St Francis And The Song Of Brotherhood:

St. Francis and the Song of Brotherhood Eric Doyle, 1981 *St. Francis and the Song of Brotherhood and Sisterhood*
Eric Doyle, 1997 Articulates the author's firmly held conviction that there exists among all of creation a profound relationship resulting from a common origin in God **Francis of Assisi and His "Canticle of Brother Sun" Reassessed** B. Moloney, 2013-10-09 Bringing the skills of a literary historian to the subject Brian Moloney considers the genesis of Saint Francis of Assisi's Canticle of Brother Sun to show how it works as a carefully composed work of art The study examines the saint's life and times the structure of the poem the features of its style and the range of its possible meanings Franciscan Writings Dawn M. Integral Ecology for a More Sustainable World Matthew Eaton, Dennis O'Hara, Michael T. Ross, 2019-10-25 Laudato Si insists on a revolutionary human response to the public challenges of our time concerning the ecological crisis. The volume takes up the revolutionary spirit of Pope Francis and speaks to the economic, technological, political, educational, and religious changes needed to overcome the fragile relationships between humans and Earth. This volume identifies various systemic factors that have produced the anthropogenic ecological crisis that threatens the planet and uses the ethical vision of Laudato Si to promote practical responses that foster fundamental changes in humanity's relationships with Earth and each other. The essays address not only the immediate behavioral changes needed in individual human lives but also the deeper societal changes required if human communities are to live sustainable lives within Earth's integral ecology. Thus, this volume intentionally focuses on a plurality of cultural contexts and proposes solutions to problems encountered in a variety of global contexts. Accordingly, the contributors to this volume are scholars from a breadth of interdisciplinary and cultural backgrounds, each exploring an ethical theme from the encyclical and proposing systemic changes to address deeply entrenched injustices. Collectively, their essays examine the social, political, economic, gender, scientific, technological, educational, and spiritual challenges of our time as these relate to the ecological crisis.

Attunement Clifford Chalmers Cain, 2019-12-20 We live in a century in which we must either change our way of regarding and acting toward nature or else imperil our survival as a species and jeopardize as well the fate of the planet itself. This book, by a theologian and environmental scientist, examines four religious figures from European and Asian contexts who could aid us in developing a more sustainable and caring orientation which would allow us to live more in tune with creation: twelfth-century German nun Hildegard of Bingen, thirteenth-century Italian monk and patron saint of ecology Francis of Assisi, nineteenth-century Japanese Zen monk and poet Taigu Rykan, and the first pontiff from Latin America, twenty-first-century Pope Francis. By emphasizing our intimate and unavoidable organic connection with the network of all life and our charge to care for and protect it, they point us in the direction of a new paradigm, a healthier perspective, a metanoia, a change of heart, mind, attitude, and action that would partner what we know about nature, an environmental consciousness, with what we do, an ecological conscience. Our children, our grandchildren, and our great grandchildren deserve at least this much.

The Primacy of Love Ilia Delio, 2022-01-25 In an age of anxiety where reason is deified, what is the role of love? This short book centralizes love as the core reality of all cosmic life. From the cosmological to the theological dimensions of existence, love is shown to be the irresistible force of attraction that leads straight into the heart of God. The book is divided into three short chapters based on a metaphysics of love: we are born out of divine love, we exist in love, and we are oriented toward the fullness of love. In a world of evolutionary convergence and global consciousness, love may be the singular ethic that binds us together, heals our wounds, and draws us into a new unity of planetary life. In the *My Theology* series, the world's leading Christian thinkers explain some of the principal tenets of their theological beliefs in concise, pocket-sized books.
