Changing the Rules Robert W. Crandall, Kenneth Flamm, 2001-06-29 Since 1971 competition has begun to replace regulation as a governing force in the telecommunications industry The breakup of the national telephone monopolies technological advances and the worldwide network in telecommunications have brought a revolution in the telecommunications equipment and services industries These changes have forced legislators and regulators to rethink public policy toward communications The papers in this book were first presented at a conference organized by Robert Crandall and Kenneth Flamm pulling together a group of industry professionals and scholars to address the far reaching implications of the upheaval in the communications industry The contributors analyze the effects of this increasing competition on standardization technical innovation and international rivalry Changing the Rules offers possible policy options and analyzes their potential effects on the future market structure and the competitive positions of the U S computer and communications industries **Teaching and Collecting Technical Standards** Chelsea Leachman, Erin M. Rowley, Margaret Phillips, Daniela Solomon, 2023-09-15 Technical standards are a vital source of information for providing guidelines during the design manufacture testing and use of whole products materials and components To prepare students especially engineering students for the workforce universities are increasing the use of standards within the curriculum Employers believe it is important for recent university graduates to be familiar with standards Despite the critical role standards play within academia and the workforce little information is available on the development of standards information literacy which includes the ability to understand the standardization process identify types of standards and locate evaluate and use standards effectively Libraries and librarians are a critical part of standards education and much of the discussion has been focused on the curation of standards within libraries However librarians also have substantial experience in developing and teaching standards information literacy curriculum With the need for universities to develop a workforce that is well educated on the use of standards librarians and course instructors can apply their experiences in information literacy toward teaching students the knowledge and skills regarding standards that they will need to be successful in their field This title provides background information for librarians on technical standards as well as collection development best practices It also creates a model for librarians and course instructors to use when building a standards information literacy curriculum
