James I's Tumultuous First Year as King Ben Norman,2024-02-01 This is the story of a crucial year in the history of England brimming with great political and social upheaval the year 1603 1603 was a time of last goodbyes and new beginnings of waning customs and fresh political and constitutional visions It saw an aged queen die and a king from the far north rise as sovereign over a foreign nation It also witnessed an unprecedented outbreak of bubonic plague which began in London and spread indiscriminately through the provinces killing up to 30 000 people Catholicism was a second major disease doing the rounds in 1603 Its presence would lead to an attempt to dethrone King James I in the very first months of his reign culminating in a trial staged at Winchester Castle in November One of the candidates the conspirators had in mind to replace him was the would be queen Lady Arbella Stuart Indeed Arbella would bring her own dramas to an already crowded and politically and socially charged year The present work considers the entirety of the year 1603 in England from January to December In this same spirit it also pays attention to the lives of ordinary men and women as well as the lives of the great and powerful of the land How aware were so called common folk of the significant national episodes playing out around them Did they even care The answers are both fascinating and unexpected and raise important questions about the interrelationship between the ordinary and the extraordinary in seventeenth century England
