Stalins School Moscows Model School No 25 1931 1937:

Stalin's School Larry E. Holmes, 2010-11-23 A different kind of history Stalin's School brings a unique human dimension to the Soviet Union of the 1930s and a new understanding of Stalinism as a cultural and psychological phenomenon From 1931 to 1937 School No 25 was the most famous and most lavishly appointed school in the Soviet Union instructing the children of such prominent parents as Joseph Stalin head of the Communist Party Viacheslav Molotov head of the Soviet State and Paul Robeson American actor and singer Relying on published records materials in eleven archives accounts left by visiting foreigners including the prominent American educator George Counts and thirty six interviews with surviving pupils from the 1930s Holmes brings the school to life The school's administrators teachers pupils friends and foes become companions as well as objects of this study as we walk the school's halls enter its classrooms eavesdrop on feuding officials who debate its fate and learn something of what the school and the period meant for its youth Photographs of the school's teachers and students and reproductions of the students notebooks drawings and watercolors add personality to this compelling story Holmes uses the experience of School No 25 as a microcosm and mirror of Stalinism illuminating the interplay of state and society in decision making and providing an opportunity to examine Stalinism from ideological cultural and psychological perspectives While placing the school's history in the context of the coercion corruption and repression of the 1930s Holmes challenges the prevailing view that state and public spectacle on the one hand and society and private life on the other were contrasting entities School No 25 molded these elements into an organic whole In the intimate setting of Stalin's School the degree of acceptance of Stalinism transcends historians customary reference to the fear or privilege a Soviet citizen experienced In a mutually reinforcing way forced compliance and voluntary choice moved individual teachers and pupils to accept a structured environment both at school and in society as the means to a powerful prosperous and just Soviet Union

Stalin's Ninos Karl D. Qualls, 2020-02-04 Using multiple languages numerous archives press reports oral histories letters and memoirs Stalin's Ninos investigates the well resourced boarding schools designed specifically for nearly 3 000 child refugees from the Spanish Civil War

Universities Under Dictatorship John Connelly, Michael Grüttner, 2010-11-01

From Ruins to Reconstruction Karl D. Qualls, 2018-07-05 Sevastopol located in present day Ukraine but still home to the Russian Black Sea Fleet and revered by Russians for its role in the Crimean War was utterly destroyed by German forces during World War II In *From Ruins to Reconstruction* Karl D Qualls tells the complex story of the city's rebuilding Based on extensive research in archives in both Moscow and Sevastopol architectural plans and drawings interviews and his own extensive experience in Sevastopol Qualls tells a unique story in which the periphery bests the Stalinist center the city's experience shows that local officials had considerable room to maneuver even during the peak

years of Stalinist control Qualls first paints a vivid portrait of the ruined city and the sufferings of its surviving inhabitants He then turns to Moscow's plans to remake the ancient city on the heroic socialist model prized by Stalin and visited upon most other postwar Soviet cities and towns In Sevastopol however the architects and city planners sent out from the center went native deviating from Moscow's blueprints to collaborate with local officials and residents who seized control of the planning process and rebuilt the city in a manner that celebrated its distinctive historical identity When completed postwar Sevastopol resembled a nineteenth century Russian city with tree lined boulevards wide walkways and buildings street names and memorials to its heroism in wars both long past and recent Though visually Russian and still containing a majority Russian speaking population Sevastopol was in 1954 joined to Ukraine which in 1991 became an independent state In his concluding chapter Qualls explores how the Russianness of the city and the presence of the Russian fleet affect relations between Ukraine Russia and the West

