American Foreign Policy Paul Viotti, 2010-04-26 As the world's only superpower America's foreign policy inevitably has a major impact be it positive or negative on contemporary international affairs Since the terrorist attacks of 9/11 George W. Bush's decision to move away from multilateral decision making toward a more aggressive preemptive style of foreign policy attracted widespread debate and criticism throughout the world Reversing direction the Barack Obama presidency is placing greater emphasis on constructive or peaceful engagement within multilateral frameworks relying on special envoys to deal with some of the thorniest problems In this book Paul Viotti explores American foreign policy from the founding of the republic in the late 18th Century to the present day Part 1 examines the broad policy options available to the US government namely peaceful engagement containment through deterrence or coercive diplomacy and armed intervention Part 2 looks at the American experience in foreign policy By exploring early precedents and elite practices the moralism of American exceptionalism as well as the roots of an expansionist American foreign policy the discussion draws out the continuities running from the 18th century to the present Part 3 concludes with an analysis of the politics of interest on the Potomac with analysis of the interplay of contending policy elites factions and parties influencing foreign policy making today Assessing alternatives the author concludes that even though containment and armed intervention will remain part of the way the United States conducts its foreign policy diplomatic engagement options are the most promising course of action for the coming decades

The International Relations of the Contemporary Middle East Tareq Y. Ismael, Glenn E. Perry, 2013-10-01 The Middle East a few decades ago was seen to be an autonomous subsystem of the global international political system More recently the region has been subordinated to the hegemony of a singular superpower the US bolstered by an alliance with Israel and a network of Arab client states The subordination of the contemporary Middle East has resulted

in large part from the disappearance of countervailing forces for example global bipolarity that for a while allowed the Arab world in particular to exercise a modicum of flexibility in shaping its international relations The aspirations of the indigenous population of the Middle East have been stifled by the dynamics of the unequal global power relationships and domestic politics of the countries of the region are regularly subordinated to the prerogatives of international markets and the strategic competition of the great powers Employing the concept of imperialism defined as a pattern of alliances between a center rulers in the Center developed country and a center client regime in the Periphery underdeveloped country as an overall framework to analyse the subordination of the region this book is essential reading for students and scholars of the Middle East International Relations and Politics in general **The Limits of Constitutional Democracy** Jeffrey K.

Tulis,Stephen Macedo,2010-10-18 Constitutional democracy is at once a flourishing idea filled with optimism and promise and an enterprise fraught with limitations Uncovering the reasons for this ambivalence this book looks at the difficulties of constitutional democracy and reexamines fundamental questions What is constitutional democracy When does it succeed or fail Can constitutional democracies conduct war Can they preserve their values and institutions while addressing new forms of global interdependence The authors gathered here interrogate constitutional democracy s meaning in order to illuminate its future The book examines key themes the issues of constitutional failure the problem of emergency power and whether constitutions should be suspended when emergencies arise the dilemmas faced when constitutions provide and restrict executive power during wartime and whether constitutions can adapt to such globalization challenges as immigration religious resurgence and nuclear arms proliferation In addition to the editors the contributors are Sotirios Barber Joseph Bessette Mark Brandon Daniel Deudney Christopher Eisgruber James Fleming William Harris II Ran Hirschl Gary Jacobsohn Benjamin Kleinerman Jan Werner Müller Kim Scheppele Rogers Smith Adrian Vermeule and Mariah Zeisberg **Catalog of**

Doing Theology in the Age of Trump Jeffrey W. Robbins, Clayton Crockett, 2018-11-08 This book is a work of theological resistance It is not so much about the presidency of Donald Trump as it is about what his popularity and rise to power reveal about the state of Christianity and the moral character of the evangelical Right in the United States today More specifically it is about the threat of white Christian nationalism which is the particular form that the nationalist populist movement of Trumpism has adopted for itself The contributors are all fellows from the Westar Institute s academic seminar on God and the Human Future and include many of the leading figures in theology and Continental philosophy of religion This volume provides a form of theopolitical resistance based on intersectionality The authors recognize how the various forms of oppression interrelate to contribute to a vast

dynamic and seeming impenetrable network of systemic injustice and marginalization These essays demonstrate that politics need not be played as a zero sum game with a winner take all mentality and that a critical theology is as urgently needed and as relevant now as ever

Faith-Based War T. Walter Herbert, 2014-12-05 The American invasion of Iraq was largely governed by faith based policy The shock and Awe strategy alongside a grossly mismanaged occupation led to the loss of American lives Faith Based War presents an analysis of the imperialist Christian militarism behind the Bush Administration America's self perception as God's Chosen is examined and its catastrophic results detailed The book offers an ethical political and theological perspective on the perversion of Christian teaching behind the war in Iraq and the moral culpability of the American empire

Empire of Ruin John Levi Barnard, 2018 From the US Capitol to the Lincoln Memorial and the 9 11 Memorial Museum classical forms and ideas have been central to an American nationalist aesthetic Beginning with an understanding of this centrality of the classical tradition to the construction of American national identity and the projection of American power *Empire of Ruin* describes a mode of black classicism that has been integral to the larger critique of American politics aesthetics and historiography that African American cultural production has more generally advanced While the classical tradition has provided a repository of ideas and images that have allowed white American elites to conceive of the nation as an ideal Republic and the vanguard of the idea of civilization African American writers artists and activists have characterized this dominant mode of classical appropriation as emblematic of a national commitment to an economy of enslavement and a geopolitical project of empire If the dominant forms of American classicism and monumental culture have asserted the ascendancy of what Thomas Jefferson called an empire for liberty for African American writers and artists it has suggested that the nation is nothing exceptional but rather another iteration of what the radical abolitionist Henry Highland Garnet identified as an empire of slavery inexorably devolving into an empire of ruin

The American Imperial Gothic Johan Hogg, 2016-03-16 The imagination of the early twenty first century is catastrophic with Hollywood blockbusters novels computer games popular music art and even political speeches all depicting a world consumed by vampires zombies meteors aliens from outer space disease crazed terrorists and mad scientists These frequently gothic descriptions of the apocalypse not only commodify fear itself they articulate and even help produce imperialism Building on and often retelling the British imperial gothic of the late nineteenth century the American imperial gothic is obsessed with race gender degeneration and invasion with the destruction of society the collapse of modernity and the disintegration of capitalism Drawing on a rich array of texts from a long history of the gothic this book contends that the doom faced by the world in popular culture is related to the current global instability renegotiation of worldwide power and the American bid for hegemony that goes back to the beginning of the Republic and which have given shape to the first decade of the millennium From the frontier gothic of Charles Brockden Brown's *Edgar Huntly* to the apocalyptic torture porn of Eli Roth's *Hostel* the American imperial gothic dramatises the desires and anxieties of empire Revealing the ways in which images of

destruction and social upheaval both query the violence with which the US has asserted itself locally and globally and feed the longing for stable imperial structures this book will be of interest to scholars and students of popular culture cultural and media studies literary and visual studies and sociology
