Social Psychology Media And Research Update:

Media and Culture with 2013 Update Richard Campbell, Christopher R. Martin, Bettina Fabos, 2012-02-20 Today's media landscape is changing faster than ever and students are experiencing these developments firsthand. Media Culture pulls back the curtain on the media and shows students what all these new trends and developments really mean, giving students the deeper insight and context they need to become informed media critics. The 2013 Update also includes the must-cover events and trends students need to know to become informed media consumers and critics: from social media's influence on political events like the Occupy Wall Street movement and the Arab Spring revolutions and what the News Corp phone hacking scandal means for journalism to the continued growth of television streaming and apps and the advent of tablet-only newspapers. Read the preface. *Fundamentals of Media Effects* Jennings Bryant, Susan Thompson, Bruce W.

Finklea, 2012-05-03 Mass media's potential to influence audience beliefs and behavior is a subject that has long fascinated scholars and the general public. The ongoing interest and concern are reflected in the common tendency to blame the media for many of society's problems. This extensively revised and updated edition cuts through popular notions of presumed effects to provide a balanced, informed, up-to-date treatment of the media effects literature. The clear, compelling presentation is illuminated by dozens of new photographs. Equips readers with a fundamental understanding of the history, theoretical underpinnings, and current status of media effects research—knowledge that will help them navigate in a media-saturated environment. Several outstanding elements distinguish the Second Edition of *Fundamentals of Media Effects*. New chapters explore the impact of computer video games, the effects of the Internet and social networking sites, and the way mobile communication devices have transformed the way we live. An extensive new chapter on children's educational television describes the considerable body of research that supports positive effects like language development and flexible thinking skills. Framing studies are covered in a separate chapter where they are distinguished both theoretically and experimentally from agenda setting and priming. Finally, the authors provide overviews of classic and current research studies in an invaluable feature called Research Spotlight, which enables readers to envision how theories translate into research. The
