Tian,2020-10-26 The Liang dynasty 502 557 is one of the most brilliant and creative periods in Chinese history and one of the most underestimated and misunderstood Under the Liang literary activities such as writing editing anthologizing and cataloguing were pursued on an unprecedented scale yet the works of this era are often dismissed as decadent and no more than a shallow prelude to the glories of the Tang This book is devoted to contextualizing the literary culture of this era not only the literary works themselves but also the physical process of literary production such as the copying and transmitting of texts activities such as book collecting anthologizing cataloguing and various forms of literary scholarship and the intricate interaction of religion particularly Buddhism and literature Its aim is to explore the impact of social and political structure on the literary world *Observing by Hand* Omar W. Nasim,2022-12-22

Today we are all familiar with the iconic pictures of the nebulae produced by the Hubble Space Telescope s digital cameras But there was a time before the successful application of photography to the heavens in which scientists had to rely on handmade drawings of these mysterious phenomena *Observing by Hand* sheds entirely new light on the ways in which the production and reception of handdrawn images of the nebulae in the nineteenth century contributed to astronomical observation Omar W Nasim investigates hundreds of unpublished observing books and paper records from six nineteenth century observers of the nebulae Sir John Herschel William Parsons the third Earl of Rosse William Lassell Ebenezer Porter Mason Ernst Wilhelm Leberecht Tempel and George Phillips Bond Nasim focuses on the ways in which these observers created and employed their drawings in data driven procedures from their choices of artistic materials and techniques to their practices and scientific observation He examines the ways in which the act of drawing complemented the acts of seeing and knowing as well as the ways that making pictures was connected to the production of scientific knowledge An impeccably researched carefully crafted and beautifully illustrated piece of historical work *Observing by Hand* will delight historians of science art and the book as well as astronomers and philosophers English Mechanic and World of Science ,1883 **The Chautauquan** Theodore L.
