## **The Language Parallax Linguistic Relativism And Poetic Indeterminacy Texas Linguistics Series:**

**The Language Parallax** Paul Friedrich, 2014-04-15 Humankind has always been fascinated and troubled by the way languages and dialects differ Linguistically based differences in point of view have preoccupied many original minds of the past such as Kant and remain at the forefront of language study in philosophy anthropology literary criticism and other fields Paul Friedrich's *The Language Parallax* argues persuasively that the locus and focus of differences among languages lies not so much in practical or rational aspects as in the complexity and richness of more poetic dimensions in the nuances of words or the style and voice of an author This poetic reformulation of what has been called linguistic relativism is grounded in the author's theory of the imagination as a main source of poetic indeterminacy The reformulation is also based on the intimate relation of the concentrated language of poetry to the potential or possibilities for poetry in ordinary conversation dreams and other experiences The author presents challenging thoughts on the order and system of language in their dynamic relation to indeterminacy and ultimately disorder and chaos Drawing on his considerable fieldwork in anthropology and linguistics Friedrich interweaves distinct and provocative elements the poetry of language difference the indeterminacy in dialects and poetic forms the discovery of underlying orders the workings of different languages the strength of his own poetry The result is an innovative and organic whole *The Language Parallax* then is a highly original work with a single bold thesis It draws on research and writing that has involved in particular English Russian and the Tarascan language of Mexico as well as the personal and literary study of the respective cultures Anthropologist linguist and poet Friedrich synthesizes from his experience in order to interrelate language variation and structure the creative individual ideas of system in process and questions of scientific and aesthetic truth The result is a new view of language held to the light of its potentially creative nature

**Responsibility and Evidence in Oral Discourse** Jane H. Hill, 1993-06-03 In Responsibility and evidence in oral discourse twelve prominent linguists and linguistic anthropologists examine responsibility authority and knowledge central but problematic concepts in contemporary anthropology Their detailed case studies analyze diverse forms of oral discourse everyday conversation conversational narrative song oratory divination and ritual poetry in societies in the Americas Africa Asia and the Pacific The studies show how speakers attribute responsibility for acts and states of affairs how particular forms of language and discourse relate to claims and disclaimers of responsibility and how verbal acts are themselves social acts subject to such attributions The volume challenges those cognitive theorists who locate responsibility for the meaning of verbal acts solely in the intentions of individual speakers Instead the contributors focus on the production of meaning between speakers and audiences in particular social and cultural contexts through dialogue and interaction which mediate between linguistic forms and their interpretations This landmark volume will serve for years to come as a point of reference

in the study not only of responsibility and evidence but of reported speech authorship and other phenomena in the social life of language. Besides linguistic and cultural anthropologists, linguistics and folklorists, it will interest also readers from pragmatics, legal studies, sociology, religion, and social psychology.

*Language and Culture* Karen Risager, 2006-01-01. The book presents a new theory of the relationship between language and culture in a transnational and global perspective. The fundamental view is that languages spread across cultures and cultures spread across languages or in other words that linguistic and cultural practices flow through social networks in the world along partially different paths and across national structures and communities.

**Time and the Work of Anthropology** Johanne Fabian, 2014-01-14. The development of the dialogical approach, the autobiographical perspective, and the central role of text interpretation are all seen as characteristics of post modern ethnography arising from the daily chores of field research. The breakthrough into time and history away from the timeless theorizing of structuralism and functionalism is seen as inevitable when anthropology is forced to think about its own epistemology. Another current concern is taken up with reflections on the politics of representing the other. In the later essays he opposes post modern fashions and re asserts the need to continue with a truly critical agenda.

*Linguistic Relativities* John Leavitt, 2010-12-23. There are more than six thousand human languages, each one unique. For the last five hundred years, people have argued about how important language differences are. This book traces that history and shows how language differences have generally been treated either as of no importance or as all important depending on broader approaches taken to human life and knowledge. It was only in the twentieth century in the work of Franz Boas and his students that an attempt was made to engage seriously with the reality of language specificities. Since the 1950s, this work has been largely presented as yet another claim that language differences are all important by cognitive scientists and philosophers who believe that such differences are of no importance. This book seeks to correct this misrepresentation and point to the new directions taken by the Boasians, directions now being recovered in the most recent work in psychology and linguistics.

**Endangered Languages** Lenore A. Grenoble, Lindsay J. Whaley, 1998-03-26. This book provides an overview of the issues surrounding language loss. It brings together work by theoretical linguists, field linguists, and non linguist members of minority communities to provide an integrated view of how language is lost from sociological and economic as well as from linguistic perspectives. The contributions to the volume fall into four categories. The chapters by Dorian and Grenoble and Whaley provide an overview of language endangerment. Grinevald, England, Jacobs, and Nora, and Richard Dauenhauer describe the situation confronting threatened languages from

