Anderson, 2009-03-26 Philosophers and students of the arts have wondered since the time of Aristotle about the nature of aesthetic experience and how this experience can seemingly be evoked by works of art For more than a century producers and directors of motion pictures have made decisions about how to craft them based upon assumptions about complex stylistic devices and the effects such patterns of organization have on viewers Over the past few years film scholars have made considerable progress in analyzing the manifold connections that exist between stylistic patterns and aesthetic effects for moving images of all kinds In doing so they have increasingly drawn upon insights and methodologies derived from psychology The international conference from which this volume takes its contributions and its title was organized to encourage the seeking of descriptive models pertaining to those elements of filmic construction that account for specific aesthetic experience The focus of the current selection of twenty essays is therefore on the elements of filmic narration and their presumed aesthetic effects The editors are pleased to strengthen the link between film studies and psychology in the interest of gaining tangible insight into the ancient mystery of the link between art and aesthetic experience *The Boy's Own Annual*, 1902

**A Cognitive Approach to Ernest Hemingway's Short Fiction** Gabriela Tucan, 2021-04-09 How do readers make sense of Hemingway's short stories How is it possible that the camera-like quality of his narrative can appeal to our senses and arouse our emotions How does it capture us With reserved narrators and protagonists engaged in laconic dialogs his texts do not seem to say much This book consciously revisits our responses to the Hemingway story a belated

response to his invitation to discover what lies beneath the surface of his iceberg What this pioneering critical endeavor seeks to understand is the thinking required in reading Hemingway s short fiction It proposes a cognitively informed model of reading which questions the resources of the reader s imaginative powers The cognitive demonstrations here are designed to have potentially larger implications for the short story s general mode of knowing Drawing from both cognitively oriented poetics and narratology in equal measure this book explains what structures our interaction with literary texts Decisions and Orders of the National Labor Relations Board United States.
