## **Stalins Industrial Revolution:**

**Stalin's Industrial Revolution** Hiroaki Kuromiya, 1990-06-28 The first detailed English socio political history of Stalin's industrial revolution during the initial Five Year plan depicts a period of sacrifice for the entire nation Stalin's Industrial Revolution Hiroaki Kuromiya, 1988 **Industry, State, and Society in Stalin's Russia, 1926-1934** David R. Shearer, 2018-09-05 In his reexamination of the origins of the Stalinist state during the formative period of rapid industrialization in the late 1920s and early 1930s David R Shearer argues that a centralized state controlled economic system was the consciously conceived political creation of Stalinist leaders rather than the inevitable by product of socialist industrialization Focusing on the different economic and bureaucratic cultures within the industrial system Shearer reconstructs the debates in 1928 and 1929 over administrative financial and commercial reform He uses information from recently opened archives to show that attempts by the state's trading organizations to create a commercial economy enjoyed wide support offering a model that combined planning and rapid industrialization with social democracy and economic prosperity In an effort to crush the syndicate movement and establish tight political control over the economy Stalinist leaders intervened with a program of radical reforms Shearer demonstrates that professional engineers planners and industrial administrators in many cases actively supported the creation of a powerful industrial state unhampered by domestic social and economic constraints The paradoxical result Shearer shows was a loss of control The overly centralized system that emerged during the first Five Year Plan was rendered incoherent by periodic economic crises and the continuing influence of partially suppressed social and market forces *The Industrial Revolution in World History* Peter N. Stearns, 2020-11-16 Now in its fifth edition this book explores the ways in which the industrial revolution reshaped world history covering the international factors that helped launch the industrial revolution its global spread and its impact from the end of the eighteenth century to the present day The single most important development in human history over the past three centuries the industrial revolution continues to shape the contemporary world Revised and brought into the present this fifth edition of Peter N Stearns *The Industrial Revolution in World History* extends his global analysis of the industrial revolution Looking beyond the West the book considers India the Middle East and China and now includes more on key Latin American economies and Africa as well as the heightened tensions since 2008 about the economic aspects of globalization and the decline of manufacturing in the West This edition also features a new chapter on key historiographical debates updated suggestions for further reading and boxed debate features that encourage the reader to consider diversity and different viewpoints in their own analysis and pays increased attention to the environmental impacts Illustrating the contemporary relevance of the industrial revolution's history this is essential reading for students of world history and economics as well as for those seeking to know more about the global implications of what is arguably the defining socioeconomic event of modern times **The Encyclopedia of the Industrial Revolution in World History** Kenneth E.
