world whose horizons of action are expanding From the Foreword by Wolfgang Streeck Max Planck Institute for the Study of Societies Cologne The rhetoric of internationalization and globalization often suggests an inexorable move away from domestic cultural and institutional differences Yet the development of internationalization within individual nations has been shaped by those very domestic institutions and cultures as best practice or other kinds of international learning have been translated into established practice and knowledge In this important study Arndt Sorge presents a sociological theory of the development of human societies to explain how business systems evolve and change and how internationalization works to specify and change societal identities within nations Examining changes in work organization corporate governance and human resources Sorge shows how this interaction is a pattern that has been followed over centuries Indeed amongst the cases Sorge presents he concentrates on the example of Germany a supposedly highly homogeneous and closed society as evidence for the universality of shifting borders expanding horizons local adoption and adaptation of global practices and the hybridization of systems and standards as the normal course of social evolution Arndt Sorge s analysis of globalization combines rigorous theoretical reasoning with empirically grounded analysis and deliberately adopts a general social science approach drawing on research from Business and Management Studies Sociology Political Science and History

As a political sociology of whites in the last years of apartheid in South Africa this book provides an analysis of the social origins and social context of political attitudes among a sample of middle class English speaking whites in selected suburbs in the city of Johannesburg Gauteng Province It reveals that such attitudes emanated in the context of acute and continuing political polarisation principally between black and white in the twilight of apartheid and before the first democratic elections The book adds another dimension to the interpretation of class dynamics in the study of apartheid South Africa In contrast to other studies that have concentrated on the working class and on very restricted political and economic elites which gives an incomplete picture of class dynamics this book considers the impact of the middle classes in shaping the history of apartheid South Africa **Classical Horizons** George E.
