## **The Lancasterhanover Masque:**

The Lancaster Hanover Masque ,1992      *Landscape Narratives* Matthew Potteiger,Jamie Purinton,1998-03-20 This text covers the most popular types of landscapes designed today from garden and park design historic preservation and restoration to community and regional planning      **THEATER MASQUE, BERLIN MASQUE, LANCASTER-HANOVER MASQUE, DEVIL'S BRIDGE.** ,1983      **John Hejduk** John Hejduk,1992 John Hejduk head of Cooper Union School of Architecture in New York has gained a wide following with a series of conceptual projects which integrate his deep rooted literary historical and cultural concerns with architecture Hejduk s masque projects reinterpret the tradition of the court masque in which members of the audience participated The Lancaster Hanover Masque which has been purchased for the collection of the Centre Canadien d Architecture contains 68 objects subjects within a twelve hour cycle      **Global Perspectives on Critical Architecture** Gevork Hartoonian,2016-03-03 Judging from the debates taking place in both education and practice it appears that architecture is deeply in crisis New design and production techniques together with the globalization of capital and even skilled labour have reduced architecture to a commodified object its aesthetic qualities tapping into the current pervasive desire for the spectacular These developments have changed the architect s role in the design and production processes of architecture Moreover critical architectural theories including those of Breton Heidegger and Benjamin which explored the concepts of technology modernism labour and capital and how technology informed the cultural along with later theories from the 1960s which focused more on the architect s theorization of his her own design strategies seem increasingly irrelevant In an age of digital reproduction and commodification these theoretical approaches need to be reassessed Bringing together essays and interviews from leading scholars such as Kenneth Frampton Peggy Deamer Bernard Tschumi Donald Kunze and Marco Biraghi this volume investigates and critically addresses various dimensions of the present crisis of architecture It poses questions such as Is architecture a conservative cultural product servicing a given producer consumer system Should architecture s affiliative ties with capitalism be subjected to a measure of criticism that can be expanded to the entirety of the cultural realm Is architecture s infusion into the cultural the reason for the visibility of architecture today What room does the city leave for architecture beyond the present delirium of spectacle Should the thematic of various New Left criticisms of capitalism be taken as the premise of architectural criticism Or alternatively putting the notion of criticality aside is it enough to confine criticism to the production of insightful and pleasurable texts      Nomadic Theatre Liesbeth Groot Nibbelink,2019-04-18 Fluid stages morphing theatre spaces ambulant spectators and occasionally disappearing performers these are some of the key ingredients of nomadic theatre They are also theatre s response to life in the 21st century which is increasingly marked by the mobility of people information technologies and services While examining how contemporary theatre exposes and queries this mobile turn in society Liesbeth Groot Nibbelink introduces the concept of nomadic theatre as a vital tool for analyzing how movement and mobility affect and

implicate the theatre how this makes way for local operations and lived spaces and how physical movements are stepping stones for theorizing mobility at large This book focuses on ambulatory performances and performative installations asking how they stage movement and in turn mobilize the stage By analyzing the work of leading European artists such as Rimini Protokoll Dries Verhoeven Ontroerend Goed and Signa Nomadic Theatre demonstrates that mobile performances radically rethink the conditions of the stage and alter our understanding of spectatorship Nomadic Theatre instigates connections across disciplinary fields and feeds dramaturgical analysis with insights derived from media theory urban philosophy cartography architecture and game studies It illustrates how theatre as a material form of thought creatively and critically engages with mobile existence both on the stage and in society **Surrealism and Architecture** Thomas Mical, 2005

Twenty one essays examining the relationship of surrealist thought to architectural theory and practice **John Hejduk, Theater masque, Berlin masque, Lancaster, Hanover masque, Devil's bridge** John Hejduk, 1983 *Attunement*

Alberto Perez-Gomez, 2016-02-26 How architecture can move beyond the contemporary enthusiasms for the technically sustainable and the formally dazzling to enhance our human values and capacities Architecture remains in crisis its social relevance lost between the two poles of formal innovation and technical sustainability In *Attunement* Alberto Perez-Gomez calls for an architecture that can enhance our human values and capacities an architecture that is connected attuned to its location and its inhabitants Architecture Perez-Gomez explains operates as a communicative setting for societies its beauty and its meaning lie in its connection to human health and self understanding Our physical places are of utmost importance for our well being Drawing on recent work in embodied cognition Perez-Gomez argues that the environment including the built environment matters not only as a material ecology but because it is nothing less than a constituent part of our consciousness To be fully self aware we need an external environment replete with meanings and emotions Perez-Gomez views architecture through the lens of mood and atmosphere linking these ideas to the key German concept of *Stimmung* attunement and its roots in Pythagorean harmony and Vitruvian temperance or proportion He considers the primacy of place over space the linguistic aspect of architecture the voices of architecture and the voice of the architect architecture as a multisensory not pictorial experience with Piranesi Ledoux and Hejduk as examples of metaphorical modeling and how *Stimmung* might be put to work today to realize the contemporary possibilities of attunement **Architecture's Theory**

Catherine Ingraham, 2023-04-18 A collection of illuminating essays exploring what theory makes of architecture and what architecture makes of theory in philosophical and materialized contexts From poststructuralism and deconstruction to current theories of technology and nature critical theory has long been closely aligned with architecture In turn architecture as a thinking profession materializes theory in the form of built work that always carries symbolic loads In this collection of essays Catherine Ingraham studies the complex connectivity between architecture's discipline and practice and theories of philosophy art literature history and politics She argues that there can be no architecture without theory Whether

considering architecture's relationship to biomodernity or exploring the ways in which contemporary artists and designers engage in figural play Ingraham offers provocative interpretations that enhance our understanding of both critical theory and architectural practice today Along the way she engages with a wide range of contemporary theorists including Giorgio Agamben Judith Butler Jacques Derrida Graham Harman and Timothy Morton considering buildings around the world including the Palace of Culture in Warsaw the Viceroy's House complex in New Delhi Mack Scogin and Merrill Elam's Wolfsburg Science Center project in Germany and the Superdome in New Orleans Approaching its subject matter from multiple angles Architecture's Theory shows how architecture's theoretical and artifactual practices have a unique power to alter culture

**The Complexities of John Hejduk's Work** J. Kevin Story, 2020-06-09 This book traces the development of John Hejduk's architectural career using the idea of exorcism to uncover his thought process when examining architectural designs His work encouraged profound questioning on what why and how we build which allowed for more open discourse and enhance the phenomenology found in architectural experiences Three distinct eras in his architectural career are applied to analogies of outlines apparitions and angels throughout the book across seven chapters Using these thematic examples the author investigates the progression of thought and depth inside the architect's imagination by studying key projects such as the Texas houses Wall House Architectural Masques and his final works Featuring comments by Gloria Fiorentino Hejduk Stanley Tigerman Steven Holl Zaha Hadid Charles Jencks Phyllis Lambert Juhani Pallasmaa Toshiko Mori and others this book brings to life the intricacies in the mind of John Hejduk and would be beneficial for those interested in architecture and design in the 20th century
