The Knowledge Seekers W. Arthur Porter, 1998 *The Knowledge Seekers* W. Arthur Porter, 1998-03-01 **Greedy Science** Michael D. Gordin, W. Patrick McCray, 2025-02-18

On the transformative role of greed in global science and technology during the 1980s In the 1980s a transformative era emerged where profit driven motives and an entrepreneurial spirit dominated scientific research and technological innovation This collection of essays edited by Michael D Gordin and W Patrick McCray examines how greed reshaped the global scientific community through the relentless pursuit of money fame and celebrity Profiting off science and technology was not a new phenomenon nor were the soaring ambitions of some of its most fervent advocates However the global currents of knowledge production in the 1980s saw major cultural and scientific shifts the increasing frequency of university patenting the rise of academic entrepreneurship and collaborations between industries and academia for example Greedy Science seeks to survey and understand the full range of these changes Through insightful essays contributors examine case studies ranging from the biotech boom driven by early oil firm investments to the speculative market strategies in personal computing and alternative energy This period saw the rise of the celebrity status of scientists and raised questions about the moral complexities of scientific greed The authors argue that greed was an ever present and expansive trait of science during this time encompassing a host of behaviors such as covetousness acquisitiveness rapaciousness and conspicuous consumption Greedy Science provides a nuanced analysis of how market dynamics and the quest for personal gain profoundly influenced scientific advancements and public perception during a pivotal decade in science and technology

Government Data Centers National Research Council, Division on Earth and Life Studies, Board on Earth Sciences and Resources, Committee on

Geophysical and Environmental Data, Committee on Coping with Increasing Demands on Government Data Centers, 2003-05-04 Environmental data centers have been successfully acquiring disseminating and archiving data for decades. However, the increasing volume and number of data sets coupled with greater demands from more diverse users are making it difficult for data centers to maintain the record of environmental change. This workshop report focuses on technological approaches that could enhance the ability of environmental data centers to deal with these challenges and improve the ability of users to find and use information held in data centers. Among the major findings are that data centers should rely more on off the shelf technology including software and commonly available hardware and should shift from tape to disk as the primary storage medium. Such technological improvements will help solve many data management problems although data centers and their host agencies will have to continue to invest in the scientific and human elements of data center operations.

Subject Guide to Books in Print, 1991 *Books In Print 2004-2005* Ed Bowker Staff, Staff Bowker, Ed, 2004

Collaborations Emma Heffernan, Fiona Murphy, Jonathan Skinner, 2020-05-31 Collaborations responds to the growing pressure on the humanities and social sciences to justify their impact and utility after cuts in public spending and the introduction of neoliberal values into academia. Arguing in defense of anthropology, the editors demonstrate the continued importance of the discipline and reveal how it contributes towards solving major problems in contemporary society. They also illustrate how anthropology can not only survive but thrive under these conditions. Moreover, Collaborations shows that collaboration with other disciplines is the key to anthropology's long term sustainability and survival and explores the challenges that interdisciplinary work presents. The book is divided into two parts: Anthropology and Academia and Anthropology in Practice. The first part features examples from anthropologists working in academic settings which range from the life behavioural and social sciences to the humanities arts and business. The second part highlights detailed ethnographic contributions on topics such as peace negotiations, asylum seekers, prostitution and autism. Collaborations is an important read for students, scholars and professional and applied anthropologists as it explores how anthropology can remain relevant in the contemporary world and how to prevent it from becoming an increasingly isolated and marginalized discipline.

Kane,2017-07-05 The 3rd Edition of Literacy Learning in the Content Areas helps readers build the knowledge motivation

tools and confidence they need as they integrate literacy into their middle and high school content area classrooms Its unique

approach to teaching content area literacy actively engages preservice and practicing teachers in reading and writing and the very activities that they will use to teach literacy to their own students in middle and high school classrooms. Rather than passively learning about strategies for incorporating content area literacy activities, readers get hands-on experience in such techniques as mapping, webbing, anticipation guides, booktalks, class websites, and journal writing and reflection. Readers also learn how to integrate children's and young adult literature, primary sources, biographies, essays, poetry, and online content communities and websites into their classrooms. Each chapter offers concrete teaching examples and practical suggestions to help make literacy relevant to students' content area learning. Author Sharon Kane demonstrates how relevant reading, writing, speaking, listening, and visual learning activities can improve learning in content area subjects and at the same time help readers meet national content knowledge standards and benchmarks.
