential and original thinkers in management Their contributions to this volume not only outline their landmark contributions to management theory but also reflect on the process of theory development presenting their own personal accounts of the gestation of these theories The result is not only an ambitious and original panorama of the key ideas in management theory presented by their originators but also a unique collection of reflections on the process of theory development an area which to date little has been written about by those who have actually had experience of building theory In their concluding chapter Ken G Smith and Michael A Hitt draw together some common themes about the development of management theory over the last half a century and suggest some of the conclusions to be drawn about how theory comes into being

Innovation Systems and Capabilities in Developing Regions Willie Siyanbola, Olumuyiwa Olamide, 2016-05-23 In today s knowledge driven world innovation and innovation systems have become key policy issues However the extent of knowledge that is available on these concepts in less developed countries is still relatively low Much of what we know about innovation theory and systems has come from the developed countries and reflects their world view This apparent knowledge deficit has major implications for less developed countries Innovation Systems and Capabilities in Developing Regions adds to the growing body of knowledge on developing countries The theoretical and empirical case studies presented here advance the notion that while developing countries may not engage in frontier research a critical knowledge base upon which these countries compete for global markets is emerging There is evidence that state and non state actors are increasingly emphasising policies that sit within the framework of national innovation systems This book illuminates this shift in policy competence at national levels The contributions in this volume highlight the need for thorough understanding of the role of diffusion based innovation linked to technology transfer and acquisition They also provide empirical evidence on the drivers dynamics and impact of such innovation in developing economies and the constraints that apply Contributors also document the application of the innovation system approach in developing countries as well as the build up and diffusion of technological capabilities within innovation systems Academics higher level students policy makers and practitioners involved with innovation and the economics of technical change particularly in developing countries will find this a valuable book

Innovating Strategy Processes Steven W. Floyd, Johan

Roos, Claus D. Jacobs, Franz W. Kellermanns, 2009-02-09 *Innovating Strategy Process* presents a series of reflective essays by established and emerging scholars on the subject of innovation considering it both as an outcome of strategy and as a process in itself. Contains new ideas and rich case descriptions that will trigger creative thinking about how to design a more innovative strategy process. Offers new conceptual frameworks for analyzing and designing strategy process. Addresses cutting edge topics such as play as the means and art as the impetus for strategy making, the role of emotion in new venture decision making and science and entrepreneurship as a source of innovative strategies. Signals the future direction of the field.

Human Interactions, Processes, and Contexts: Reflections on the Past and Envisioning the Future

, 2014-01-31 This book is part of the Human and Organizational Learning ELP 25th Anniversary Celebration and explores the development of the field of Human and Organization Learning. Various scholars that have participated with ELP cohorts over the 25 years of its existence share their unique perspectives and changes in views on organizational change, leadership, complexity, organizational culture, and individual and organizational learning.

Innovation Capabilities: Affirming an Oxymoron? Tor Helge Aas, Karl Joachim Breunig, 2017-01-01 The relationship between resources and capabilities and performance has been discussed since Edith Penrose addressed the mechanisms behind the growth of the firm. Penrose 1959. Early contributions to this area of research suggest that valuable and inimitable resources and capabilities are the primary sources of superior performance and sustained competitive advantage. Barney 1991, Wernerfelt 1984. While more recent contributions suggest that the ability to change and reconfigure resources and capabilities, dynamic capabilities, are the most important for performance, especially when the market is unstable. Teece 2014, Teece, Pisano, Rubera, Guan, Hertog, van der Aa, Wang, Lu, Yam, Lo, Tang, Lau 2011. But despite these important advances, there is still a lack of consensus in the literature and a pressing need to clarify what type of resources and capabilities drive innovation in different contexts. Lidiya Robert 2014 and how these capabilities are developed and utilized. Helfat, Peteraf 2003.

Managing Value Co-creation in

University-Industry Partnerships Rafal Dudkowski, 2021-01-23 This book discusses how academic institutions can play a principal role in companies' innovation strategy. The characteristics of University-Industry collaboration are strongly related to the social aspect of the activity of collaborating agents oriented towards a common object of work. To analyze this phenomenon, the author applies one of the concepts from the Practice Based Approach, namely the concept of the Activity Network, to understand the collaboration process of R D activities in a Nordic Telia and Swiss Swisscom Telecom Companies developing innovative products. The author focuses on four phases of University-Industry innovation partnership building: identification, selection, formation, and navigation. The study shows the interactions between individuals, the contexts in which they act, and explores ways in which collaborative value co-creation is managed. This pioneering research offers new theoretical insights and managerial implications on how these dynamics influence innovation in companies. It will thus be invaluable to international scholars, researchers of R D and innovation, as well as business managers.

