anthropological theory or the history of social anthropology and related disciplines *The San, Hunter-gatherers of the Kalahari* □□□□, 1980 **The Interpretation of Archaeological Spatial Patterning** Ellen M. Kroll, T. Douglas

Price, 2013-06-29 Investigations of archaeological intrasite spatial patterns have generally taken one of two directions: studies that introduced and explored methods for the analysis of archaeological spatial patterns or those that described and analyzed the formation of spatial patterns in actualistic ethnographic experimental or natural contexts. The archaeological studies were largely quantitative in nature, concerned with the recognition and definition of patterns; the actualistic efforts were often oriented more toward interpretation, dealing with how patterns formed and what they meant. Our research group on archaeological spatial analysis at the University of Wisconsin-Madison has been working for several years on both quantitative and interpretive problems. Both lines of investigation are closely related and are important complements. In order to demonstrate the convergence of archaeological and actualistic studies for the understanding of intrasite spatial patterns, we organized a symposium at the 52nd Annual Meeting of the Society of American Archaeology in Toronto, Canada, in May 1987. The symposium, titled *The Interpretation of Stone Age Archaeological Spatial Patterns*, was organized into two sessions. The six papers presented in the morning session, five of which comprise Part I of this volume, focused on ethnoarchaeological and experimental research. Michael Schiffer was the discussant for this half of the symposium. Our intention for the ethnoarchaeological contributions to the symposium and volume was the delineation of some of the significant accomplishments achieved thus far by actualistic studies regarding the formation of spatial patterns. *The Bushmen* Jirō Tanaka, 2014 *The Bushmen* archives nearly 50 years of research with some of Southern Africa's remotest groups. Author Jiro Tanaka's deep connection with his subject matter is evident through his insightful and often touching stories and reflections on a rich and challenging life work. Tanaka interweaves ethnographic materials with broader reflections on the changes that have beset Bushman groups carried by waves of global political and economic developments. While some of the characteristics of the process of transformation are specific to Bushman society, many others are shared by other indigenous and minority societies around the world. The book analyzes the transformation process from this perspective and at the same time serves as a catalyst for readers to look back and question the state of our own civilization. This book chronicles the ecology, society, and lifeways of the Bushmen before settlement and their mixed fate afterward. Tanaka's efforts continue through the many students now working there. This book is a rather breathless overview of the 50-year adventure. It is a wonderful read. Recommended Choice Vol 52 No 3 November 2014 Subject: Ethnography, Anthropology, African Studies, Indigenous Studies.
