Class, Contention, and a World in Motion Winnie Lem, Pauline Gardiner Barber, 2010-07-01 Prevailing scholarship on migration tends to present migrants as the objects of history subjected to abstract global forces or to concrete forms of regulation imposed by state and supra state organizations In this volume by contrast the focus is on migrants as the subjects of history who not only react but also act to engage with and transform their worlds Using ethnographic examples from Africa Asia Europe North America and the Middle East contributors question how and why particular forms of political struggle and collective action may or indeed may not be carried forward in the context of geographic and social border crossings In doing so they bring the dynamic relationship between class gender and culture to the forefront in each distinctive migration setting

**Trust Us, We're Experts PA** Sheldon Rampton, John Stauber, 2002-01-14

The authors of Toxic Sludge Is Good for You unmask the sneaky and widespread methods industry uses to influence opinion through bogus experts doctored data and manufactured facts We count on the experts We count on them to tell us who to vote for what to eat how to raise our children We watch them on TV listen to them on the radio read their opinions in magazine and newspaper articles and letters to the editor We trust them to tell us what to think because there s too much information out there and not enough hours in a day to sort it all out We should stop trusting them right this second In their new book Trust Us We re Experts How Industry Manipulates Science and Gambles with Your Future Sheldon Rampton and John Stauber authors of Toxic Sludge Is Good For You offer a chilling expos on the manufacturing of independent experts Public relations firms and corporations know well how to exploit your trust to get you to buy what they have to sell Let you hear it from a neutral third party like a professor or a pediatrician or a soccer mom or a watchdog group The problem is these third parties are usually anything but neutral They have been handpicked cultivated and meticulously packaged in order to make you believe what they have to say preferably in an objective format like a news show or a letter to the editor And in some cases they have been paid handsomely for their opinions For example You think that nonprofit organizations just give away their stamps of approval on products Bristol Myers Squibb paid 600 000 to the American Heart Association for the right to display AHA s name and logo in ads for its cholesterol lowering drug Pravachol SmithKline Beecham paid the American Cancer Society 1 million for the right to use its logo in ads for Beecham s Nicoderm CQ and Nicorette anti smoking ads You think that a study out of a prestigious university is completely unbiased In 1997 Georgetown University s Credit Research Center issued a study which concluded that many debtors are using bankruptcy as an excuse to wriggle out of their obligations to creditors Former U S Treasury Secretary Lloyd Bentsen cited the study in a Washington Times column and

advocated for changes in federal law to make it harder for consumers to file for bankruptcy relief What Bentsen failed to mention was that the Credit Research Center is funded in its entirety by credit card companies banks retailers and others in the credit industry that the study itself was produced with a 100 000 grant from VISA USA Inc and MasterCard International and that Bentsen himself had been hired to work as a credit industry lobbyist You think that all grassroots organizations are truly grassroots In 1993 a group called Mothers Opposing Pollution MOP appeared calling itself the largest women s environmental group in Australia with thousands of supporters across the country Their cause A campaign against plastic milk bottles It turned out that the group s spokesperson Alana Maloney was in truth a woman named Janet Rundle the business partner of a man who did P R for the Association of Liquidpaperboard Carton Manufacturers the makers of paper milk cartons You think that if a scientist says so it must be true In the early 1990s tobacco companies secretly paid thirteen scientists a total of 156 000 to write a few letters to influential medical journals One biostatistician received 10 000 for writing a single eight paragraph letter that was published in the Journal of the American Medical Association A cancer researcher received 20 137 for writing four letters and an opinion piece to the Lancet the Journal of the National Cancer Institute and The Wall Street Journal Rampton and Sta
