

# CHAPTER 10

## Gybing

### Medium Winds

Gybing is all about turning the boat when it's going fastest and using a nice smooth roll to help the roll around.

It's vital to pick the right wave to gybe on. Sometimes, even though you're surfing, you don't want to gybe because you're coming to the end of the wave. The best time is as you catch a wave, or if you think you can catch the wave by roll gybing.

Begin to catch a wave

Don't roll the boat

Watch the boom across

Don't go on the other side

Pull in the sheet a bit before you start and use a bit of roll so you have really good speed as you come out of the gybe. As the main comes off the masthead, give it a short sharp jerk. Push the boom across with your hand to speed things up still further (unless there's plenty of wind come out of the gybe quite high to help the boat accelerate overall, turn smoothly through a big angle).

In the middle of the gybe keep your body weight in the same position and the boat will roll over on

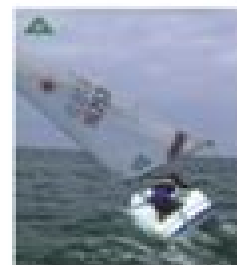

That's the point to let

Begin to roll the boat

Don't roll the boat

A long way over

Come out of the gybe quite high

Don't roll over onto the other side

top of you. Use your front hand on the boom to keep on. Sheet in a little bit more, and choose the right moment to cross the boat. As you go, push the boom across with that same front hand.

I used to gybe a long time before I change hands to make sure that I'm steering in the right direction. Changing feet is not as important as it is after a tack.

One of the most common problems is getting the mainsheet caught round the stern of the boat. This happens when the boat is turned at

slow speed with no heel and you forget to pull in the main. The sheet hits the water, gets dragged backwards and, when the boat comes across, the sheet catches the corner of the stern.

If the mainsheet does get caught don't panic. Try to keep the boat heading dead downwind before you move to the back of the boat and untuck the sheet. If you try to do this at any other angle there will be too much power in the rig and you will lose control.

Think ahead and set the controls for the new