Living the Revolution Andy Willimott, 2017 *Living the Revolution* offers a pioneering insight into the world of the early Soviet activist At the heart of this book are a cast of fiery eyed bed headed youths determined to be the change they wanted to see in the world First banding together in the wake of the October Revolution seizing hold of urban apartments youthful enthusiasts tried to offer practical examples of socialist living Calling themselves urban communes they embraced total equality and shared everything from money to underwear They actively sought to overturn the traditional family unit reinvent domesticity and promote a new collective vision of human interaction A trend was set a revolutionary meme that would in the coming years allow thousands of would be revolutionaries and aspiring party members to experiment with the possibilities of socialism The first definitive account of the urban communes and the activists that formed them this volume utilizes newly uncovered archival materials to chart the rise and fall of this revolutionary impulse Laced with personal detail it illuminates the thoughts and aspirations of individual activists as the idea of the urban commune grew from an experimental form of living limited to a handful of participants in Petrograd and Moscow into a cultural phenomenon that saw tens of thousands of youths form their own domestic units of socialist living by the end of the 1920s *Living the Revolution* is a tale of revolutionary aspiration appropriation and participation at the ground level Never officially sanctioned by the party the urban communes challenge our traditional understanding of the early Soviet state presenting Soviet ideology as something that could both frame and fire the imagination

Showcasing the Great Experiment Michael David-Fox, 2011-10-01 During the 1920s and 1930s thousands of European and American writers professionals scientists artists and intellectuals made a pilgrimage to experience the Soviet experiment for themselves *Showcasing the Great Experiment* explores the reception of these intellectuals and fellow travelers and their cross cultural and trans ideological encounters in order to analyze Soviet attitudes towards the West Many of the twentieth century's greatest writers and thinkers including Theodore Dreiser Andr Gide Paul Robeson and George Bernard Shaw notoriously defended Stalin's USSR despite the unprecedented violence of its prewar decade While many visitors were profoundly affected by their Soviet tours

so too was the Soviet system The early experiences of building showcases and teaching outsiders to perceive the future in the making constitute a neglected international part of the emergence of Stalinism at home Michael David Fox contends that each side critically examined the other negotiating feelings of inferiority and superiority admiration and enmity emulation and rejection By the time of the Great Purges these tensions gave way to the dramatic triumph of xenophobia and isolationism whereas in the twenties the new regime assumed it had much to learn from Western modernity by the Stalinist thirties the Soviet order was declared superior in all respects Drawing on the declassified archival records of the agencies charged with crafting the international image of communism David Fox shows how Soviet efforts to sell the Bolshevik experiment abroad through cultural diplomacy shaped and were in turn shaped by the ongoing project of defining the Soviet Union from within These interwar Soviet methods of mobilizing the intelligentsia for the international ideological contest he argues directly paved the way for the cultural Cold War

Children of the Gulag Cathy A. Frierson, Semen Samuilovich Vilenskii, 2010-01-01 A comprehensive documentary history of children whose parents were identified as enemies of the Soviet regime from its inception through Joseph Stalin's death With top secret documents in translation from the Russian state archives memoirs and interviews with child survivors

Science of the Child in Late Imperial and Early Soviet Russia Andy Byford, 2020-02-27 Between the 1880s and the 1930s children became the focus of unprecedented scientific and professional interest in modernizing societies worldwide including in the Russian Empire and then the Soviet Union Those who claimed children as special objects of investigation were initially spread across a network of imperfectly professionalized scholarly and occupational groups based mostly in the fields of medicine education and psychology From their various perspectives they made ambitious claims about the contributions that their emergent expertise made to the understanding of and intervention in human bio psycho social development The international movement that arose out of this catalyzed the institutionalization of new domains of knowledge including developmental and educational psychology special needs education and child psychiatry *Science of the Child* charts the evolution of the child science movement in Russia from the Crimean War to the Second World War It is the first comprehensive history in English of the rise and fall of this multidisciplinary field across the late Imperial and Soviet periods Drawing on ideas and concepts emanating from a variety of theoretical domains the study provides new insights into the concerns of Russia's professional intelligentsia with matters of biosocial reproduction and investigates the incorporation of scientific knowledge and professional expertise focused on child development into the making of the welfare warfare state in the rapidly changing political landscape of the early Soviet era
