Itō Hirobumi - Japan's First Prime Minister and Father of the Meiji

Constitution Takii Kazuhiro, 2014-01-21 The brilliant and influential statesman Itō Hirobumi 1841-1909 and the first prime minister of Japan's modern state has been poorly understood. This biography attempts to set the record straight about Itō's thought and vision for Japan's modernisation based on research in primary sources. It outlines Itō's life: the son of a poor farmer, he showed exceptional talent as a boy and was sent to study in Europe and the United States. He returned home convinced that Western civilisation was the only viable path for Japan. Following the Meiji Restoration of 1868, Itō became a powerful intellectual and political force behind reforms of Japanese laws and institutions aimed to shape a modern government based on informed leadership and a knowledgeable populace. Among his many achievements were the establishment of Japan's first constitution, the Meiji Constitution of 1889, and the founding in 1900 of a new type of constitutional party, the Rikken Seiyūkai (Friends of Constitutional Government), which reformulated after 1945 became the Liberal Democratic Party that has dominated Japanese politics in the postwar period. Concerning Itō's role as Japanese Resident General in Korea from 1905, the author argues that Itō's aim, not understood by either the Japanese home government or Koreans themselves, was not to colonize Korea. He was determined to modernise Korea and consolidate further constitutional reforms in Japan. This aim was not shared by others, and Itō resigned in 1909. He was assassinated the same year in Manchuria by a Korean nationalist. The Japanese language edition of this book is a bestseller in Japan and it received the Suntory Prize for Social Sciences and Humanities, one of Japan's most prestigious publishing awards.

Cost Planning of PFI and PPP Building Projects Abdelhalim Boussabaine, 2013-04-03 This topical and timely book presents an innovative approach to dealing with the complexities of cost planning in PFI/PPP projects. PFI/PPP projects have a significantly different costing environment from conventionally procured projects, requiring cost analysts to use their expertise and innovative thinking to develop whole life cost solutions that deliver value for money to the client, thus improving public building assets performance. Abdelhalim Boussabaine provides a thorough grounding in the theory of PFI from its early evolution through to examples of current projects. In particular, the rationale for private financing of public services, arguments for and against PFI, and value for money mechanisms are discussed. The book presents an innovative framework for whole life value and calls for changes in the way whole life cycle value is perceived, created, and exchanged. **Cost Planning of PFI and PPP Building Projects** provides the reader with existing knowledge as well as present innovative thinking for future development and management of PFI/PPP cost planning processes. Given the importance and novelty of this book, academics, professionals, undergraduate and postgraduate students will find this book valuable.
