Studies in Sociology Various, 2022-07-30 This 9 volume collection originally published between 1969 and 1983 contains a selection of subjects viewed through the perspective of sociology including community the family friendship and kinship leisure women and introductory statistics This set will be a useful resource for those studying sociology as well as of interest for other social science courses *The War Game* Irving Horowitz, 2017-07-28 War gaming has become a characteristic feature of modern life From amateur clubs to professional academicians playing the war game in the company of military circles we have come up against the phenomenon of the robotization of human life Irving Louis Horowitz argues that those who protest the idea that war is a game do so on moral grounds that leave unanswered tough questions What is the alternative to playing the game What will become of us if we allow the opponent to become the better player in an all or nothing game of extinction Horowitz provides answers in a logical manner while focusing on facts and ethical alternatives to risky ethics The work is divided into three sections The New Civilian Militarists Thermonuclear Peace and Its Political Equivalents and General Theory of Conflict and Conflict Resolution Included are such topics as arms policies and games morals missiles and militarism and conflict consensus and cooperation Horowitz concludes that it is time to register the fact that the basic option to destructive uses of science is not traditional morality but better science a science of survival With a new introduction by Howard Schneiderman along with a major essay and other materials not included in the original edition this classic work is a worthy contribution to intellectual debate in the twenty first century and a must read for military strategists sociologists and historians **The Evolution of Alienation**

Lauren Langman, Devorah Kalekin-Fishman, 2006 Building on the Marxian view of alienation as the inevitable consequence of wage labor that divests human beings of control over their life forces The Evolution of Alienation provides new insights into contemporary conditions Contributors explore how alienation is fostered n Selling Science Stephen E.

Mawdsley, 2016-08-01 Today when many parents seem reluctant to have their children vaccinated even with long proven

medications the Salk vaccine trial which enrolled millions of healthy children to test an unproven medical intervention seems nothing short of astonishing In *Selling Science* medical historian Stephen E Mawdsley recounts the untold story of the first large clinical trial to control polio using healthy children 55 000 healthy children revealing how this long forgotten incident cleared the path for Salk's later trial Mawdsley describes how in the early 1950s Dr William Hammon and the National Foundation for Infantile Paralysis launched a pioneering medical experiment on a previously untried scale Conducted on over 55 000 healthy children in Texas Utah Iowa and Nebraska this landmark study assessed the safety and effectiveness of a blood component gamma globulin to prevent paralytic polio The value of the proposed experiment was questioned by many prominent health professionals as it harbored potential health risks but as Mawdsley points out compromise and coercion moved it forward And though the trial returned dubious results it was presented to the public as a triumph and used to justify a federally sanctioned mass immunization study on thousands of families between 1953 and 1954 Indeed the concept conduct and outcome of the GG study were sold to health professionals medical researchers and the public at each stage At a time when most Americans trusted scientists their mutual encounter under the auspices of conquering disease was shaped by politics marketing and at times deception Drawing on oral history interviews medical journals newspapers meeting minutes and private institutional records *Selling Science* sheds light on the ethics of scientific conduct and on the power of marketing to shape public opinion about medical experimentation

Power and Privilege Gerhard E. Lenski, 2013-04-01 *Power and Privilege* seeks to answer the central question of the field of social stratification Who gets what and why Using a dialectical view of the development of thought in the discipline Gerhard Lenski describes the outlines of an emerging synthesis of theories He shows that perspectives as diverse and contradictory as those of Marx Spencer Sumner Veblen Mosca Pareto Sorokin Parsons and Dahrendorf are parts of an evolving and systematic body of theory