Organizations in

Time Marcelo Bucheli,R. Daniel Wadhwani,2014 This book brings together leading organization scholars and business historians to examine the opportunities and challenges of incorporating historical research into the study of firms and markets

Resources, Efficiency and Globalization P. Dimitratos,M. Jones,2010-02-12 International business for the modern firm has to compromise the need to use limited resources and achieve efficiency in the global marketplace This book examines these issues from the viewpoint of the internationalized SME the big multinational and the local subsidiary drawing on research conducted in different countries

The Process of Internationalization in Emerging SMEs and Emerging Economies Hamid Etemad,2013-01-01 This book the fourth volume in the McGill International Entrepreneurship Series brings together 27 top scholars to explore the structural complexities evolving relations and dynamic forces that are shaping a new system of multi polar multi level international business relations It examines entrepreneurial efforts and relations in different national and corporate cultures each embedded in and also constrained by country specific socio economic structures and each vying for consumer attentions in competitive global markets The new millennia has experienced much rapid change much of it implicit intangible and not covered by the headlines of the popular press The bipolar business system of the 20th century that prioritized the relationship between firms and consumers of developed countries is giving way to an emerging multi polar and multi level international system that considers consumers and companies in developing economies as well In this book scholars from around the world analyze the nascent architecture and relations in this quickly evolving system They explore the structural complexities evolving relations and dynamic forces that are shaping and re shaping the new system and examine entrepreneurial efforts and relations that cement its structure The chapters in this volume portray the operating conditions of firms across 14 emerging country environments and industries ranging from basic foods and information technology to complex business processes Students and professors of international business entrepreneurship marketing and management studies will find this volume an indispensable addition to the literature

Energy and Innovation M. S. van Geenhuizen,2010 These books offer the work of leading representatives of academic business and government sectors worldwide who discuss current and future issues of critical importance for using science and technology to foster regional economic development and shared prosperity at home and abroad Multidisciplinary perspectives provide state of the art and useful knowledge to decision makers in both the private and public sectors including informed and effective education business and government policies and strategies for the global knowledge economy Book Jacket

Business and Environmental Sustainability Sigrun M. Wagner,2020-07-19 Environmental sustainability is increasingly important to organisations whether for regulatory financial or ethical reasons Business and Environmental Sustainability looks at the environmental aspect of sustainability for all organisations pursuing competitive advantage The book provides theoretical foundations from science economics policy and strategy introduces three environmental challenges climate change pollution and waste and looks at how corporate functions can address these This textbook provides a thorough

foundation by introducing readers to the science reasoning and theory behind environmental sustainability and then delves into how these ideas translate into principles and business models for organisations to use Next it covers environmental challenges from climate change pollution and waste and then goes on to examine the different corporate functions from supply chain management to human resources to illustrate how environmental sustainability is managed and put into practice in organisations Finally a set of integrative case studies draws everything together and enables the reader to apply various analytical tools with the aim of understanding how companies can not only reduce their environmental footprint but can positively contribute to environmental sustainability Written by an award winning lecturer Business and Environmental Sustainability boasts a wealth of pedagogical features including examples from a range of industries and countries plus a companion website with slides quiz questions and instructor material This will be a valuable text for students of business management and environmental sustainability and will also be suitable for broader courses on corporate responsibility and sustainability across environmental studies political science and engineering

Workforce Development Roger Harris, Tom Short, 2013-11-19 This book captures the essence of current workforce development perspectives and draws on extensive global research to uncover a range of issues confronting organisations Taking primarily an Australian outlook after the global financial crisis and tracing the progress of a national industry sector each chapter delves into a major area of interest for leaders Overall the authors make the case that workforce development is an amalgam of activities influenced by context politics and economic development As the world becomes increasingly connected and mobile workforce development is proving to be a major activity for organisations because it impacts their longer term survival and growth To stay ahead successful organisations focus on attracting building engaging and retaining talented people However in a financially turbulent era where strategy changes quickly workforce development must not only plan and build the capabilities of people at work but also contribute to making employment more socially sustainable for a better world This book provides a thought provoking collection of scholarly work for business leaders human resource practitioners and academics working in adult education business psychology and social science disciplines At the same time it adopts an accessible style for students and others who want to know more about the development of people at work

Time and Work, Volume 2 Abbie J.

Shipp, Yitzhak Fried, 2014-02-18 The concept of time is a crucial filter through which we understand any events or phenomena nothing exists outside of time It conditions not only the question of when but also influences the what how and why of our ideas about management And yet management scholars have rarely considered this temporal lens in understanding how time affects employees at work or the organizations for which they work This 2 volume set provides a fresh temporal perspective on some of the most important and thriving areas in management research today Volume 1 considers how time impacts the individual and includes chapters on identity emotion motivation stress and creativity Volume 2 considers time in context with the organization exploring a temporal understanding of leadership HRM entrepreneurship teams and cross cultural issues

There is an overall concern with the practical implications of understanding individuals and organizations within the most relevant timeframes while the two volumes provide an actionable research agenda for the future This is a highly significant contribution to management theory and research and will be important reading for all students and researchers of Organizational Behavior Organizational Psychology Occupational Psychology Business and Management and HRM
