The Last Butterfly:

The Last Butterfly Larry Paige, 2009 *The Last Butterflies* Nick Haddad, 2021-04-13 A remarkable look at the rarest butterflies how global changes threaten their existence and how we can bring them back from near extinction Most of us have heard of such popular butterflies as the Monarch or Painted Lady But what about the Fender's Blue Or the St Francis Satyr Because of their extreme rarity these butterflies are not well known yet they are remarkable species with important lessons to teach us *The Last Butterflies* spotlights the rarest of these creatures some numbering no more than what can be held in one hand Drawing from his own first hand experiences Nick Haddad explores the challenges of tracking these vanishing butterflies why they are disappearing and why they are worth saving He also provides startling insights into the effects of human activity and environmental change on the planet's biodiversity Weaving a vivid and personal narrative with ideas from ecology and conservation Haddad illustrates the race against time to reverse the decline of six butterfly species Many scientists mistakenly assume we fully understand butterflies natural histories Yet as with the Large Blue in England we too often know too little and the conservation consequences are dire Haddad argues that a hands off approach is not effective and that in many instances like for the Fender's Blue and Bay Checkerspot active and aggressive management is necessary With deliberate conservation rare butterflies can coexist with people inhabit urban fringes and in the case of the St Francis Satyr even reside on bomb ranges and military land Haddad shows that through the efforts to protect and restore butterflies we might learn how to successfully confront conservation issues for all animals and plants A moving account of extinction recovery and hope *The Last Butterflies* demonstrates the great value of these beautiful insects to science conservation and people *The Butterflies of the Eastern United States and Canada* Samuel Hubbard Scudder, 1889 **Every-day**
