women children and the elderly This highly original argument based on primary research brings new life to debates about the making of French identity in the 19th century Putting the latest theoretical thinking into empirical use the author assesses how the function of the state and its citizens changed during the Paris Commune and Franco Prussian War The study considers fresh issues such as how the people coped with the collapse of their government what the upheaval meant for the provinces of France how the issue of citizenship affected religious identities the differences between colonial Algeria and metropolitan France

Regions J. Nicholas Entrikin, 2017-05-15 This volume gathers a collection of the most seminal essays written by leading experts in the field which identify or signal many of the changing directions of regional research in geography during the past fifty years Various forms of new regionalism or new regional geography have emerged over the last several decades especially in political and economic geography but in general the region has been a concept in declining use Despite this the region has gained new currency in sub areas of political and economic geography and a so called new regionalism has emerged in studies of the changing nature of the nation state in a globalizing economy Taken together the essays in this volume provide the reader with a comprehensive overview of academic developments in this area of geographical research

Reanimating Regions James Riding, Martin Jones, 2017-05-12 Writing regions undertaking a regional study was once a standard form of geographic communication and critique This was until the quantitative revolution in the middle of the previous century and more definitively the critical turn in human geography towards the end of the twentieth century From then on writing regions as they were experienced phenomenologically or arguing culturally historically and politically with regions was deemed to be old fashioned Yet the region is and always will be a central geographical concept and thinking about regions can tell us a lot about the history of the discipline called geography Despite taking up an identifiable place within the geographical imagination in scholarship and beyond region remains a relatively forgotten under used and in part under theorised term Reanimating Regions marks the continued reinvigoration of a set of disciplinary debates surrounding regions the regional and regional geography Across 18 chapters from international interdisciplinary scholars this book writes and performs region as a temporary permanence something held stable not fixed and absolute at different points in time for different purposes There is as this expansive volume outlines no single reading of a region Reanimating Regions collectively rebalances the region within geography and geographical thought In renewing the geography of regions as not only a site of investigation but also as an analytical framework through which to write the world what emerges is a powerful reworking of the geographic imagination Read against one another the chapters weave together timely commentaries on region and regions across the globe with a particular emphasis upon the regional as played out in the United Kingdom and regional worlds both within and beyond Europe offering chapters from Africa and South America Addressing both the political and the cultural this volume responds to the need for a consolidated and considered reflection on region the regional and regional geography speaking directly to broader intellectual concerns with performance

Approaching the Past Marilyn Silverman, P. H.

Gulliver, 1992 In recent years the study of history has become a central area of inquiry within anthropology While classical anthropology focused on the present current approaches seek to do history by using a variety of conceptual and methodological approaches *Approaching the Past* is a highly provocative and original volume that examines the issues themes and difficulties emerging out of the new anthropological concern with history Anchoring the discussion with a wide range of ethnographic case studies from Ireland the contributors to this volume establish a sophisticated interdisciplinary dialogue and assess the degree to which anthropological concepts and methodologies can be applied to historical inquiry With a variety of essays representing sociological geographical and historical perspectives *Approaching the Past* is an invaluable contribution to a discipline that is expanding and reconstituting itself anew

Culture, Identity and

Nationalism Timothy Baycroft, 2004 This study examines the evolution of national and regional cultural and political identities in that northern region of France which borders Belgium over the two centuries which followed the French Revolution During that time the region was transformed by the development of the industrial economy population shifts war and occupation and numerous changes of political regime Through an analysis of a wide range of issues including language regional and national political movements educational policy attitudes towards immigrants and the border the press trade unions and the church as well as the attitude of the French State the author questions traditional interpretations of the process of national assimilation in France At the same time he illustrates how the Franco Belgian border originally an arbitrary line through a culturally homogeneous region became not only a significant marker for the identity of the French Flemish but a real cultural division TIMOTHY BAYCROFT is lecturer in French history University of Sheffield

The

Fountain of Privilege Hilton L. Root, 2024-06-04 *The Fountain of Privilege* applies contemporary economic and political theory to answer long standing historical questions about modernization In particular it contrasts political stability in Georgian England with the collapse of the Old Regime in France Why did a century of economic expansion rupture France's political foundations while leaving those of Britain intact Comparing the political and financial institutions of the two states Hilton Root argues that the French monarchy's tight control of markets created unresolvable social conflicts whereas England's broader power base permitted the wider distribution of economic favors resulting in more flexible and efficient markets This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 *Voices Revived* makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1994

Theories of Justice Brian Barry, 2023-04-28 What is social justice In *Theories of*

Justice Brian Barry provides a systematic and detailed analysis of two kinds of answers One is that justice arises from a sense

of the advantage to everyone of having constraints on the pursuit of self interest The other answer connects the idea of justice with that of impartiality Though the first book of a trilogy Theories of Justice stands alone and constitutes a major contribution to the debate about social justice that began in 1971 with Rawls s A Theory of Justice This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1989 What is social justice In Theories of Justice Brian Barry provides a systematic and detailed analysis of two kinds of answers One is that justice arises from a sense of the advantage to everyone of having constraints on the pursuit of self interest Frontiers of Social Theory George Ritzer,1990 This book presents essays reflecting the current state and near term prospects of sociological theory **Schism and Solidarity in Social Movements** Christopher K. Ansell,2001-10-01 Like many organizations and social movements the Third Republic French labour movement exhibited a marked tendency to schism into competing sectarian organizations During the roughly 50 year period from the fall of the Paris Commune to the creation of the powerful French Communist Party the French labour movement shifted from schism to broad based solidarity and back to schism In this 2001 book Ansell analyses the dynamic interplay between political mobilization organization building and ideological articulation that produced these shifts between schism and solidarity The aim is not only to shed light on the evolution of the Third Republic French labour movement but also to develop a more generic understanding of schism and solidarity in organizations and social movements To develop this broader understanding the book builds on insights drawn from sociological analyses of Protestant sects and anthropological studies of segmentary societies as well as from organization and social movement theory **Folk Engineering** Stephen J. Ramos,2025-10-03 During the interwar years the discourse of regional planning profoundly reformulated the spatiality of race and place in the United States In the South Jim Crow brutality and agricultural crisis fueled unprecedented population outmigration Sociologist and author Howard W Odum founded the Institute for Research in Social Science at the University of North Carolina to develop a Southern regionalism that reasserted organic territorial culture amid that flux Regionalism connected the arts humanities and social sciences across the country in a collective effort to elevate place based narrative and folk sensibility to an all encompassing social theory Stephen J Ramos refocuses the history of US regionalism and regional planning on the South illuminating the modern tensions inherent in regionalism as nostalgic cultural practice paired with future oriented planning ideology By tracing Southern regionalists intellectual history and institutional biography Ramos explores how they developed a regional nationalism through surveying and planning that came to inspire federal New Deal policies for the South In showing how Odum s influence crossed various borders Ramos offers us a nuanced way to reappraise race social science and planning in the US South *Nested Games* George Tsebelis,1991-08-12 Clearly written and easily understood by the

nonspecialist Nested Games provides a systematic empirically accurate and theoretically coherent account of apparently irrational political actions **Principles of Group Solidarity** Michael Hechter, 1988-08-24 Social scientists have long recognized that solidarity is essential for such phenomena as social order class and ethnic consciousness and the provision of collective goods In presenting a new general theory of group solidarity Michael Hechter here contends that it is indeed possible to build a theory of solidarity based on the action of rational individuals and in doing so he goes beyond the timeworn disciplinary boundaries separating the various social sciences
