## **The Last Lamp:**

*Lights on the Mountain* ,      **The Six Lamps** Jean-Luc Achard,2017-03-28 Esteemed Tibetologist Jean Luc Achard contextualizes and provides a clear translation of highly secret precepts on Dzogchen practice unlike anything published The Instructions on the Six Lamps is a profound and important work from the B n Dzogchen tradition and is one of the root texts of the Zhangzhung Nyengy Oral Transmission of Zhangzhung series of orally transmitted teachings Considered to be the central work of the inner cycle of these teachings it expertly details the principles of the natural state and its visionary marvels The root text describes highly secret precepts of Dzogchen Great Perfection practice the teachings of Trekch and Th gel as revealed by Tapihritsa to Gyerpung Nangzher L po The teachings in this text represent oral instructions transmitted by a single master to a single disciple in the mode known as single transmission It is through such a practice that one can see the clear light of one s own mind before achieving complete buddhahood In this respect the text contains a complete teaching of Dzogchen from beginning to end      **The London magazine of light literature (conducted by W. Bijker,1997-01-03 This book crystallizes and extends the important work Wiebe Bijker has done in the last decade to found a full scale theory of sociotechnical change that describes where technologies come from and how societies deal with them Of Bicycles Bakelites and Bulbs integrates detailed case studies with theoretical generalizations and political analyses to offer a fully rounded treatment both of the relations between technology and society and of the issues involved in sociotechnical

change The stories of the the safety bicycle the first truly synthetic plastic and the fluorescent light bulb each a fascinating case study in itself reflect a cross section of time periods engineering and scientific disciplines and economic social and political cultures The bicycle story explores such issues as the role of changing gender relationships in shaping a technology the Bakelite story examines the ways in which social factors intrude even in cases of seemingly pure chemistry and entrepreneurship and the fluorescent bulb story offers insights into the ways in which political and economic relationships can affect the form of a technology Bijker s method is to use these case studies to suggest theoretical concepts that serve as building blocks in a more and more inclusive theory which is then tested against further case studies His main concern is to create a basis for science technology and social change that uncovers the social roots of technology making it amenable to democratic politics Spangenberg's Steam and Electrical Engineering in Questions and Answers Eugene