The Brotherhood of Freemason Sisters Lilith Mahmud, 2020-03-04 This stupendous ethnography of female Freemasonry in Italy reveals the fascinating paradox of elitism and exclusion experienced by female brothers Michael Herzfeld author of *Evicted from Eternity* From its cryptic images on the dollar bill to Dan Brown's *The Lost Symbol* the Freemasons have long been one of the most romanticized secret societies in the world But a simple fact escapes most depictions of this elite brotherhood there are also female members In this groundbreaking ethnography Lilith Mahmud takes readers inside Masonic lodges of contemporary Italy where she observes the ritualistic and fraternal bonds forged among Freemason women Offering a tantalizing look behind lodge doors *The Brotherhood of Freemason Sisters* unveils a complex culture of discretion in which Freemasons reveal some truths and hide others Female initiates one of Freemasonry's best kept secrets are often upper class and highly educated yet avowedly antifeminist Their self cultivation through the Masonic path is an effort to embrace the deeply gendered ideals of fraternity In this lively investigation Mahmud unravels the contradictions at the heart of Freemasonry an organization responsible for many of the egalitarian concepts of the Enlightenment and yet one that has always been and in

Italy still remains extremely exclusive The result is not only a thrilling look at a surprisingly influential world but a reevaluation of the modern values we now take for granted **Beyond Adversary Democracy** Jane J.

Mansbridge,1983-06-15 Sociologists recurrently complain about how seldom it is that we produce books that combine serious theorizing about important issues of public policy with original and sensitive field research Several rounds of enthusiastic applause then are due Jane Mansbridge for having produced a dense and well written book whose subject is nothing less ambitious than the theory of democracy and its problems of equality solidarity and consensus *Beyond the Power Mystique* Robert Prus,1999-02-25 Despite the considerable attention given to power by foundational sources such as Machiavelli Hobbs Weber Durkheim and Marx and those social theorists who have built on their works surprisingly little attention has been given to the study of power as an enacted feature of community life Locating power more directly within a symbolic interactionist framework *Beyond the Power Mystique* not only enables scholars to permeate much of the mystique shrouding power but explicitly viewing power as intersubjective accomplishment the material presented here fosters a research agenda that is highly attentive to the collectively articulated aspects of power relations Consideration is given to the ways in which power is brought into existence implemented experienced sustained objectified resisted dissipated and reconstituted in actual practice Addressing the full range of associations occurring in all human arenas from small group settings to large scale theaters of operations this volume provides a conceptually viable means of synthesizing so called macro and micro realms of power Prus considers people s definitions of and routings into situations of power as well as the dilemmas they face the strategies they assume and the limitations they encounter as they enter into interchanges with others on both more individualized and collectively coordinated bases and in both long term and more situated instances

Germania, USA Noel Iverson,1967-02-10 Germania USA was first published in 1967 Minnesota Archive Editions uses digital technology to make long unavailable books once again accessible and are published unaltered from the original University of Minnesota Press editions An unusual community in southern Minnesota New Ulm a town of about 12 000 inhabitants is the subject of this sociological study New Ulm was founded in 1856 by a group of German immigrants who came to the United States as refugees from the revolution of 1848 in Germany They were members of the Turnverein a society of liberal thinkers who were a political minority in Germany In founding New Ulm they established a utopian ethnic community became the town s status elite and for a long time monopolized its economic political and cultural life Professor Iverson analyzes four aspects of sociological change in the community class status power and assimilation Each aspect is viewed according to the differences found between two generations of the upper status group the Turners and two corresponding generations of non Turners In addition to its substantive contribution to our knowledge of ethnic settlements the study demonstrates a gain in methodological precision over many earlier studies of ethnic communities Its chief methodological innovation is in the use of scales to verify and measure the changing structure of class status and power and

