Understanding Mega Free Trade Agreements Jean-Baptiste Velut, Louise Dalingwater, Vanessa Boulet, Valérie Peyronel, 2017-08-23 The rise of cross regional trade agreements is a defining trend of the current international trade system as shown by the signing of the Trans Pacific Partnership TPP in 2015 the negotiations for the Transatlantic Trade and Investment Partnership TTIP between the USA and the EU as well as the Regional Comprehensive Economic Partnership RCEP between countries in Asia and Oceania These differ from previous agreements in their economic significance and large geographic scale and the wide scope of trade related issues The current rise of nationalist and isolationist ideologies across Europe and the USA has raised questions on the future of cross regional trade deals and made the need to understand their implications for economic and political governance ever more urgent Two main forms of governance that are central to this volume are the democratic tensions over new generation trade deals on the one hand and their geopolitical ramifications on the other which have come into collision to herald the advent of a highly uncertain period of world politics Many of the questions tackled in this volume surrounding the democratic governance of trade agreements whether long held debates on the inclusion of workers voices controversies on intrusive behind the border provisions undermining national sovereignty and local autonomy or new questions on digital rights are crucial to understand the ebbing popular support for far reaching trade agreements This book will be a useful learning tool for students and scholars in a wide range of fields including Globalisation Global Governance International Political Economy International Trade and Investment and International Law and should also be of interest to EU trade negotiators international policymakers and business associations

Hoekman,Jamel Zarrouk,2010-05-18 At a time when countries in the Middle East and North Africa MENA are joining the World Trade Organization the lack of an economically sound analysis of trade policies in the region is especially notable This

volume remedies the situation by bringing together a distinguished group of applied trade economists to provide a broad view of the state of trade in and among the region's nations. The contributors provide original empirical analyses on key reform issues and their work reflects deep knowledge of government concerns and policies. Part 1 sets the scene by comparing the performance of the MENA region with the rest of the world on a large number of variables and indicators. Part 2 contains a number of CGE model based analyses of trade policy reform options. Part 3 focuses on specific policy areas: standards, nontariff barriers, and red tape trade facilitation; an assessment of the impact of protecting intellectual property using partial equilibrium techniques; and a review of the existing Euro-Med agreements. Part 4 discusses how the region could benefit from WTO membership and from changing the existing regional integration schemes into arrangements that help promote a growth enhancing reform agenda. The volume will be essential reading for economists and policymakers working in and with the MENA nations as well as officials at the multilateral and regional institutions. Contributors are: A. Developing Countries in the World Trading System Ramesh Adhikari, Premachandra Athukoralge, 2002-01-01.

Experience suggests that trade liberalization has contributed substantially to the remarkable growth of industrialized countries. However, for various reasons, many developing countries have not yet been able to integrate successfully into global markets and reap the growth inducing and poverty reducing benefits of trade. This book argues that while developing countries are heavily represented in the WTO, accounting for about four fifths of its membership, there is still plenty of scope for the world trading system to work more effectively in their interests.

Globalization Ashish Vaidya, 2005-12-19. This work is a comprehensive collection of cutting edge scholarship on the economic, international business, political, legal, and environmental ramifications of globalization, one of the hottest topics of the day. International trade is as old as nations. During the last five decades, however, advances in technology and transportation have changed the scope and method of international trade. Disputes rage about the effects of these changes; advocates for different positions offer argument but little factual or theoretical analysis. Globalization offers all the information readers need to sort out the arguments. Written with the highest degree of scholarship, intended for college students or working professionals, the encyclopedia provides both introductory material to broad economic, legal, political, and environmental theory and in depth analysis of how theory interacts with practice in the framework of global trade.
