The Language Of Public Administration:

The Language of Public Administration David John Farmer, 1995-07-30 Coping with the practical problems of bureaucracy is hampered by the limited self conception and the constricted mindsets of mainstream public administration thinking Modernist public administration theory although valuable and capable of producing ever more remarkable results is limiting as an explanatory and catalytic force in resolving fundamental problems about the nature size scope and functioning of public bureaucracy and in transforming public bureaucracy into a more positive force This original study specifies a reflexive language paradigm for public administration thinking and shows how a postmodern perspective permits a revolution in the character of thinking about public bureaucracy The author considers imagination deconstruction deterritorialization and alterity Farmer s work emphasizes the need for an expansion in the character and scope of public administration s disciplinary concerns and shows clearly how the study and practice of public administration can be reinvigorated

Post-Traditional Public Administration Theory David Farmer, 2021-03-22 This book describes what is argued to be the most effective way of doing public administration thinking Its aim is to encourage governments to govern fundamentally better in terms of policy and administration A better understanding of context and identities imaginization epistemic pluralism anti administration and the context of economics are examples of what is critical for high effectiveness The pieces included in this book have been handpicked from the vast academic collection that David Farmer has authored over the last thirty years and which were published in the Journal of Administrative Theory and Praxis and the Journal of Public Administration Education Collectively these chapters are intended to help governments use post traditional public administration theory in order to achieve better praxis

Taking Language Seriously Jay D. White, 1999 Challenging scholars in public administration to be cognizant of the philosophical underpinnings of their field White public administration U of Nebraska Omaha argues that the logic of applied research in this discipline resembles storytelling more than traditional social science With a nod to postmodernism actually an entire chapter his case for this narrative theory of knowledge is built by showing how inquiry into complex problems is grounded in language discourse and rationality and how the logical structure of explanatory interpretive and critical research are equally legitimate depending on the nature of the question
