McClelland, 2018-09-05 Contrary to those who regard the economic transformation of the West as a gradual process spanning centuries Peter D McClelland claims the initial transformation of American agriculture was an unmistakable revolution He asks when a single crucial question was first directed persistently pervasively and systematically to farming practices Is there a better way McClelland surveys practices from crop rotation to livestock breeding with a particular focus on the change in implements used to produce small grains With wit and verve and an abundance of detail he demonstrates that the first great surge in inventive activity in agronomy in the United States took place following the War of 1812 much of it in a fifteen year period ending in 1830 Once questioning the status quo became the norm for producers on and off the farm according to McClelland the march to modernization was virtually assured With the aid of more than 270 illustrations many of them taken from contemporary sources McClelland describes this stunning transformation in a manner rarely found in the agricultural literature How primitive farming implements worked what their defects were and how they were initially redesigned are explained in a manner intelligible to the novice and yet offering analysis and information of special interest to the expert *Popular Nonfiction Authors for Children* Margaret Coggins, Jane H. perspectives of people in the past considering multiple interpretations and creating evidence based historical accounts In each chapter the authors explain how the teaching demonstrated in the vignettes reflects basic principles of contemporary learning theory thus providing specific examples of successful activities and placing them in a theoretical context that allows teachers to adapt and apply them in a wide variety of settings New in the Fourth Edition Expanded coverage of world history in two new chapters Integration of new technologies to support history instruction Updated classroom examples bibliographies and references
