The Last Capitalist:

Russia's Last Capitalists Alan M. Ball,1990-09-18 In 1921 Lenin surprised foreign observers and many in his own Party by calling for the legalization of private trade and manufacturing Within a matter of months this New Economic Policy NEP spawned many thousands of private entrepreneurs dubbed Nepmen After delineating this political background Alan Ball turns his attention to the Nepmen themselves examining where they came from how they fared in competition with the socialist sector of the economy their importance in the Soviet economy and the consequences of their liquidation at the end of the 1920s Alan Ball s history of this experiment with capitalism is strikingly relevant to current efforts toward economic reform in the USSR **The Beginning of the End** Angelo Quattrocchi,Tom Nairn,1998-05-17 Provides an eyewitness account of the 1968 riots in Paris

Dematerialisation of Karl Marx Leonard Jackson,2014-07-22 This volume constitutes both an attack on modern left wing literary theory the main product of the last Marxist renaissance in the past thirty years and a defence of the one element of Marxism which in the general collapse modern theorists have been happiest to lose its economic materialism It traces Marxist theory from its beginnings in Hegelian idealism to its end in Althusser s structuralism and concludes that while Marxist economics will not work and the type of revolution prophesied was fantasy the principle of historical materialism remains intact and defensible This will be a key text in literary and cultural studies as well as being of interest to students on philosophy and sociology courses *Capital. Political Economy is the most cited book in the social sciences published before 1950 Marx aimed to reveal the economic patterns underpinning the capitalist mode of production in contrast to classical political economists such as Adam Smith Jean Baptiste Say David Ricardo and John Stuart Mill Marx proposes that the motivating force of capitalism is in the exploitation of labor whose unpaid work is the ultimate source of surplus value Das Kapital proposes an explanation of the laws of motion of the capitalist economic system from its origins to its future by describing the dynamics of the accumulation of capital the growth of wage labour the transformation of the workplace the concentration of capital commercial competition the banking system the decline of the profit rate land rents et cetera **Collected Works of Karl Marx and Friederich Engels.**

and three after Marx's death Engels died before he could publish it. Theories has had a long history of being in and out of publication and particularly in and out of being an actually accessible publication. In 1905 the infamously hated by Lenin Karl Kautsky published the first edition of the manuscript in three volumes separated and rearranged by Adam Smith in volume one to David Ricardo in the other two volumes with the breakup of the Ricardian school as the third volume. Kautsky's version circulated in print and was translated to many languages over the decades remaining the sole version of Theories until The Institute of Marxism-Leninism published a new German version. This arrangement while still relatively close to Kautsky's narrative arrangement of tracing surplus value from Smith to the Ricardian split into vulgar economics annotated the manuscript with different topic headings. This version was then translated into English by Progress Publishers and this is the version of the book which circulates today and is considered to be the most accurate version to Marx's notebooks. This Radical Reprint by Pattern Books is made to be accessible and as close to only manufacturing cost as possible. This third volume of Theories of Surplus Value covers the confusion between the concepts of commodity and capital constant and variable capital and over production the problem of relativizing the categories of value and equivalence. John Stuart Mill's reduction of Ricardian's economic theories and the reductions of surplus value into profit theory and as Marx continually says its descent into being vulgar political economy. These three volumes in totality are to show how the classical theories of value led to a theory stuck within the market paradigm and caught in the loop of capitalist circularity. For Marx the current ontology of political economy only ruled within the scope of pragmatism within the market system and these programs no longer offered any integrated theory of capitalism.

The Dream of the Great American Novel Lawrence Buell, 2014-02-10

The idea of the great American novel continues to thrive almost as vigorously as in its nineteenth century heyday defying 150 years of attempts to dismiss it as amateurish or obsolete. In this landmark book the first in many years to take in the whole sweep of national fiction Lawrence Buell reanimates this supposedly antiquated idea demonstrating that its history is a key to the dynamics of national literature and national identity itself. The dream of the G A N as Henry James nicknamed it crystallized soon after the Civil War. In fresh in depth readings of selected contenders from the 1850s onward in conversation with hundreds of other novels Buell delineates four scripts for G A N candidates. One illustrated by The Scarlet Letter is the adaptation of the novel's story line by later writers often in ways that are contrary to the original author's own design. Other aspirants including The Great Gatsby and Invisible Man engage the American Dream of remarkable transformation from humble origins. A third script seen in Uncle Tom's Cabin and Beloved is the family saga that grapples with racial and other social divisions. Finally mega novels from Moby Dick to Gravity's Rainbow feature assemblages of characters who dramatize in microcosm the promise and pitfalls of democracy. The canvas of the great American novel is in constant motion reflecting revolutions in fictional fashion the changing face of authorship and the inseparability of high culture from popular. As Buell reveals the elusive G A N showcases the myth of the United States as a nation perpetually under construction.