both a linguistic and sociological perspective The understudied issue of what beyond a linguistic system can be lost as a language ceases to be spoken is addressed by Mithun Hale Jocks and Woodbury In the last section Kapanga Myers Scotton and Vakhtin consider the linguistic processes which underlie language attrition **Dramatized Discourse** Zhuo Jing-Schmidt,2005-08-31 Language is a symbolic system of meanings evoked by linguistic forms The choice of forms in communication is non arbitrary Rather speakers pick those forms whose meanings best convey their discourse intention The meaning of the Mandarin ba construction argues Jing Schmidt is discourse dramaticity a concept that includes high conceptual salience and subjectivity The ba construction and its syntactic variations are never interchangeable because contrast in their meanings determines difference in their functions Quantitative analyses based on authentic data validate the postulation of discourse dramaticity By taking discourse pragmatics seriously the dramaticity hypothesis enables a unitary explanation that transcends sentence grammar The diachronic treatment reveals the syntactic change of the ba construction as an adaptive process of pragmatization which raises the issue of linguistic evolution as a result of socio cultural development This book will be of particular value to readers interested in the interaction between grammar and pragmatics and to teachers confronting the controversy of the ba construction in foreign language pedagogy Language and Creativity Ronald Carter,2015-09-16 Language and Creativity has become established as a pivotal text for courses in English Language Linguistics and Literacy Creativity in language has conventionally been regarded as the preserve of institutionalised discourses such as literature and advertising and individual gifted minds In this ground breaking book bestselling author Ronald Carter explores the idea that creativity far from being simply a property of exceptional people is an exceptional property of all people Drawing on a range of real examples of everyday conversations and speech from flatmates in a student house and families on holiday to psychotherapy sessions and chat lines the book argues that creativity is an all pervasive feature of everyday language Using close analysis of naturally occurring language taken from a unique 5 million word corpus Language and Creativity reveals that speakers commonly make meanings in a variety of creative ways in a wide range of social contexts and for a diverse set of reasons This Routledge Linguistics Classic is here reissued with a new preface from the author covering a range of key topics from e language and internet discourse to English language teaching and world Englishes Language and Creativity continues to build on the previous theories of creativity offering a radical contribution to linguistic literary and cultural theory A must for anyone interested in the creativity of our everyday speech

*Languages - Cultures - Worldviews* Adam Głaz,2019-07-12 This edited book explores languages and cultures or linguacultures from a translation perspective resting on the assumption that they find expression as linguacultural worldviews Specifically it investigates how these worldviews emerge how they are constructed shaped and modified in and through translation understood both as a process and a product The book s content progresses from general to specific from the notions of worldview and translation through a consideration of how worldviews are shaped in and through language to a

discussion of worldviews in translation both in macro scale and in specific details of language structure and use The contributors to the volume are linguists linguistic anthropologists practising translators and or translation studies scholars and the book will be of interest to scholars and students in any of these fields Cultural Memory of Language Susan Samata, 2014-11-20 I can't even speak my own language were the words overheard in a college staffroom that triggered the writing of this book Calling something my own implies a personal proprietorial relationship with it But how can it be your own if you cannot speak it The Cultural Memory of Language looks at unintended monolingualism a lack of language fluency in a migratory cultural situation where two or more languages exist at home It explores family history and childhood language acquisition and attrition What is the present everyday experience of language use and life between two cultures Examining interview data Samata uncovers a sense of inauthenticity felt by people who do not fully share a parent's first language Alongside this features a sense of concurrent anger and a need to assign blame Participation in the language even to the extent of phatic or formulaic phraseology occasions feelings of authentic linguistic and cultural inclusion The book thus uncovers appreciable and measurable benefits in positive self image and a sense of well being Looking at how people view language is essential how they view the language they call their own is even more important and this book does just that in a qualified applied linguistic environment Writing Without Words Elizabeth Hill Boone, Walter D Mignolo, 1994 The history of writing or so the standard story goes is an ascending process evolving toward the alphabet and finally culminating in the full writing of recorded speech Writing without Words challenges this orthodoxy and with it widespread notions of literacy and dominant views of art and literature history and geography Asking how knowledge was encoded and preserved in Pre Columbian and early colonial Mesoamerican cultures the authors focus on systems of writing that did not strive to represent speech Their work reveals the complicity of ideology in the history of literacy and offers new insight into the history of writing The contributors who include art historians anthropologists and literary theorists examine the ways in which ancient Mesoamerican and Andean peoples conveyed meaning through hieroglyphic pictorial and coded systems systems inseparable from the ideologies they were developed to serve We see then how these systems changed with the European invasion and how uniquely colonial writing systems came to embody the post conquest American ideologies The authors also explore the role of these early systems in religious discourse and their relation to later colonial writing Bringing the insights from Mesoamerica and the Andes to bear on a fundamental exchange among art history literary theory semiotics and anthropology the volume reveals the power contained in the medium of writing Contributors Elizabeth Hill Boone Tom Cummins Stephen Houston Mark B King Dana Leibsohn Walter D Mignolo John Monaghan John M D Pohl Joanne Rappaport Peter van der Loo *Linguistic Worldview(s)* Adam Glaz, 2021-10-01 This book explores the concept of linguistic worldview which is underpinned by the underlying idea that languages in their lexicogrammatical structures and patterns of usage encode interpretations of reality that symbolize shape and construct speakers cultural experience The volume traces the

development of the linguistic worldview conception from its origins in ancient Greece to 20th century linguistic relativity  
Western ethnosemantics parallel movements in eastern Europe and contemporary inquiry into languacultures It outlines the important theoretical issues surveys the major approaches and identifies areas of both convergence and discrepancy between them By proposing three sample analyses the book highlights the relevant questions addressed in different but compatible models as well as identifies possible avenues of their further development Finally it considers several domains of potential interest to the linguistic worldview agenda Because inquiry into linguistic worldviews concerns the sphere of the symbolic and the cultural it touches upon the very essence of human lives This book will be of interest to scholars working in cultural linguistics ethnolinguistics linguistic anthropology comparative semantics and translation studies
