China's Social Insurance in the Twentieth Century Aiqun Hu, 2015-10-27 In China's Social Insurance in the Twentieth Century Aiqun Hu develops a framework of interactive diffusion of global models in examining the history of China's social insurance since the 1910s The book covers both Nationalist and Communist controlled areas 1927 1949 and Taiwan 1949 present surpassing the party divide It argues that China's progression in social insurance resulted from diffusion of two global models German capitalist and Soviet socialist social insurance until the early 1990s Thereafter China's social insurance reforms were increasingly directed by the World Bank's neoliberal models which also influenced Taiwan's pension reforms During the entire process however global forces provided the basic intellectual framework while national forces determined the timing and specifics of adopting the models

Shaffer, 1999-07-30 The conventional wisdom has it that a balanced budget is the height of economic rationality that social security should be privatized and that most adult welfare recipients could and should get jobs All our social and economic problems we are told are due to too much government if we

only left the American free enterprise system alone the free market would heal all that ails our society and lead to lasting prosperity Challenging these widespread stereotypes and myths this book starts with the fundamental theory underlying capitalist ideology showing that even in theory an unfettered free market cannot deal effectively with the many needs of a modern economy Our society has many social goals to which the great majority subscribe goals such as sustained full employment universal health care and quality education for all The free market will not the author argues bring us quality education for every American child affordable universal health care Social Security for the elderly assistance for the poor or protection of the environment Only an active participant government can affect positive change in such areas of social concern

The International Handbook on Aging Erdman P. Palmore, Frank Whittington, Suzanne Kunkel, 2009-10-27 The United Nations World Assembly on Aging has made advancing health and well being into old age a worldwide call for action And this text at hand shows us what researchers worldwide are doing to answer that call Here three of America's most esteemed experts on aging lead a global team of contributors each an expert in his or her country to show us what the top challenges of each nation are and what top research is being done there to meet those While we cannot predict with absolute certainty all of the issues that will arise over the next 20 years we can anticipate some and we must start now to prepare for these challenges an expert from the U S Department of Health and Human Services warned at a recent UN World Assembly on Aging Needed response to the global population shift is not just the responsibility of governments but will be a product of wise long term decisions made by individuals and societies she explained In most nations globally populations are graying and the number of people aged 65 and older is vastly increasing creating a larger segment of senior citizens than the world has ever before seen Across human history the elderly accounted for no more than 3 percent of the world population By the year 2030 the elderly are expected to make up about 25 percent of the world population And while longevity is of course seen as a great success longer lifespan for such masses also creates dilemmas For example the incidence of dementia has already increased significantly with an 11 fold increase in people aged 65 and older in the US since the turn of the century and a similar increase in aged people in Scotland has researchers there scrambling to find treatments for what they expect will be a 75 percent increase in dementia over the next 25 years Chronic diseases that come with aging are already taxing health care systems in the US and around the world to Japan with most experts aware their current health systems would be overrun and lack enough staff and facilities to handle the needs of an elderly population multiplying largely in the coming two decades Increases in psychological issues such as dealing with the depression often striking aged people are impending too as are social issues such as how families and public policies will deal with the changing shape of the family

Ten Worlds of Welfare Capitalism Christian Aspalter, 2023-02-02 This book presents a new step farther into the twenty first century for the first time truly combining a comprehensive global data analysis with social policy theory development The theory of global ideal typical welfare regimes also known as the Ten Worlds of Welfare Regime Theory as set forth earlier by Christian Aspalter is now in this book tested empirically using a quantitative global data analysis for the first time The strong and rich results fully vindicated the Ten Worlds Theory All in all about 150 countries are included in this test measuring numerous variables on

two main dimensions i.e. poverty and inequality. The innovative approach of using a new indicator, the Standardized Relative Performance Index, is applied which facilitated the exact measurements of distances between relative performances of each variable, each dimension, each country, and each ideal typical welfare regime in relation to one another respectively. In addition, one explanative and one normative meta study is added to the book to point to ways to understand and deal with the global culprit of inequality and hence poverty. On the backdrop of decades of comparative theoretical and empirical research, we now for the first time have a truly global analysis of welfare regimes.

The European Union, the United Nations, and the Revival of Confederal Governance

Frederick Lister, 1996-07-11

Before it became a federation, the United States was briefly a confederation, a much looser union composed of states rather than of peoples. Unions of states to promote economic well-being and to prevent war are now being revived. Mr. Lister analyzes modern confederalism and how it is functioning in the single market of the European Union and how it might function if the collective security system of the United Nations could be carried out as originally planned by a confederal style partnership of the world's independent states. Political scientists have traditionally classified voluntary polities as confederations, federations, or unitary states. But they have ignored the first of these classes, perhaps because Alexander Hamilton, wishing to mobilize support for the new federal constitution, discredited not only the United States Confederation but the whole class of confederations as a viable method of governance. More than 200 years later, confederation as a form of governance is still under a cloud. Yet it has been resurfacing, largely unrecognized for what it is in the repertory of government. In the treaties of Rome and Maastricht and in the collective security system of the Charter of the European Union and the United Nations are already involved in forms of governance that are confederal in all but name. Lister's book describes confederal governance and how such unions of states differ from intergovernmental organizations on the one hand and federations on the other. Meticulously researched and carefully argued, it draws upon his five years of study of confederal unions from Ancient Greece through the 19th century Germanic Confederation and the German Zollverein. But his book is not a history of confederations. Instead, it shows how long-term alliances sometimes evolve into unions of states and in time into communities of the peoples who live in those states. It also shows how the ties of confederal union have been institutionalized in modern times in the EU and how they might be institutionalized in a global collective security body. L.L.

Finally, the book stresses the urgency of moving in this direction because we shall face a very serious security problem in the next century. With the steady leakage of nuclear materials in Russia, the non-proliferation approach to controlling weapons of mass destruction appears to be breaking down. Lister argues that if and when governments are confronted with this looming problem, perhaps in the not too distant future, the confederal model may be the one that they will need to have updated and at their disposal.

Ropewalking and Safety Nets Juliette Koning, Frans Hüsken, 2006-12-01

This volume discusses how national and local social security in Indonesia has changed over the past decades and in particular during the economic and

political crisis of the late 20th and early 21st century The contributions based on case studies from urban and rural Java focus on the evolution of existing formal and informal institutions providing social security and at the ways in which people create access to such institutions and develop strategies to handle insecurities The main conclusion is that informal institutions providing support to those who need it more and more tend to exclude the poor and weak sections of society and that government policy in this field is only beginning to address these major social issues Public Policy Evaluation Stuart S. Nagel, 2018-08-13 First published in 1998 this volume examines how super optimum decisions involve finding alternatives to controversies whereby Conservatives Liberals or other major groups can all come out ahead of their best initial expectations simultaneously This book is organised in terms of concepts methods causes process substance and the policy studies profession Concepts clarify that policy evaluation traditionally involves 1 Goals to be achieved 2 Alternatives available for achieving them 3 Relations between goals and alternatives 4 Drawing a conclusion as to the best alternative in light of the goals alternatives and relations and 5 Analysing how the conclusion would change if there were changes in the goals alternatives or relations Super optimizing also involves five related steps but with the following improvements 1 Goals are designed as conservative liberal or neutral 2 Alternatives get the same designations 3 Relations are simplified to indicate which alternatives are relatively high or low on each goal 4 The conclusion involves arriving at an alternative that does better on Goal A than Alternative A and simultaneously better on Goal B than Alternative B and 5 The fifth step involves analysing the super optimum or win win alternative in terms of its feasibility as to the economic technological psychological political administrative and legal matters