to gauge the extent of assimilation The book is of interest not only to sociologists especially those concerned with the study of community change but also to political scientists interested in the study of community power structures Also the methodology will be instructive to those interested in the design of community studies **Saving Society** Bernard S Phillips,David Christner,2015-12-22 Why do many problems throughout the world seem to be getting worse Saving Society argues that a dramatic change in our mode of thinking is required The authors show how many of our fundamental assumptions lead to an overly bureaucratic approach blocking solutions to many of our problems They contrast our present emotional repression and conforming behaviour with a more liberated form of perception thought and emotional expression which could allow us to break out of these bureaucratic routines Saving Society shows how this alternative approach might lay the basis for more effective and democratic institutions Smallville Carl Milofsky,2008 Familiar organizational theories often do not fit comfortably when applied to community level associations or small local nonprofit organizations In Smallville Carl Milofsky empirically and theoretically studies the organizational dynamics involved in this common American model Organizations functioning within a community are usually treated as separate units but when they all exist in the same place and tend to be made up of the same people who are living out different aspects of their identities in various settings a new analytical paradigm is required Milofsky s study culminates in the formulation of an innovative way of understanding this phenomenon an essential pioneering theory of transorganizations The SAGE Handbook of Sociology Craig Calhoun,Chris Rojek,Bryan S Turner,2005-06-18 Sociology has evolved greatly since its inception as an academic discipline It has diverged into numerous strands often flowing in disparate directions so much so that today the notion of canonical sociology has become widely disputed The field of sociology at present approximates to one of multi paradigmatic complexity in which many approaches to theory must be distinguished and situated In addition the discipline has had to confront new challenges from globalization the shift of interest from production to consumption the rise of new social movements the challenge of bio engineering the collapse of a presently existing socialist alternative and much else besides The new SAGE Handbook of Sociology aims to address these new developments while at the same time providing an authoritative guide to theory and method the key sub disciplines and the primary debates of today To undertake this ambitious project three leading figures in the field of sociology were selected as editors to bring together the foremost exponents of the different strands that contribute towards the make up modern sociology Drawn from both sides of the Atlantic the contributors have been commissioned to utilise the most up to date research available to provide a critical international analysis of their area of expertise The result is this essential resource collection that not just reflects upon the condition of sociology today but also looks to future developments in the discipline The Handbook is invaluable not just all sociologists but to a wide variety of students and researchers across the social sciences Click on Sample Chapters Resources to download the introduction

Metropolis Philip Kasinitz,1995 Draws on renowned social thinkers to help understand why Americans flock to urban

centers The modern city is the nexus of culture politics and art Despite the manifold problems cities face more and more Americans are abandoning rural areas and relocating to urban centers By the year 2000 4 out of 5 Americans will live within one hour of a major city What has prompted this emphasis on the city Chronicling the rise of the modern city Metropolis draws from the work of such renowned social thinkers as Georg Simmel Lewis Mumford Walter Benjamin Richard Sennett and Herbert Gans to illustrate how and why we have come to be an urban society and what the future holds for the American city Each of the five sections on modernity and the urban ethos New York City community and social bonds in the city social relations and public places and the role of space race class and politics in the American city is prefaced by an introduction by the editor highlighting the issues under discussion *Measures of Progress for Collaboration* Su Rolle,2002 General Technical Report PNW-GTR ,2002 **Democracy in Our America** Paul W. Kahn,2023-01-31 One of America s most distinguished political theorists examines what happens when national politics enters a small New England town After the election of 2016 and even more urgently after the election of 2020 many citizens looked at the economic and cultural divisions that were causing deep disruptions in American politics and asked What is happening to us Paul W Kahn explores these fundamental changes as they show themselves in a small New England town his home of twenty five years Killingworth Connecticut His inquiry grounds a democratic theory that puts volunteering not voting at its center Absent active participation citizens lose the capacity for judgment that comes from working with others to solve real problems Volunteering however is under existential threat today Changes in civil society commerce employment and public opinion formation have isolated families from each other and from their communities Even middle class families live under financial stress uncertain of their children s future and without the support of civil society Local media has disappeared Residents do not have the time information or interest to volunteer Under these conditions national polarization enters local politics which becomes yet another site for national conflict To save our democracy Kahn concludes we need to find ways of matching opportunities for participation to the ways we live our lives today
