## Smoke Rings 1923:

**The Origins of Transmedia Storytelling in Early Twentieth Century Adaptation** Alexis Weedon, 2021-06-18 This book explores the significance of professional writers and their role in developing British storytelling in the 1920s and 1930s and their influence on the poetics of today's transmedia storytelling. Modern techniques can be traced back to the early twentieth century when film, radio, and television provided professional writers with new formats and revenue streams for their fiction. The book explores the contribution of four British authors, household names in their day, who adapted work for film, television, and radio. Although celebrities between the wars, Clemence Dane, G. B. Stern, Hugh Walpole, and A. E. W. Mason have fallen from view. The popular playwright Dane, witty novelist Stern, and raconteur Walpole have been marginalised for being German, Jewish, female, or gay, and Mason's contribution to film has been overlooked also. It argues that these and other vocational authors should be reassessed for their contribution to new media forms of storytelling. The book makes a significant contribution in the fields of media studies, adaptation studies, and the literary middlebrow. **Pioneering Ideas for the Physical and Chemical Sciences** W. Fleischhacker, T. Schönfeld, 2013-11-11 This volume presents the contributions delivered at the Josef Loschmidt Symposium which took place in Vienna June 25-27, 1995. The symposium was arranged to honor Josef Loschmidt one hundred years after his death (8 July 1895) to evaluate the significance of his contributions to chemistry and physics from a modern point of view and to trace the development of scientific fields in which he had done pioneering work. Loschmidt is widely known for the first calculation of the size of molecules (1865) which also led to values for the number of molecules in unit gas volume and for the mass of molecules. With critical analyses of problems in statistical physics, he made important contributions to the development of that field. Loschmidt's paradoxon continues to be a point of departure for present-day studies and discussions. For decades there was little awareness that Loschmidt was a pioneer in organic structural chemistry. Only in recent years has Loschmidt's first scientific

publication Chemische Studien I published in 1861 become more widely known and it is now recognized that with his ideas on the structure of organic molecules he was greatly ahead of the chemists of that time The papers in these proceedings are arranged in three sections I Organic structural chemistry Chapters 1-12 2 Physics and physical chemistry Chapters 13-26 3 Loschmidt's biography Loschmidt's world Chapters 27-33 *The New Cambridge Bibliography of English Literature: Volume 4, 1900-1950* George Watson, I. R. Willison, 1972-12-07 More than fifty specialists have contributed to this new edition of volume 4 of The Cambridge Bibliography of English Literature The design of the original work has established itself so firmly as a workable solution to the immense problems of analysis articulation and coordination that it has been retained in all its essentials for the new edition The task of the new contributors has been to revise and integrate the lists of 1940 and 1957 to add materials of the following decade to correct and refine the bibliographical details already available and to reshape the whole according to a new series of conventions devised to give greater clarity and consistency to the entries

*The United States Catalog*, 1925 **Broadcasting and the NHS in the Thatcherite 1980s** Patricia Holland, 2013-07-26 Patricia Holland offers a fascinating study of the ways in which changes to public services and shifts in the concept of the public under Margaret Thatcher's three Conservative governments were mediated by radio and television in the 1980s Golden Holocaust Robert N. Proctor, 2012-02-28 The cigarette is the deadliest artifact in the history of human civilization It is also one of the most beguiling thanks to more than a century of manipulation at the hands of tobacco industry chemists In Golden Holocaust Robert N Proctor draws on reams of formerly secret industry documents to explore how the cigarette came to be the most widely used drug on the planet with six trillion sticks sold per year He paints a harrowing picture of tobacco manufacturers conspiring to block the recognition of tobacco cancer hazards even as they ensnare legions of scientists and politicians in a web of denial Proctor tells heretofore untold stories of fraud and subterfuge and he makes the strongest case to date for a simple yet ambitious remedy a ban on the manufacture and sale of cigarettes

Who's who in Literature Mark Meredith, 1927 Contains list of Fictitious and pseudonymous names **Cigarettes and Soviets** Tricia Starks, 2022-11-15 Winner of the Southern Conference on Slavic Studies Book Award Enriched by color reproductions of tobacco advertisements packs and anti smoking propaganda *Cigarettes and Soviets* provides a comprehensive study of the Soviet tobacco habit Tricia Starks examines how the Soviets maintained the first mass smoking society in the world while simultaneously fighting it The book is at once a study of Soviet tobacco deeply enmeshed in its social political and cultural context and an exploration of the global experience of the tobacco epidemic Starks examines the Soviet antipathy to tobacco yet capitulation to market the development of innovative cessation techniques and clinics and the late entry into global anti tobacco work the seeming lack of cultural stimuli alongside massive use and the expansion of

smoking without the conventional prompts of capitalist markets She tells the story of Philip Morris's Mission to Moscow campaign for the Soviet market the triumph of the quintessential capitalist product the cigarette in a communist system and the successes and failures of the world's first national antismoking campaign The interplay of male habits and health against largely female tobacco producers and medical professionals adds a gendered dimension Smoking developed continued and grew in the Soviet Union without mass production intensive advertising seductive industrial design or product ubiquity The Soviets were early to condemn tobacco and yet by the end of the twentieth century Russians smoked more heavily than most other nations in the world Cigarettes and Soviets challenges interpretations of how tobacco use rose in the past and what leads to mass use today
