Tracing of Microbial Assimilation, Partitioning and Transport of Fertilisers in Grassland Soils Alice Fiona Charteris,2019-10-28 This book presents innovative research on soil nitrogen cycling and nitrate leaching with a view to improving soil management and fertiliser nitrogen use efficiency and reducing nitrogen leaching losses In this regard nitrogen 15 15N labelled fertiliser was used as a biochemical and physical stable isotope tracer in laboratory and field experiments The major outcome of the research was the development validation and application of a new compound specific amino acid 15N stable isotope probing method for assessing the assimilation of fertiliser nitrogen by soil microbial biomass The novelty of the method lies in its tracing of incorporated nitrogen into newly biosynthesised microbial protein in time course experiments using gas chromatography combustion isotope ratio mass spectrometry The approach provides previously unattainable insights into the microbial processing of different nitrogen fertilisers in different soils Further it identifies the mechanistic link between molecular scale processes and observations of field scale fertiliser nitrogen immobilisation studies The method and the results presented here will have far reaching implications for the development of enhanced recommendations concerning farm based soil management practices for increasing soil productivity and reducing nitrogen losses which is essential to minimising environmental impacts

Unlearning Charles L. Briggs,2021-05-03 A provocative theoretical synthesis by renowned folklorist and anthropologist

Charles L Briggs Unlearning questions intellectual foundations and charts new paths forward Briggs argues through an expansive look back at his own influential works as well as critical readings of the field that scholars can disrupt existing social and discourse theories across disciplines when they collaborate with theorists whose insights are not constrained by the bounds of scholarship Eschewing narrow Eurocentric modes of explanation and research foci Briggs brings together colonialism health media and psychoanalysis to rethink classic work on poetics and performance that revolutionized linguistic anthropology folkloristics media studies communication and other fields Beginning with a candid memoir that credits the mentors whose disconcerting insights prompted him to upend existing scholarly approaches Briggs combines his childhood experiences in New Mexico with his work in graduate school his ethnography in Venezuela working with Indigenous peoples and his contemporary work which is heavily weighted in medical folklore Unlearning offers students emerging scholars and veteran researchers alike a guide for turning ethnographic objects into provocations for transforming time worn theories and objects of analysis into sources of scholarly creativity deep personal engagement and efforts to confront unconscionable racial inequities It will be of significant interest to folklorists anthropologists and social theorists and will stimulate conversations across these disciplines

Climate Change Impact and Adaptation in Agricultural Systems Jurg Fuhrer, Peter J Gregory, 2014-06-18 The focus of this book is future global climate change and its implications for agricultural systems which are the main sources of agricultural goods and services provided to society These systems are either based on crop or livestock production or on combinations of the two with characteristics that differ between regions and between levels of management intensity In turn they also differ in their sensitivity to projected future changes in climate and improvements to increase climate resilience need to be tailored to the specific needs of each system The book will bring together a series of chapters that provide scientific insights to possible implications of projected climate changes for different important types of crop and livestock systems and a discussion of options for adaptive and mitigative management

Biopesticides in Environment and Food Security: Issues and Strategies Opender Koul, G.S. Dhaliwal, S. Khokhar, Ram Singh, 2012-06-01 Drivers behind food security and crop protection issues vis vis the food losses caused by pests include rapid human population increase climate change loss of beneficial on farm biodiversity reduction in per capita cropped land water shortages and pesticide withdrawals Integrated pest management therefore becomes a compulsory strategy in agriculture which offers a toolbox of complementary crop and region specific crop protection solutions to address these rising pressures IPM aims at more sustainable solutions by using complementary technologies and one of them is the use of biopesticides including genetically modified cropping systems The aim is to reduce pests below economic thresholds utilizing key ecological services particularly

biocontrol systems via semiochemicals biopesticides precision pest monitoring tools and rapid diagnostics In fact we are facing twin problems of environment and food security for the expanding population and it is necessary to ensure adequate pesticide free food The ecofriendly nature of biopesticide products suggests environment protection and safety for natural enemies and non target organisms However their adoption and use have lagged behind due to certain constraints like variable performance under field situations lack of quality standards and interest by big industrial houses and cumbersome regulatory procedures The present book is an attempt to critically debate over all these issues and suggest a road map for future **Agricultural Practices, Farm Policy, and the Conservation of Biological Diversity** Philip W.
